**Archeologia dell'Architettura, XXI 2016 contiene Medioevo Fantastico. L'invenzione di uno stile nell'architettura tra fine '800 e inizio '900. Ciclo di conferenze (Padova, marzo-aprile 2015)** Alexandra Chavarría, Guido Zucconi, 2016-12-16 Il volume si apre con il ricordo di Gian Paolo Treccani, studioso importante, architetto restauratore e storico dell'architettura contemporanea e degli interventi di musealizzazione archeologica, membro della redazione della rivista e assai attivo nel gruppo che l'ha fondata nel 1996 collegando tra loro le discipline di "Restauro architettonico" e "Archeologia dell'architettura". E al periodo in cui queste due discipline coincidevano (nella conoscenza delle architetture medievali e nella progettazione di edifici che le imitavano) è dedicato il monografico dal titolo "Medioevo fantastico. L'invenzione di uno stile nell'architettura tra fine '800 e inizio '900". Il tema è trattato da due archeologi e cinque storici dell'architettura che ne analizzano le origini e lo sviluppo in alcune città (Padova, Verona, Milano, Siena e Napoli) e in relazione ai personaggi che ne furono i protagonisti (Pietro Selvatico, Camillo Boito, Luca Beltrami, Alfredo d'Andrade oltre ad altri meno noti). Nella sezione "Casi studio" vengono infine pubblicati quattro lavori (relativi alla topografia della via Latina e al complesso del Palatino a Roma, alla torre di Oyace in Val d'Aosta, e alla mensiocronologia di Rimini) che spaziano tra le architetture romane e medievale, a confermare quell'apertura cronologica che la rivista ha ultimamente adottato.

**Reading Old Books** Peter Mack, 2021-11-23 A wide-ranging exploration of the creative power of literary tradition, from Chaucer to the present In literary and cultural studies, tradition is a word everyone uses but few address critically. In *Reading Old Books*, Peter Mack offers a wide-ranging exploration of the creative power of literary tradition, from the middle ages to the twenty-first century, revealing in new ways how it helps writers and readers make new works and meanings. *Reading Old Books* argues that the best way to understand tradition is by examining the moments when a writer takes up an old text and writes something new out of a dialogue with that text and the promptings of the present situation. The book examines Petrarch as a user, instigator, and victim of tradition. It shows how Chaucer became the first great English writer by translating and adapting a minor poem by Boccaccio. It investigates how Ariosto, Tasso, and Spenser made new epic meanings by playing with assumptions, episodes, and phrases translated from their predecessors. It analyzes how the Victorian novelist Elizabeth Gaskell drew on tradition to address the new problem of urban deprivation in *Mary Barton*. And, finally, it looks at how the Kenyan writer Ngũgĩ wa Thiong'o, in his 2004 novel *Wizard of the Crow*, reflects on biblical, English literary, and African traditions. Drawing on key theorists, critics, historians, and sociologists, and stressing the international character of literary tradition, *Reading Old Books* illuminates the not entirely free choices readers and writers make to create meaning in collaboration and competition with their models.

**The Bishop's Burden** Celeste McNamara, 2020-08-14 In 1563, the Council of Trent published its Decrees, calling for significant reforms of the Catholic Church in response to criticism from both Protestants and Catholics alike. Bishops, according to the Decrees, would take the lead in implementing these reforms. They were tasked with creating a Church in which priests and laity were well educated, morally upright, and focused on worshipping God. Unfortunately for these bishops, the Decrees provided few practical suggestions for achieving the wide-ranging changes demanded. Reform was therefore an arduous and complex process, which many bishops struggled to accomplish or even refused to undertake fully. *The Bishop's Burden* argues that reforming bishops were forced to be creative and resourceful to accomplish meaningful change, including creating strong diocesan governments, reforming clerical and lay behavior, educating priests and parishioners, and converting non-believers. The book explores this issue through a detailed case study of the episcopacy of Cardinal-Bishop Gregorio Barbarigo of Padua (bp. 1664-1697), asking how a dedicated bishop formulated a reform program that sought to achieve the Church's goals. Barbarigo, like other reforming bishops, borrowed strategies from a variety of sources in the absence of clear guidance from Rome. He looked to both pre- and post-Tridentine bishops, the Society of Jesus, the Venetian government, and the Propaganda Fide, which he selectively emulated to address the problems he discovered in

Padua. The book is based primarily on the detailed records of Barbarigo's visitations of rural parishes and captures the rarely-heard voices of seventeenth-century Italian peasants. The Bishop's Burden helps us understand not only the changes experienced by early modern Catholics, but also how even the most sophisticated plans of central authorities could be frustrated by practical realities, which in turn complicates our understanding of state-building and social control.
