Matteson & McConnell's Gerontological Nursing Adrienne Dill Linton,Helen W. Lach,Mary Ann Matteson,2007 Matteson & McConnell's Gerontological Nursing, 3rd Edition provides comprehensive, research-based information on nursing care of older adults. Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail, as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems/conditions. Competencies and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment, including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. nursing fields share personal experiences related to the chapters' content. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient.
