Algebraic Inequalities Hayk Sedrakyan, Nairi Sedrakyan, 2018-07-05 This unique collection of new and classical problems provides full coverage of algebraic inequalities. Many of the exercises are presented with detailed author-prepared solutions, developing creativity and an arsenal of new approaches for solving mathematical problems. Algebraic Inequalities can be considered a continuation of the book Geometric Inequalities: Methods of Proving by the authors. This book can serve teachers, high-school students, and mathematical competitors. It may also be used as supplemental reading, providing readers with new and classical methods for proving algebraic inequalities.

Engaging Young Students In Mathematics Through Competitions - World Perspectives And Practices: Volume Iii - Keeping Competition Mathematics Engaging In Pandemic Times Robert Geretschlager, 2024-01-16 Engaging Young Students in Mathematics through Competitions presents a wide range of topics relating to mathematics competitions and their meaning in the world of mathematical research, teaching and entertainment. Following the earlier two volumes, contributors explore a wide variety of fascinating problems of the type often presented at mathematics competitions. In this new third volume, many chapters are directly related to the challenges involved in organizing competitions under Covid-19, including many positive aspects resulting from the transition to online formats. There are also sections devoted to background information on connections between the mathematics of competitions and their organization, as well as the competitions' interplay with research, teaching and more. The various chapters are written by an international group of authors involved in problem development, many of whom were participants of the 9th Congress of the World Federation of National Mathematics Competitions in Bulgaria in 2022. Together, they provide a deep sense of the issues involved in creating such problems for competition mathematics and recreational mathematics.

The Stair-Step Approach in Mathematics Hayk Sedrakyan, Nairi Sedrakyan, 2018-01-23 This book is intended as a teacher's manual and as an independent-study handbook for students and mathematical competitors. Based on a traditional teaching philosophy and a non-traditional writing approach (the stair-step method), this book consists of new problems with solutions created by the authors. The main idea of this approach is to start from relatively easy problems and "step-by-step" increase the level of difficulty toward effectively maximizing students' learning potential. In addition to providing solutions, a separate table of answers is also given at the end of the book. A broad view of mathematics is covered, well beyond the

typical elementary level, by providing more in depth treatment of Geometry and Trigonometry, Number Theory, Algebra, Calculus, and Combinatorics.

Beijing Review ,2007

Embodying the Revolution Ofer Idels,2025-10-14 This original and thought-provoking study offers a fresh perspective on Zionism by exploring Hebrew culture's ambivalent attitude toward modern sports. Drawing on extensive archival sources and contemporary literary theories, it focuses on Zionism's surprising anxiety toward sports during the interwar heyday of "muscular Judaism," revealing an unusual society in which athletes failed to attain national pride and distinction. Addressing themes such as the body, language, space, immigration, internationalism, amateurism, gender, and militarization, *Embodying the Revolution* presents an innovative reading of Jewish life in Mandate Palestine, linking the marginalization of sports to the meaning and experience of the Zionist Revolution. Idels' compelling interpretation of the appeal of sports, selfhood, and the compromises inherent in radical aspirations—narrated from the periphery of the interwar global rise of sports—challenges contemporary assumptions that dismiss ideology as an elitist myth.
