Sapiens [Tenth Anniversary Edition] Yuval Noah Harari, 2025-02-18 New York Times Readers' Pick: Top 100 Books of the 21st Century The tenth anniversary edition of the internationally bestselling phenomenon that cemented Yuval Noah Harari as one of the most prominent historians of our time—featuring a new afterword from the author. One hundred thousand years ago, at least six human species inhabited the earth. Today there is just one. Us. Homo sapiens. How did our species succeed in the battle for dominance? Why did our foraging ancestors come together to create cities and kingdoms? How did we come to believe in gods, nations, and human rights; to trust money, books, and laws; and to be enslaved by bureaucracy, timetables, and consumerism? And what will our world be like in the millennia to come? In Sapiens, Professor Yuval Noah Harari spans the whole of human history, from the very first humans to walk the earth to the radical—and sometimes devastating—breakthroughs of the Cognitive, Agricultural, and Scientific Revolutions. Drawing on insights from biology, anthropology, paleontology, and economics, and incorporating full-color illustrations throughout the text, he explores how the currents of history have shaped our human societies, the animals and plants around us, and even our personalities. Can we ever free our behavior from the legacy of our ancestors? And what, if anything, can we do to influence the course of the centuries to come? Bold, wide-ranging, and provocative, Sapiens integrates history and science to challenge everything we thought we knew about being human: our thoughts, our actions, our heritage...and our future.

Summary of Sapiens Alexander Cooper, 2021-09-11 Summary of Sapiens - A Brief History of Humankind - A Comprehensive Summary Seventy thousand years ago, there were at least six different human species on earth. They were insignificant animals whose ecological impact was less than that of fireflies or jellyfish. Today, there is only one human species left: Us. Homo sapiens. But we rule this planet. Sapiens, the book, takes us on a breath-taking ride through our entire human history, from its evolutionary roots to the age of capitalism and genetic engineering, to uncover why we are the way we are. Sapiens focuses on key processes that shaped humankind and the world around it, such as the advent of agriculture, the creation of money, the spread of religion and the rise of the nation state. Unlike other books of its kind, Sapiens takes a multi-disciplinary approach that bridges the gaps between history, biology, philosophy and economics in a way never done before. Furthermore, taking both the macro and micro view, Sapiens conveys not only what happened and why, but also how it felt for individuals. Sapiens: A Brief History of Humankind is a book by Professor Yuval Noah Harari first published in

Hebrew in Israel in 2011, and in English in 2014. Harari cites Jared Diamond's *Guns, Germs, and Steel* (1997) as one of the greatest inspirations for the book by showing that it was possible to "ask very big questions and answer them scientifically". The Cognitive Revolution is one of the key turning points in human history that Harari examines in great detail.
