Evidence-based Practice in Nursing & Healthcare Bernadette Mazurek Melnyk, Ellen Fineout-Overholt, 2011 Bernadette Mazurek Melnyk and Ellen Fineout-Overholt are creators of the ARCC (Advancing Research and Clinical practice through close Collaboration) Model, an innovative strategy for implementing and sustaining evidence-based practice in healthcare systems. The ARCC Model is cited as an exemplar of education in evidence-based practice in the Board on Health Care Services and the Institute of Medicine's book, *Health Professions Education: A Bridge to Quality*. Melnyk and Fineout-Overholt's book should be required reading in all graduate programs. Their text has provided a blueprint for the future of nursing practice and a rigorously substantiated and clearly described means for clinicians, educators, and administrators to participate in improving quality of care. Janet D. Allan, PhD, RN, FAAN Dean and Professor University of Maryland School of Nursing *Evidence-based Practice in Nursing & Healthcare: A Guide to Best Practice* has been instrumental in developing a culture of evidence-based practice at Barnes-Jewish Hospital. It is fundamental to our curriculum provided to all levels of staff, from new graduate nurses to the highest levels of hospital leadership. Dr. Patricia Potter, RN, PhD, FAAN, Dr. Gail Rea, RN, PhD, CNE, Dr. Karen Balakas, RN, PhD, CNE, Jennifer Williams, MSN, RN, ACNS-BC, Elizabeth Pratt, MSN, RN, ACNS-BC Evidence Equals Excellence group at Barnes-Jewish Hospital and Barnes-Jewish School of Nursing at Goldfarb *Evidence-based Practice in Nursing & Healthcare: A Guide to Best Practice* is an exemplary text that spans the continuum of nursing evidence to support best practice. Utilizing this text with undergraduate, RN to BSN, and graduate nursing students, it is the ONLY text that demonstrates how to retrieve, read, and analyze evidence whether it is published as an individual study, systematic review, meta-analysis, best practice guideline, or outcomes management report. Students learn how to utilize multiple complex databases and websites as they move through each chapter. And, they experience dissemination of evidence through the development of presentations, publications, posters, and grants. This is truly a remarkable book that embraces evidence as the basis for nursing practice and patient-centered care and safety. Having used this text with more than 1000 students over the past five years, I can honestly say that I have found no other text that facilitates learning and development of clinical judgment that is grounded in valid, reliable, and applicable evidence. This is a keeper! Alice E. Dupler, JD, APRN-BC Clinical Associate Professor Washington State University College of Nursing I have used the book since I developed the Evidence-based Practice course for our College of Nursing in Fall 2007. It was the first course of its kind at

Indiana State University. It has been well received and the preferred course for all nursing graduate students for completion of their final scholarly projects. The text was essential in developing the course and provides the foundation and guidance that the students need to develop their Evidence Based Practice projects...the students love the text! Susan Eley PhD, RN, FNP-BC Assistant Professor Director FNP Program Indiana State University

Professional Nursing Concepts: Competencies for Quality Leadership Anita Finkelman, Carole Kenner, 2009-01-14

Professional Nursing Concepts: Competencies for Quality Leadership takes a patient-centered, traditional approach to the topic of nursing education and professional development. This dynamic text engages students in recognizing the critical role that nurses play in healthcare delivery. Divided into four sections, this text has a unique framework and exclusively covers the Institute of Medicine's (IOM) five core competencies on quality and healthcare for all healthcare professionals. The first section introduces students to the history of the nursing profession, and covers such topics as nursing education, regulation, and accreditation. Section two explores the healthcare context in which nursing is practiced including continuum of care, health promotion, disease prevention, and illness, nursing ethics, and the nurse's role in health policy. The third section focuses on each of the five core competencies set forth by the IOM, and the final section focuses on the practice of nursing today and in the future particularly exploring the critical issue of the nursing shortage and the transformation of nursing practice.

Knowledge Utilization, Diffusion, Implementation, Transfer, and Translation Judith M. Ottoson, 2009 This volume teams up familiar literature in knowledge utilization with related theories of diffusion, implementation, transfer, and translation. Each of these knowledge-for-action theories is reviewed for its disciplinary roots, assumptions about change, key variables, and contextual influences. Cross-talk among these heretofore parallel theories identifies priorities and implications for evaluation practice. This issue provides evaluators with multiple lenses to capture change, including a consideration of complexity, rather than succumb to single-discipline perceptions of value. If we think about the new knowledge enshrined within a policy or program under evaluation as the foreground, then complexity invites evaluators to think more critically about the background, that is, the dynamic properties of the setting or system into which a policy program is introduced and the implications this raises for evaluation. This is the 124th volume of the Jossey-Bass quarterly report series *New Directions for Evaluation*, an official publication of the American Evaluation Association.
