Story, Not Study: 30 Brief Lessons to Inspire Health Researchers as Writers Lorelei Lingard, Christopher Watling, 2021-04-26 Many researchers dread writing. They find it laborious - even painful - to put their scholarly work into words. They get bogged down in the study, and lose track of the story. And they produce uninspiring papers that fail to resonate with readers or reviewers. This book offers an antidote to this problem: brief, accessible lessons that guide researchers to write clear and compelling scientific manuscripts. The book is divided into three sections - Story, Craft, and Community. The Story section offers advice on getting the balance of study and story just right, introducing strategies for tackling each section of a scientific manuscript. The Craft section considers the grammatical and rhetorical tools of the trade, showing how they can be wielded for maximum impact. And the Community section offers suggestions for writing collaboratively, supporting other writers, and navigating peer review. Each section features multiple short and pragmatic lessons, peppered with illustrative examples. Readers can use the chapters collectively to build holistic writing skills, or dip in and out to refine specific elements of the craft. Rooted in a coaching philosophy, we aim to unlock our readers' potential as writers through instruction, reflection, and example. And we hope to inspire researchers to face writing with joy. This work is clearly written and easily understandable. Its many practical examples, tools, and exercises make an effective toolbox of support for scholarly writers. This will be invaluable to new scholars and help established scholars as well. The inclusion of examples specific to the health arena and the clear, elegantly simple explanations add strength and relevance to this work. Toni Ungaretti, Johns Hopkins School of Education, Baltimore, MD, USA This book is the most original perspective I have ever read about the craft of writing. As its title suggests, it is inspiring. Brownie Anderson, NBME, Philadelphia, PA, USA

Hit the Headlines Colin MacFarlane, 2012 Exercises, games and scenarios to encourage 9-15 year olds to seek out further knowledge in areas such as news, journalism, social issues, IT, data assessment, and 'intelligent observation'. Includes suggestions on assisting with editing, creating class or school newspapers or news websites and the employment of journalistic techniques to enhance study topics.

Beginning Links to Logic - Grades 2-4 Tiffany Rosengarten, 2010-09-01 Welcome to the beginner's world of logic! Logical thinking is a lifelong skill that is developed, practiced, and even enjoyed. The reproducible activities and puzzles in the five sections of this book are designed to teach students to think through problems. Sections include deductive reasoning

puzzles, math-based puzzles, language arts puzzles, following directions, and riddles. Students will develop a process of identifying the question, gathering the necessary information, analyzing this information, and finding a solution. A lifetime of logical thinking awaits your students?start them on a positive path with Beginning Links to Logic!
