Time and the Technosphere José Argüelles,2002-08-03 A groundbreaking study that distinguishes the natural time of the cosmos from artificial mechanistic time. • Reveals September 11 as the signal of the end of artificial time according to the Law of Time. • Long awaited sequel to the author's bestselling book *The Mayan Factor*. • Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity. In *Time and the Technosphere*, José Argüelles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live. Argüelles defines the actual nature of time as the frequency of synchronization. Applying this Law of Time to an understanding of the entire system of life on Earth, he shows that in order to not destroy Earth's ability to sustain life, we must change our definition of time and adopt a natural harmonic calendar based on the 13-moon 28-day cycle. Until the creation of the Gregorian calendar and the 60-minute hour, most of humanity lived by the 28-day cycle of natural time. The adoption of artificial time has subjected us to a 12:60 time frequency that governs the entire global industrialized civilization--the technosphere. With the collapse of the Twin Towers on September 11, a fissure was created in this artificial technosphere, opening up the noosphere (Earth's mental envelope). Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time. Our last best chance to adopt this natural time and step into the bright new future

promised by the galactic shift of 2012 is the Great Calendar Change of 2004, a new discovery based on the author's mathematical research into the Mayan calendar first begun in his landmark work *The Mayan Factor*. In *Time and the Technosphere*, Argüelles reveals the clear distinction between third-dimensional astronomical time and the fourth-dimensional synchronic order of the Law of Time, which holds enormous potential for the future of humanity.

China`s Diplomacy over the Northeast Question Ideologies, Thoughts and Values, 1858 - 1919 Xichao Yu,2024

This book explores the formation of modern Chinese diplomacy by examining how classical Chinese philosophy influenced diplomatic responses to foreign encroachments in Northeast China or Manchuria during the historical period from the signing of the Treaty of Aigun in 1858 to China's participation in the Paris Peace Conference in 1919. Drawing primarily on Qing dynasty and Beiyang government diplomatic archives and classical Chinese historiography, it highlights the role of Confucian-based principles in shaping the diplomatic thinking of the Qing dynasty and Beiyang governments. Through a top-down, state-centric analysis, the research suggests that these traditional Chinese cultural values provided a distinct intellectual and theoretical framework for modern Chinese leaders, guiding diplomatic decisions amid foreign incursions and modernisation pressures. It underscores the lasting impact of China's traditional cultural knowledge on its diplomatic evolution, particularly in resolving the so-called "Northeast Question."

The Moon Year Juliet Bredon,Igor' Mitrofanov,1927 This book is an attempt to unravel some of the puzzles of an old, old civilisation which, save in the case of a small minority, has not changed for centuries--to describe the everyday beliefs of the Chinese people and the festivals of their Moon Calendar, used as a diary of daily happenings. -- Preface.

National Geographic Atlas of China National Geographic Society (U.S.),2008 Bursting with full-colour maps and graphics, this essential atlas provides in-depth geographical coverage as it highlights the dramatic cultural and economic changes now occurring in China. National Geographic's renowned cartographers have mapped the entire country - all its administrative regions and their cities, towns, and transportation networks - to create a complete and meticulously researched panorama of the world's fastest growing economy and most populous nation. In addition to newly compiled political and physical maps, colourful thematic presentations post information on trade, energy, natural resources, environment, military strength, religion, ways of life, communications, and more. An exhaustive place-name index helps readers navigate to thousands of specific locations. State-of-the-art satellite imagery and mosaics - at the highest resolution ever published by National Geographic - reveal incredible variety and amazing details of China's sweeping physical landscapes. Ten major cities chosen

from various regions throughout China receive close-up treatment, with maps laying out each metropolitan area and quick-read fact boxes listing local climate, time zone, population, and more. The profile of Beijing, the capital, pinpoints sites of the 2008 Summer Olympics. Also charted extensively is Shanghai, host of the 2010 World's Fair - China's first - expected to draw 70 million visitors. Since the nation's turn toward openness in the late 1970s, tourism has become a major growth industry in this land of bustling cities, spectacular vistas, ethnic diversity, and cultural and historical marvels. One of the 21 thematic topics focuses on tourism, with a map locating popular attractions such as the Great Wall, the Terra-cotta Warriors, Zhulong Nature Reserve, the Silk Road, the Imperial Palace, and Hong Kong's Star Ferry. A history section covers China's primary dynasties and then with a time line highlights the events of the twentieth century to the present. Charts, graphs, and photographs complete the visual coverage of China today, with expert commentaries adding insight on topics that range from the workings of China's government to the lifestyles of its people to the global implications of its stunning emergence as a major player on the world scene.

Asian American History and Culture: An Encyclopedia Huping Ling, Allan W. Austin, 2015-03-17 With overview essays and more than 400 A-Z entries, this exhaustive encyclopedia documents the history of Asians in America from earliest contact to the present day. Organized topically by group, with an in-depth overview essay on each group, the encyclopedia examines the myriad ethnic groups and histories that make up the Asian American population in the United States. *Asian American History and Culture* covers the political, social, and cultural history of immigrants from East Asia, Southeast Asia, South Asia, the Pacific Islands, and their descendants, as well as the social and cultural issues faced by Asian American communities, families, and individuals in contemporary society. In addition to entries on various groups and cultures, the encyclopedia also includes articles on general topics such as parenting and child rearing, assimilation and acculturation, business, education, and literature. More than 100 images round out the set.

A Kid's Guide to Asian American History Valerie Petrillo, 2007-05-28 Hands-on activities, games, and crafts introduce children to the diversity of Asian American cultures and teach them about the people, experiences, and events that have shaped Asian American history. This book is broken down into sections covering American descendants from various Asian countries, including China, Japan, Korea, Philippines, India, Vietnam, Laos, and Cambodia. Topics include the history of immigration from Asian countries, important events in U.S. history, sidebars on famous Asian Americans, language lessons, and activities that highlight arts, games, food, clothing, unique celebrations, and folklore. Kids can paint a calligraphy banner, practice Tai Chi, fold an origami dog or cat, build a Japanese rock garden, construct a Korean kite, cook bibingka, and create a chalk rangoli. A time line, glossary, and recommendations for Web sites, books, movies, and museums round out this multicultural guide.

Chinese Lunar Calendar-Gregorian Calendar Conversion Tables John Oxenham Goodman, 2016-10-03 The traditional

Chinese Lunar Calendar has connections to the Five Elements of ancient China: Wood, Fire, Earth, Metal and Water which in turn have given their names to the Five Planets: Jupiter, Mars, Saturn, Venus and Mercury. The Five Elements are also related to the Five Directions: East, South, Centre, West and North as well as to the Four Seasons plus the Change of Seasons. Consequently tables explaining these have been included. The 5 Elements combine with the sun and moon to give us the 7 days of the week which are still used in Japan. The 24 Solar Terms, which divide the year into 24 periods of about 15 days, are another feature of the traditional Chinese calendar. They mark the summer and winter solstices, the spring and autumn equinoxes as well as the beginnings of the seasons. These are essential for deciding on times for planting and harvesting of crops and the 12 major Solar Terms are closely related to the 12 signs of the Western Zodiac. The 12 Earthly Branches represented by 12 animals give us a 12 year period and, when they are combined with the 10 Heavenly Stems, they give us the 60 year cycle of the traditional Chinese calendar. Tables related to all of these have been included as well as 40 pages of conversion tables from the Chinese Lunar calendar to the Gregorian calendar from 1804/1805 to 2100. Readers can easily and accurately find out the Chinese year and animal of their birth as well as the birth details of their parents and grandparents. These tables are also a useful tool for looking at Chinese history. For example the Xin Hai Revolution, which ended the rule of China's emperors, occurred during the year Xin Hai between 30 Jan 1911 and 17 Feb 1912. The charts show how Xin Hai is composed of Heavenly Stem Xin and Earthly Branch Hai. Fortune telling is another function of the traditional calendar and a 13 page table related to fortune telling in marriage, derived from a wall chart in the Wan Shou Eight Immortals Temple in Xi'an, is also included.
