Becoming a competitive candidate for low time flying jobs and successfully navigating the next 1,000 hours of your career requires knowledge and a set of soft and hard skills that commercial pilot training programs omit from their teach-to-the-test curriculum. The Pilot's Guide To Low Time Flying Jobs fills these holes and aids low time commercial pilots in all aspects of bridging the tedious gap between their commercial checkride and the 1,500 hour ATP milestone. This guide will teach you: • How to overcome the obstacles to employment you face as a low time pilot • What jobs are available, their minimum experience requirements, typical schedule, compensation, applicable regulations and flight techniques • Where to search for jobs, as well as a list of nearly 70, non-CFI, low time pilot employers across the US to whom you can apply • Networking techniques, with real examples of successful strategies that you can replicate • How to create the most effective pilot-specific resume and cover letter, with samples of each • The most critical information to study when preparing to begin a new job or fly a new aircraft, as well as the most effective methods of self-studying • Professional pilot techniques, tips, and knowledge, including flight planning considerations, performance and weather so that you can take your airmanship to the next level • How to deal with the seldom-discussed but most significant challenges faced by professional pilots, including external pressure imposed by employers and crew members, imposter syndrome, and mental health Corporate jet pilot and flight instructor Michael Carlini has condensed 10 years and 2,000 flight hours of experience into a few hundred pages that can be consumed in a matter of hours, giving you a detailed, actionable, and proven guide to getting hired as a low time commercial pilot.
