

Dark Matter A Ghost Story

AN Whitehead

Dark Matter Michelle Paver, 2010-10-21 A terrifying 1930s ghost story set in the haunting wilderness of the far north. January 1937. Clouds of war are gathering over a fogbound London. Twenty-eight year old Jack is poor, lonely and desperate to change his life. So when he's offered the chance to join an Arctic expedition, he jumps at it. Spirits are high as the ship leaves Norway: five men and eight huskies, crossing the Barents Sea by the light of the midnight sun. At last they reach the remote, uninhabited bay where they will camp for the next year. Gruhuken. But the Arctic summer is brief. As night returns to claim the land, Jack feels a creeping unease. One by one, his companions are forced to leave. He faces a stark choice. Stay or go. Soon he will see the last of the sun, as the polar night engulfs the camp in months of darkness. Soon he will reach the point of no return - when the sea will freeze, making escape impossible. And Gruhuken is not uninhabited. Jack is not alone. Something walks there in the dark...

Thin Air Michelle Paver, 2016-10-06 The Himalayas, 1935. Kangchenjunga. The sacred mountain. Biggest killer of them all. Five Englishmen set out to conquer it. But courage can only take them so far. And the higher they climb, the darker it gets.

Staging the Ghost Story Kelly Jones, 2025-06-29 Staging the Ghost Story is the first book to offer a critical appraisal of the centuries-long relationship between the ghost story and the English stage. The book balances a critical consideration of the ghost story in performance, its history, its cultural politics, and its generic conventions, with practical insight regarding the valency of live representations of the supernatural, the challenges of embodiment, and the power of storytelling. Throughout, it draws upon accompanying interviews with prominent directors, playwrights, performers and stage designers in the industry, including Mark Gatiss, Robin Herford, Michael Holt, Danny Robins, Robert Lloyd Parry, Rebecca Vaughan, Tajinder Singh Hayer, Glen Neath, Adam Z. Robinson, Richard Sutton, Paul Voodini, and Jonathan Goodwin. With a focus upon the seminal elements of theatrical performance: time, space, bodies, devices, and audience, the book invites the elusive shadows of the ghost story to take centre stage.

The Invisible Universe Matthew Bothwell, 2021-11-11 From the discovery of entirely new kinds of galaxies to a window into cosmic 'prehistory', Bothwell shows us the Universe as we've never seen it before - literally. Since the dawn of our species, people all over the world have gazed in awe at the night sky. But for all the beauty and wonder of the stars, when we

look with just our eyes we are seeing and appreciating only a tiny fraction of the Universe. What does the cosmos have in store for us beyond the phenomena we can see, from black holes to supernovas? How different does the invisible Universe look from the home we thought we knew? Dr Matt Bothwell takes us on a journey through the full spectrum of light and beyond, revealing what we have learned about the mysteries of the Universe. This book is a guide to the ninety-nine per cent of cosmic reality we can't see – the Universe that is hidden, right in front of our eyes. It is also the endpoint of a scientific detective story thousands of years in the telling. It is a tour through our Invisible Universe.

A Dark Matter Peter Straub, 2011-02-22 NEW YORK TIMES BESTSELLER • “One of the most adroit masters of the supernatural thriller” (San Francisco Chronicle) delivers a chilling novel about a man seeking the truth about what happened on a horrifying night on a Midwestern campus in the 1960s. • Terrifying.... Impossible to put down. —Stephen King On a college campus, a charismatic guru and his young acolytes perform a secret ritual in a local meadow. What happens is a mystery—all that remains is a gruesomely dismembered body and the shattered souls of all who were present. Forty years later, one man seeks to learn about that horrifying night, and to do so he'll have to force those involved to examine the unspeakable events that have haunted them ever since.

Historical Dictionary of Horror Literature Mark A. Fabrizio, 2023-12-06 Stories of vampires, werewolves, zombies, witches, goblins, mummies, and other supernatural creatures have existed for time immemorial, and scary stories are among the earliest types of fiction ever recorded. Historical Dictionary of Horror Literature is an invaluable aid in studying horror literature, including influential authors, texts, terms, subgenres, and literary movements. This book contains a chronology, an introduction, and an extensive bibliography. The dictionary section has more than 400 cross-referenced entries covering authors, subgenres, tropes, awards, organizations, and important terms related to horror. Historical Dictionary of Horror Literature is an excellent resource for students, researchers, and anyone wanting to know more about horror literature.

Imaging History Bruno Vandermeulen, Danny Veys, 2011 In archaeology, photography is mainly used as a technique for gathering data and evidence. Within the framework of the research project '(in)site, site-specific photography revisited' the relationship between photography and archaeology, or broader, history is explored. How do photographers visualize history? What is the importance of place, particularly the place that remains after the event took place? How do photographers or artists use photography to depict the past, when time has become 'past time'? These articles and portfolios explore, both on practical and theoretical level, how history can be captured. The research project is an attempt to redefine the traditional relationship between archaeology and photography in order to produce new forms of image-making more adapted to contemporary visual culture. The project considers photography as a practice in which a picture is shaped and constructed by the photographer, not a practice in which a picture is mechanically taken.

Ghosts by Gaslight Jack Dann, Nick Gevers, 2011-09-06 Seventeen all-new stories illuminate the steampunk world of fog

and fear! Modern masters of the supernatural weave their magic to revitalize the chilling Victorian and Edwardian ghostly tale: here are haunted houses, arcane inventions, spirits reaching across the centuries, ghosts in the machine, fateful revelations, gaslit streets scarcely keeping the dark at bay, and other twisted variations on the immortal classics that frighten us still.

Bending Infinity: Black Holes, Wormhole Shortcuts, and the Journey from Impossible Time Travel Theory to a Nobel Prize ABHIJEET SARKAR, 2025-09-09 Bending Infinity: Black Holes, Wormhole Shortcuts, and the Journey from Impossible Time Travel Theory to a Nobel Prize by Abhijeet Sarkar, CEO & Founder, Synaptic AI Lab Are you ready to question the very fabric of your reality? For a century, two monumental theories have described our universe: Einstein's General Relativity, governing the grand cosmic dance of stars and galaxies, and Quantum Mechanics, ruling the strange, probabilistic world of atoms. But these two pillars of modern science disagree on the nature of reality. At the edge of a black hole, this disagreement becomes a full-blown war. In *Bending Infinity*, Abhijeet Sarkar, CEO & Founder of the pioneering Synaptic AI Lab, unveils the audacious, paradigm-shifting theory he believes will win the Nobel Prize—and change our understanding of the cosmos forever. This is not just another book about physics; it is the gripping, real-time story of a scientific revolution in the making. Sarkar takes you from the elegant equations of Einstein to the mind-bending paradoxes of Stephen Hawking. He reveals how a heretical idea—that Einstein's spooky action at a distance and the geometry of wormholes were two sides of the same coin—grew from a fringe theory into a testable hypothesis. With a unique perspective forged at the intersection of artificial intelligence and theoretical physics, Sarkar argues that an information-centric view of the universe is the key to unlocking its deepest secrets. Inside this groundbreaking book, you will: Journey from Newton's apple to the event horizon of a black hole, with complex ideas made stunningly clear through brilliant analogies. Grasp the true meaning of spacetime, the information paradox, and the holographic principle. Witness the birth of a revolutionary theory (ER=EPR) poised to win the Nobel Prize, proposing that the geometry of our universe is woven from the threads of quantum entanglement. Explore the awe-inspiring implications: from the possibility of time travel to the future of artificial intelligence and humanity's destiny in the stars. A masterpiece of scientific storytelling. Sarkar has thrown down the gauntlet. This is the story of a theory that will undoubtedly shape the future of physics. The most audacious and important book on cosmology since *A Brief History of Time*. This is more than a book about the universe. It's a book about our place within it. It's the story of a scientific quest that started with an impossible question and may end by rewriting the source code of reality. Thin Air Michelle Paver, 2016 Chosen for Simon Mayo's Radio 2 Book Club, this is the chilling new ghost story from the bestselling author of *Dark Matter*. The Himalayas, 1935. Kangchenjunga. Third-highest peak on earth. Greatest killer of them

all. Five Englishmen set off from Darjeeling, determined to conquer the sacred summit. But courage can only take them so far - and the mountain is not their only foe. As the wind dies, the dread grows. Mountain sickness. The horrors of extreme altitude. A past that will not stay buried. And sometimes, the truth does not set you free.

The Greenwood Encyclopedia of African American Literature: D-H Hans A. Ostrom, J. David Macey, 2005 Designed to meet the needs of high school students, undergraduates, and general readers, this encyclopedia is the most comprehensive reference available on African American literature from its origins to the present. Other works include many brief entries, or offer extended biographical sketches of a limited selection of writers. This encyclopedia surpasses existing references by offering full and current coverage of a vast range of authors and topics. While most of the entries are on individual authors, the encyclopedia gathers together information about the genres and geographical and cultural environments in which these writers have worked, and the social, political, and aesthetic movements in which they have participated. Thus the encyclopedia gives special attention to the historical and cultural forces that have shaped African American writing. - Publisher.
