And with its conversational writing style, vivid illustrations, and wide array of reader-friendly features, you can easily understand how the concepts in the book can be applied in clinical practice. The text is broken out into four parts: an introduction to the basic principles of nutrition science, human growth and development needs, community nutrition, and clinical nutrition. - Case studies with accompanying questions for analysis in the clinical care chapters focus your attention on related patient care problems. - Cultural Considerations boxes discuss how a patient's culture can affect nutritional concepts in practice. - Clinical Applications and For Further Focus boxes highlight timely topics and analyze concepts and trends in depth. - Bulleted chapter summaries review highlights from the chapter and help you see how the chapter contributes to the book's big picture. - Diet therapy guidelines include recommendations, restrictions, and sample diets for major clinical conditions. - Drug-Nutrient Interactions boxes highlight important safety information and cover topics such as nutritional supplements for athletics, drugs interfering with vitamin absorption, and over-the-counter weight loss aids. - Key terms and definitions clarify terminology and concepts critical to your understanding and application of the material. - NEW! Easy-to-follow writing style utilizes a more lively and direct conversation tone to make material easier to understand. - NEW! Updated references reflect the studies and statistics published in the most current scientific literature. - NEW! Incorporation of the new Nutrition Care Process model grounds you in the systematic approach to providing high-quality nutrition care with regard to nutrition assessment, diagnosis, intervention, and evaluation.

*Strategies for Achieving Food Security in Central Asia* Hami Alpas,Madeleine Smith,Asylbek Kulmyrzaev,2011-11-16

Food Security is a primary concern for all countries. However the vulnerabilities which need addressing are dictated by the individual country according to the food control systems in place, the nature of the food industry and the culture of the country. This book summarises the presentations of a NATO Advanced Training Course addressing the issue of food security in Central Asia. The book is divided into two sections. The first provides an overview of the existing aspects of food security in participating Central Asian countries. The emphasis here is on food safety, control and access and includes background information on the relevant food industries. Participating countries include the Kyrgyz Republic, Kazakhstan, Uzbekistan and Tajikistan. The second section explores particular aspects of food security in participating NATO countries. These provide some insight into the value, strengths and weaknesses of common food security systems. Chapters cover HACCP, ISO/IEC 17025 standards and associated pre-requisite systems, allergies and food intolerances, risk perception and communication, training, and ethics. A chapter on food defence in the USA is also included. This book is suitable for anyone with an interest in food control systems and food security.
