Education and Innovative Perspectives in Higher Education Ana Luísa Rodrigues, 2024-04-30 Globalization, digitalization, and a rapid technological development of many areas of life and society, bring humanity to another level of development. Changes in the educational organizations are inevitable and the university must meet new requirements in a new paradigm (Gafurov, Safiullin, Akhmetshin, Gapsalamov, & Vasilev, 2020). Universities, as institutions capable of thinking the future, assume an increasingly relevant role at the level of the growing importance of science and its social and economic impact. In this line of thought, their metamorphosis should be promoted. This renewal requires four movements: from employability to general, humanistic, and scientific education; from the excellence of academic productivism to the

valorisation of pedagogy and teaching and training work; from entrepreneurialism to a sense of community; from entrepreneurship to public responsibility (Nóvoa, 2019).
