New Our Right to Love Ginny Vida, 2010-05-11 Since its original publications in 1978, Our Right to Love's resources, interviews, and essays have evolved to cover every aspect of the ever-changing, everyday lives of lesbians. The complete lesbian resource guide, Our Right to Love instantly became a classic when it was first published in 1978. Now fully revised and expanded for the 1990s, this new edition includes over 60 articles and interviews covering the many aspects of lesbian life: relationships, sexuality, health, activism, education and sports, religion and spirituality, the law and legal issues, multiethnic lesbian experience, and lesbian culture. A group of essays explores the lesbian experience across cultures (African American, Latina, Asian, Native American) and age groups. Interviews with notable lesbians Martina Navratilova, Melissa Etheridge, Margarethe Cammermeyer, and Minnesota State Representative Karen Clark examine the particular experiences of highly visible out lesbians. An extensive bibliography, resource lists, and index make this the complete lesbian reference.

The Black-Tailed Prairie Dog John L. Hoogland, 1995-04 In *The Black-Tailed Prairie Dog*, John L. Hoogland draws on sixteen years of research at Wind Cave National Park, South Dakota, in the United States to provide this account of prairie dog social behavior. Through comparisons with more than 300 other animal species, he offers new insights into basic theory in behavioral ecology and sociobiology. Hoogland documents interactions within and among families of prairie dogs to examine the advantages and disadvantages of coloniality. By addressing such topics as male and female reproductive success, inbreeding, kin recognition, and infanticide, Hoogland offers a broad view of conflict and cooperation. Among his surprising findings is that prairie dog females sometimes suckle, and at other times kill, the offspring of close kin. Enhanced by more than 100 photographs, this book illuminates the social organization of a burrowing mammal and raises fundamental questions about current theory. As the most detailed long-term study of any social rodent, *The Black-Tailed Prairie Dog* will interest not only mammalogists and other vertebrate biologists, but also students of behavioral and evolutionary ecology.
