**Judd E. Hollander**

**Arias, Ensembles, & Choruses** John Yaffé, David Daniels, 2011-11-17 Conductors John Yaffé and David Daniels have created a one-stop sourcebook for orchestras, opera companies, conductors, and librarians who research and/or prepare programs of vocal excerpts—such as solos, ensembles, and choruses—for concert performance. In this book, readers will find detailed information on a vast repertoire of vocal pieces commonly extracted from operas, operettas, musicals, and oratorios—more than 1,750 excerpts from 450 parent works. Modeled on Daniels' *Orchestral Music*, *Arias, Ensembles, & Choruses* includes basic historical details about each parent work as well as extract titles, subtitles, voice types, keys, durations, locations in the original work (with page numbers in both full scores and piano-vocal scores), and exact instrumentation. It also lists the publishers that make available the orchestral materials for just the excerpt being programmed, independent of the full parent work. Until now, conductors and orchestra librarians commonly had to first leaf through full scores, searching for one elusive three-minute aria after another, only to then consult multiple publishers' catalogues to compile crucial information on all the excerpts proposed for a concert or recording. This book constitutes a single source for finding that information. In many cases, the individual entries include valuable insider information on common performance practice, including start- and stop-points, transpositions, and conventional cuts. Searching for repertoire is made easy with the detailed title index and appendixes devoted to ensemble excerpts, all categorized by personnel (e.g., duets, trios, quartets, quintets, sextets, choruses) and language (Czech, English, French, German, Italian, Latin, Russian). This book is the ideal tool for the working conductor and orchestral librarian, as well as music program directors at colleges and conservatories, opera companies, and symphony orchestras. As of October 2015, a new printing of this book has occurred to correct errors in the index. A PDF version of the new index is available to previous purchasers of the volume. Please contact Rowman & Littlefield's music editor for assistance.

**Daniels' Orchestral Music** David Daniels, David W. Oertel, David A. Rahbee, 2022-06-30 Daniels' *Orchestral Music* is the gold standard for all orchestral professionals—from conductors, librarians, programmers, students, administrators, and publishers, to even instructors—seeking to research and plan an orchestral program, whether for a single concert or a full season. This sixth edition, celebrating the fiftieth anniversary of the original edition, has the largest increase in entries for a new edition of *Orchestral Music*: 65% more works (roughly 14,050 total) and 85% more composers (2,202 total) compared to

the fifth edition. Composition details are gleaned from personal inspection of scores by orchestral conductors, making it a reliable one-stop resource for repertoire. Users will find all the familiar and useful features of the fifth edition as well as significant updates and corrections. Works are organized alphabetically by composer and title, containing information on duration, instrumentation, date of composition, publication, movements, and special accommodations if any. Individual appendices make it easy to browse works with chorus, solo voices, or solo instruments. Other appendices list orchestral works by instrumentation and duration, as well as works intended for youth concerts. Also included are significant anniversaries of composers, composer groups for thematic programming, a title index, an introduction to Nieweg charts, essential bibliography, internet sources, institutions and organizations, and a directory of publishers necessary for the orchestra professional. This trusted work used around the globe is a must-have for orchestral professionals, whether conductors or orchestra librarians, administrators involved in artistic planning, music students considering orchestral conducting, authors of program notes, publishers and music dealers, and instructors of conducting.

**Orchestral Music** David Daniels, 2005-10-13 Familiar to conductors, orchestra managers, and music librarians, this classic sourcebook of information necessary to plan orchestral programs and organize rehearsals has been greatly expanded and revised. The fourth edition features nearly 6400 compositions that cover the standard repertoire for American orchestras (a 42% increase over the third edition), clearer entries, and a more useful system of appendixes. Included for the first time are entries from the American Symphony Orchestra League's OLIS repertoire database.

**From the Clarinet D'Amour to the Contra Bass** Albert R. Rice, 2009-03-31 Following his much-acclaimed *The Baroque Clarinet* and *The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi, soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. *From the Clarinet d'Amour to the Contrabass* will engage all who love the clarinet and its music.

**Curating Opera** Stephen Mould, 2021-02-09 Curation as a concept and a catchword in modern parlance has, over recent decades, become deeply ingrained in modern culture. The purpose of this study is to explore the curatorial forces at work within the modern opera house and to examine the functionaries and processes that guide them. In turn, comparisons are

made with the workings of the traditional art museum, where artworks are studied, preserved, restored, displayed and contextualised – processes which are also present in the opera house. Curatorial roles in each institution are identified and described, and the role of the celebrity art curator is compared with that of the modern stage director, who has acquired previously undreamt-of licence to interrogate operatic works, overlaying them with new concepts and levels of meaning in order to reinvent and redefine the operatic repertoire for contemporary needs. A point of coalescence between the opera house and the art museum is identified, with the transformation, towards the end of the nineteenth century, of the opera house into the operatic museum. Curatorial practices in the opera house are examined, and further communalities and synergies in the way that ‘works’ are defined in each institution are explored. This study also considers the so-called ‘birth’ of opera around the start of the seventeenth century, with reference to the near-contemporary rise of the modern art museum, outlining operatic practice and performance history over the last 400 years in order to identify the curatorial practices that have historically been employed in the maintenance and development of the repertoire. This examination of the forces of curation within the modern opera house will highlight aspects of authenticity, authorial intent, preservation, restoration and historically informed performance practice.
