**Augmenting Health and Social Care Students' Clinical Learning Experiences** Stephen Billett, Jennifer Newton, Gary Rogers, Christy Noble, 2019-02-25 This edited volume offers a range of insights about, practices of and findings associated with enriching health and social care students' learning by their engagement in educational processes during and after the completion of their practicum experiences in health and social care settings. That is, using post-practicum intervention to augment and enrich those learning experiences. The collected contributions here draw on the processes of trialing and evaluating educational processes that aimed to enrich those practicum experiences for purposes of improving students' understandings, abilities to address patients' needs, and health and social care related dispositions. These processes and findings from these processes across medical, nursing, midwifery, physiotherapy, pharmacy, exercise physiology, dietetic and speech pathology education speak directly to educators in both clinical and educational settings in the health and social care sectors. These messages, which arise from educators and clinicians enacting and evaluating these interventions, offer practical suggestions as well as conceptual advances. The reach of the accounts of processes, findings and evaluations is not restricted to this sector alone, however. The lessons provided through this edited volume are intended to inform how post-practicum interventions might be enacted across a range of occupational fields.

**Health Assessment and Physical Examination** Mary Ellen Zator Estes, Pauline Calleja, Karen Theobald, Theresa Harvey, 2019-10-24 Health assessment is an ongoing process that evaluates the whole person as a physical, psychosocial and functional being, whether they are young or old, well or ill. It uses the ENAP (Examine-Normal-Abnormal-Pathophysiology) approach as a tool for students to collect useful information. An applied case study at the end of each chapter walks students through an

example of an assessment. This comprehensive yet student-friendly text is noted for its high-quality case studies, pedagogical elements, and excellent student resources. Unique to this text are the advanced topics and 'Urgent findings', which highlights serious or life-threatening signs or critical assessment findings that need immediate attention.

Heather Herdman, Shigemi Kamitsuru, and Camila Takáo Lopes, NANDA International Nursing Diagnoses: Definitions and Classification, 2024-2026, 13th Edition is the definitive guide to nursing diagnoses, as reviewed and approved by the NANDA International (NANDA-I) Diagnosis Development Committee (DDC). In this new edition of a seminal text, the editors have provided a more in-depth discussion on diagnosis and its linkage to assessment, using Kamitsuru's Tripartite Model of Nursing Practice to differentiate between interdependent interventions based on medical and organizational standards of care, and autonomous nursing interventions based on nursing standards of care. Functional Health Patterns are used as an assessment framework to guide nurses in collecting relevant data to drive accuracy in nursing diagnosis. Ontology, classification and taxonomy are described, and the axial structure of our diagnoses - which has seen significant revision - is explained in detail. An overview on all changes and revisions in the classification is provided, along with updated research priorities and future foci for the Diagnosis Development Committee and the NANDA-I Association.
