Gym Culture, Identity and Performance-Enhancing Drugs Ask Vest Christiansen, 2020-05-27 This book is about gym culture, the pursuit of fit, muscular bodies and the use of drugs as a means to get there. Building on the international research literature and in-depth interviews with men who have experience of image and performance enhancing drugs (IPEDs), the book explores the fascination with muscles, motivations for using drugs to enhance them, assessments of risks, and experience of side effects. The book examines what the altered body does to the men's identity, self-image and relationships with peers and partners. Taking an evolutionary psychological approach, it also investigates the biological and psychological foundations of the fascination with the muscular body and discusses the notion of precarious manhood. Building on these analyses the book considers the political and regulatory initiatives in place to prevent the use of IPEDs and assesses those strategies' potential to reach their aims. This is essential reading for anybody with an interest in the issue of

drugs in sport, the ethics of sport, sociology of sport, sociology of the body, masculinity or public health.

Human Enhancement Drugs Katinka van de Ven, Kyle J. D. Mulrooney, Jim McVeigh, 2026-01-22 Offering an in-depth, multidisciplinary exploration of drugs used to enhance the structure and function of muscle, weight loss, the appearance of the skin and hair, sexual function and behaviour, cognitive function, and mood and social behaviour, this book builds on the first volume by investigating the categorising of these drugs, new populations, emerging issues and harm reduction strategies, advancing the global understanding of human enhancement. This volume provides fresh insights into sports doping as well as under-researched areas, offering practical and theoretical knowledge for academics, practitioners and policymakers. Key features include a global perspective, contributions from leading experts, and coverage of novel topics such as microdosing, rural drug use and sexualised drug use. By bridging theory and practice, the book equips readers with the knowledge and tools to address the complexities of HED use, including harm reduction and policy challenges. *Human Enhancement Drugs: Volume Two* is designed for academics, students (undergraduate and postgraduate), health professionals and anti-doping officials. This book is ideal for public health, sports science, criminology, sociology and law modules, among others. Its interdisciplinary and practice-based approach ensures relevance across diverse educational and professional settings.

Anabolics William Llewellyn, 2011 William Llewellyn's ANABOLICS is the most comprehensive guide to performance-enhancing drugs ever written.
