micro:bit. ¿Cómo enriquecer las experiencias de aprendizaje? Andrea Rocca,Domingo Borba,Mariano Ávalos,Marisa Conde,2023-01-12 Estar al corriente de las últimas tendencias tecnológicas es esencial para todo docente que quiera obtener resultados fructíferos en el aula. En este libro se presenta la placa programable micro:bit y su moderna implementación en el aula mediante el ABP (aprendizaje basado en proyectos). Se aleja de la enseñanza clásica, en la que la teoría abarcaba todo el plan de estudios, para profundizar en la materia desde una serie de desafíos por resolver de forma práctica. Gracias a esta lectura: •Descubrirá el modelo ABP a través de la placa micro:bit y se introducirá en el testeo del hardware. •Profundizará en la placa micro:bit, sus sensores, botones, ledes, bluetooth, wifi y otras partes esenciales •Ejecutará proyectos STEM (ciencia, tecnología, ingeniería y matemáticas) basados en la vida cotidiana y real. •Empleará materiales reciclados y de fácil alcance para hacer e interactuar con los experimentos creados con micro:bit. El libro recoge la experiencia de cuatro expertos que combinan con mucha armonía aspectos técnicos y pedagógicos, lo que impulsa las habilidades múltiples de los estudiantes y hace que cada uno sea el protagonista de su propio proceso de aprendizaje. Sin duda, se trata de un libro que invita a reinventarse como docente en la era tecnológica actual.

La gente del centro del mundo Echeverri Restrepo,2022-11-29 Esta obra busca contribuir al entendimiento de la cultura e historia de una sociedad amazónica, luego de su inserción violenta dentro de la economía extractiva. Se cree que los grupos indígenas han tendido o bien a la asimilación o bien a la formación de enclaves étnicos. Aquí planteamos la pregunta en otros términos: ¿Podría ser la cultura de aquellos grupos amerindios, que aparece como distintiva y propia, un reflejo dialéctico de la historia del contacto? El objetivo de este libro es investigar cómo una filosofía indígena amazónica —que aparece hoy como su cultura tradicional— se relaciona con el proceso histórico de contacto y con la construcción de nuevas formas de identidad colectiva, como queda manifiesto en la expresión gente de centro. La primera parte de la obra tiene un alcance amplio en términos etnológicos e históricos sobre los ocho pueblos de la gente de centro. La segunda y la tercera, en contraste, se enfocan en la Palabra de tabaco y coca o rafue de Kinerai, un anciano ocaina-murui del río Igaraparaná, como una curación social, histórica y tecnológica.

La era de las tierras raras Juan Manuel Chomón Pérez,2025-11-06 Ya no es solo una predicción, ahora el mundo se

despierta a una realidad que está obra anunciaba hace casi dos años. Este 4 de abril China prohibía la exportación de ciertos elementos de tierras raras tan claves como el disprosio, el terbio o el samario. La señal de alarma suena en distintos ministerios de India, Estados miembros de la UE, Japón o EEUU entre otros y los gabinetes de estos gobiernos instan a sus presidentes a tomar medidas. La administración Trump llega a un acuerdo de explotación preferencial de recursos con el presidente de Ucrania, con las tierras raras como materias primas estrella. Mientras, las industrias automovilísticas avisan de los enormes retrasos en su cadena de producción y las de defensa como el gigante americano Lockheed Martín del impacto para la manufactura de sistemas de armas. Descubra en esta segunda edición como China apoyándose en el monopolio de estos materiales acelera el paso hacia la hegemonía. Descubra sus nuevas aplicaciones tecnológicas, como catapultas espaciales, fusiles ametralladores electromagnéticos, railguns embarcados etc. y como mediante las energías renovables y vehículos eléctricos basadas en estos elementos de tierras raras, China incrementa su papel como líder del comercio a nivel mundial y erosiona el reinado de un petrodólar que empieza a ser cuestionado a nivel internacional. En esta nueva edición se evidencia como China está utilizando su carta geopolítica de las tierras raras y las repercusiones no sólo en la pugna por la hegemonía mundial sino también para la seguridad internacional.

Traditional Forest-Related Knowledge John A. Parrotta, Ronald L. Trosper, 2011-10-14 Exploring a topic of vital and ongoing importance, Traditional Forest Knowledge examines the history, current status and trends in the development and application of traditional forest knowledge by local and indigenous communities worldwide. It considers the interplay between traditional beliefs and practices and formal forest science and interrogates the often uneasy relationship between these different knowledge systems. The contents also highlight efforts to conserve and promote traditional forest management practices that balance the environmental, economic and social objectives of forest management. It places these efforts in the context of recent trends towards the devolution of forest management authority in many parts of the world. The book includes regional chapters covering North America, South America, Africa, Europe, Asia and the Australia-Pacific region. As well as relating the general factors mentioned above to these specific areas, these chapters cover issues of special regional significance, such as the importance of traditional knowledge and practices for food security, economic development and cultural identity. Other chapters examine topics ranging from key policy issues to the significant programs of regional and international organisations, and from research ethics and best practices for scientific study of traditional knowledge to the adaptation of traditional forest knowledge to climate change and globalisation.

Cafeterías sostenibles y alimentación soberana desde la responsabilidad social universitaria ,2025-04-07 La separación entre la humanidad y la naturaleza ha pasado de ser sutil e inadvertida, a innegable y agresiva; de consumir para comer y sobrevivir, a depredar para saciar deseos creados y hedonistas, manifiestos en las aspiraciones desmedidas de comprar, poseer y pertenecer, y en la sistemática manipulación de la agroindustria a través de una gigantesca estrategia

mercadológica, que en conjunto ha generado no solo enfermedades degenerativas, sino también no transmisibles, como mal nutrición, desnutrición y obesidad. En este escenario, la obra que presentamos permite visibilizar a las cafeterías universitarias como un servicio alimentario de restauración colectiva, propio de la vida estudiantil y académica, así como la práctica de una dieta de la milpa que se diversifica hasta las farmacias vivientes. Asimismo, recupera los indicadores de la Responsabilidad Social Universitaria, para concretarlos en una cafetería sostenible y agroecológica. Los trabajos integrados en esta obra son un llamado a esta consigna en pro de la calidad de vida o buenos vivires de las personas y de la comunidad de vida integral. Su lectura promete propuestas realistas e inspiradoras para provocar en cada persona que las conozca y ponga en marcha, un ser de cambio real, responsable y comprometido. La presente publicación busca mostrar la trascendencia del sentipensar, no solo estudiantil, sino de cualquier comensal, a fin de reconocer las propias ataduras y trampas del consumismo, que encadenan estilos de vida promovidos por las grandes industrias de ultraprocesados vegetales, lácteos y carnes. El equipo que colaboró en la obra cuenta con perfiles diversos relacionados con la antropología, gastronomía, derecho ambiental, ética animal, agroecología, activismo social y políticas públicas, desde diversos institutos de investigación, tanto de México como de Colombia y España. Informe del Diálogo Regional de alto nivel sobre integración de la biodiversidad en los sectores agropecuario, forestal y pesquero (DRANIBA) Organización de las Naciones Unidas para la Alimentación y la Agricultura ,Secretaria de Relaciones Exteriores ,2019-06-01 El logro de la seguridad alimentaria y nutricional para todas las personas está intrínsecamente vinculado a la mantención de la biodiversidad. Por lo tanto, aumentar la producción sostenible de alimentos saludables, nutritivos e inocuos requiere la incorporación de criterios de conservación y uso de la biodiversidad en los sistemas de producción de cultivos, ganadería, silvicultura, pesca y acuicultura. Esto no se puede lograr sin la participación activa y el compromiso de todos los sectores productivos y diferentes actores del sistema alimentario, desde productores de diferentes sectores y subsectores hasta consumidores. Este informe presenta las recomendaciones, conclusiones y plan de acción resultantes del Diálogo Regional de Alto Nivel sobre la Integración de la Biodiversidad en la Agricultura, Silvicultura y Pesca (DRANIBA) en América Latina y el Caribe, organizado por la FAO y el Gobierno de México en octubre de 2018, en el marco de la Conferencia de las Partes (COP) del Convenio sobre la Diversidad Biológica. Los delegados de diferentes sectores productivos de países de la región, y representantes de organismos internacionales y de cooperación, la sociedad civil y el mundo académico, examinaron estudios de casos y debatieron cuestiones relacionadas con la incorporación de la diversidad biológica en los sectores agrícola, ganadero, forestal, pesquero y acuícola. DRANIBA llamó la atención sobre los esfuerzos de los interesados en promover los acuerdos internacionales relacionados con la diversidad biológica y va a contribuir a la COP-14 y sus fases de seguimiento.

book provides the state of the art of ethnobiology in Argentina and related Latin American countries, highlighting timely trends and topics. It synthesizes studies resulting from the III Jornadas Argentinas de Etnobiología y Sociedad (III JAES—3rd Argentinian Meeting of Ethnobiology and Society), convened in La Plata in 2021. As a relatively new academic development, ethnobiology integrates approaches from different points of view, such as biology, anthropology, geography, history, linguistics, and, in a crucial recent advance, local perspectives. Consequently, this volume contains 33 contributions from 86 authors of different countries, orientations, and disciplines—but all related to interrelationships between people/s and the natural environment. Chapters cover a diverse array of topics, ranging from biocultural relationships and their historical construction through time to conservation of biocultural and agrobiodiversity, ethnomycology, ethnophycology, and meliponiculture and beyond. The volume's main goal is to propitiate the preservation of biocultural diversity through the application of ethnobiological wisdom in a global context characterized by the accelerated loss of traditional knowledge. The contributions aim to transcend the nature/culture dichotomy, emphasizing the inextricable relationship between communities and their environment and the importance of acting jointly in the construction of the inhabited landscape and local identity.

Normalidad transformada : por la influenza y la covid-19 en México, Cuba y Argentina Luz María Espinosa Cortés, Carlos A. Aguilar Salinas, Enrique Beldarraín Chaple, 2024-05-20 El texto aborda la complejidad de las pandemias de influenza de 1918 a 2009 y la COVID-19 en México, Cuba y Argentina, con origen zoonótico. Estas enfermedades respiratorias alteraron la normalidad, causando millones de muertes y vinculándose a eventos como guerras y conflictos

comerciales. La COVID-19, surgida en 2020, reveló debilidades en los servicios de salud, las desigualdades sociales y exclusión en los mencionados países. Además de la alta mortalidad en adultos mayores, la pandemia aumentó el riesgo de diabetes, redujo la actividad asistencial y generó inseguridad alimentaria en Centroamérica y Haití. Emocionalmente, provocó miedo, estigma y discriminación, afectando a adultos mayores en México y trabajadores de la salud en Argentina. En Cuba el personal de la salud no fue estigmatizado ni discriminado porque es respetado por la sociedad. Las pandemias impulsan el desarrollo científico y de vacunas, como en 1918 y recientemente. Al finalizar, surgen preguntas sobre cómo reducir las desigualdades sociales, evitar la disparidad ante la muerte, entender el uso político y comercial de una pandemia y abordar los desafíos pospandemia que enfrenta la humanidad.

Latin America and the Caribbean (LAC) Report International Assessment of Agricultural Knowledge, Science, and Technology for Development (Project), 2009 The International Assessment of Agricultural Knowledge, Science, and Technology for Development (IAASTD) looks realistically at how we could effectively use agriculture/AKST to help us meet development and sustainability goals. An unprecedented three-year collaborative effort, the IAASTD involved more than 400 authors in 110 countries and cost more than \$11 million. It reports on the advances and setbacks of the past fifty years and offers options for the next fifty years. The results of the project are contained in seven reports: a Global Report, five regional Sub-Global Assessments, and a Synthesis Report. The Global Report gives the key findings of the Assessment, and the five Sub-Global Assessments address regional challenges. The volumes present options for action. All of the reports have been extensively peer-reviewed by governments and experts and all have been approved by a panel of participating governments. The Sub-Global Assessments all utilize a similar and consistent framework: examining and reporting on the impacts of AKST on hunger, poverty, nutrition, human health, and environmental/social sustainability. The five Sub-Global Assessments cover the following regions: Central and West Asia and North Africa (CWANA) East and South Asia and the Pacific (ESAP) Latin America and the Caribbean (LAC) North America and Europe (NAE) Sub-Saharan Africa (SSA)
