180 Days of Writing for Fourth Grade: Practice, Assess, Diagnose Kemp, Kristin,2017-03-01 180 Days of Writing is an easy-to-use resource that provides fourth-grade students with practice in writing argument/opinion, informative/explanatory, and narratives pieces while also strengthening their language and grammar skills. Centered on high-interest themes, each two-week unit is aligned to one writing standard. Students interact with mentor texts during the first week and then apply their learning the next week by practicing the steps of the writing process: prewriting, drafting, revising, editing, and publishing. Daily practice pages make activities easy to prepare and implement as part of a classroom morning routine, at the beginning of each writing lesson, or as homework. Genre-specific rubrics and data -analysis tools provide authentic assessments that help teachers differentiate instruction. Develop enthusiastic and efficient writers through these standards-

based activities correlated to College and Career Readiness and other state standards.

Transitions to Early Care and Education DeAnna M. Laverick,Mary Renck Jalongo,2011-03-23 Transitions to new educational experiences are a universal rite of passage encountered by children worldwide. This volume in the Educating the Young Child: Advances in Theory and Research, Implications for Practice series provides early childhood educators with a resource that focuses on the transitions that young children make to early care and education settings, along with the issues that surround this important time in their lives. New experiences, such as the start of formal schooling, mark important and exciting events that also evoke different reactions from children and their families. The diverse experiences, traits, and needs exhibited by young children provide early childhood educators with what may be a potentially challenging role. With an international focus, the purpose of Transitions to Early Care and Education: International Perspectives on Making Schools Ready for Young Children is to communicate an enlarged view of the transition process in order to appreciate and honor the promise and potential of all children worldwide. Contributing to this volume are a group of distinguished researchers, practitioners, and educators in the field of early childhood education. Their collective expertise is shared with those who are committed to educating and caring for young children and the families they serve.

Routledge Handbook of Energy Transitions Kathleen Araújo,2022-12-30 The Routledge Handbook of Energy Transitions draws upon a unique and multidisciplinary network of experts from around the world to explore the expanding field of energy transitions. This Handbook recognizes that considerable changes are underway or are being developed for the modes in which energy is sourced, delivered, and utilized. Employing a sociotechnical approach that accounts for economics and engineering, as well as more cross-cutting factors, including innovation, policy and planning, and management, the volume considers contemporary ideas and practices that characterize the field. The book explores pressing issues, including choices about infrastructure, the role of food systems and materials, sustainability, and energy democracy. Disruption is a core theme throughout, with the authors examining topics such as digitalization, extreme weather, and COVID-19, along with regional similarities and differences. Overall, the Routledge Handbook of Energy Transitions advances the field of energy transitions by connecting ideas, taking stock of empirical insights, and challenging how we think about the theory and practice of energy systems change. This innovative volume functions as an authoritative roadmap with both regional and global relevance. It will be an essential resource for students, policymakers, researchers, and practitioners researching and working in the fields of energy transitions, planning, environmental management and policy, sustainable business, engineering, science and technology studies, political science, geography, design anthropology, and environmental justice. "With the exception of Chapter 26, no part of this book may be reprinted or reproduced or utilised in any form or by any electronic, mechanical, or other means, now known or hereafter invented, including photocopying and recording, or in any information storage or retrieval system, without permission in writing from the publishers." Readings in Speech Recognition Alexander Waibel,Kai-Fu Lee,1990-12-25 After more than two decades of research activity, speech recognition has begun to live up to its promise as a practical technology and interest in the field is growing dramatically. Readings in Speech Recognition provides a collection of seminal papers that have influenced or redirected the field and that illustrate the central insights that have emerged over the years. The editors provide an introduction to the field, its concerns and research problems. Subsequent chapters are devoted to the main schools of thought and design philosophies that have motivated different approaches to speech recognition system design. Each chapter includes an introduction to the papers that highlights the major insights or needs that have motivated an approach to a problem and describes the commonalities and differences of that approach to others in the book.

Not Zero Ross Clark,2023-02-02 'Bravely challenging the Establishment consensus ... forensically argued' - Mail on Sunday The British government has embarked on an ambitious and legally-binding climate change target: reduce the country's greenhouse gas emissions to Net Zero by 2050. The Net Zero policy was subject to almost no parliamentary or public scrutiny, and is universally approved by our political class. But what will its consequences be? Ross Clark argues that it is a terrible mistake, an impractical hostage to fortune which will have massive downsides. Achieving the target is predicated on the rapid development of technologies that are either non-existent, highly speculative or untested. Clark shows that efforts to achieve the target will inevitably result in a huge hit to living standards, which will clobber the poorest hardest, and gift a massive geopolitical advantage to hostile superpowers such as China and Russia. The unrealistic and rigid timetable it imposes could also result in our committing to technologies which turn out to be ineffective, all while distracting ourselves from the far more important objective of adaptation. This hard-hitting polemic provides a timely critique of a potentially devastating political consensus which could hobble Britain's economy, cost billions and not even be effective.
