Addressing Issues of Learner Diversity in English Language Education Tran, Thao Quoc, Duong, Tham My, 2024-04-22 In the dynamic context of English language education, learners bring many differences in identity, motivation, engagement, ability, and more. Addressing Issues of Learner Diversity in English Language Education recognizes that traditional, one-size-fits-all approaches to language education are insufficient in meeting the needs of a varied and global learner population. It grapples with effectively teaching English to individuals with diverse linguistic backgrounds, learning styles, and cultural contexts. The challenges range from learner autonomy and motivation issues to navigating mixed-level classes and integrating technology into language teaching. Drawing on current research trends and cutting-edge methodologies, this book captures the diverse voices of contributors from various ESL/EFL settings, offering context-specific solutions to the myriad challenges faced in language education. The book illuminates the nuanced phenomena within English language education; it showcases innovative theoretical frameworks and up-to-date research findings. By addressing learners as singular individuals and collectives, the publication guides educators in enhancing individual competencies and maximizing the potential of each learner.

Medium Or Message? Anya Woods, 2004 What is the role of language in ethnic churches? This new and much needed account of the Australian experience examines the issues faced by sixteen congregations, together representing different periods of Australia's migration history, as well as different languages, cultural backgrounds and Christian denominations. It brings to light a large range of experiences found in ethnic churches, and considers the impact of Protestant, Catholic and Orthodox traditions on the role of language. Special reference is made to the tensions that can occur due to language shift and cross-generational differences in language preference. The concept of 'language-religion ideology' is developed to describe the nature of the relationship between language and religion which is exhibited by a denomination with far-reaching implications for multilingual and multicultural societies.
