**The Names of the Gods in Ancient Mediterranean Religions** Corinne Bonnet,2024-02-28 From Greece to Palmyra, Tyre or Babylon, the names of the gods, like 'Thundering Zeus', 'Three-faced Moon', 'Baal of the Force' or the enigmatic YHWH, reveal their history, family ties, fields of competence and capacity for action. Shared or specific, these names bring to light networks of gods: the Saviour gods, the Ancestral gods, the gods of a city or a family. Names tell stories about the relationship between men and gods, gods and places, places and cultures and so on. They show how gods travel and spread, how they appear and disappear, how they participate in the political, social, intellectual history of each community. Through the study of divine names, the twelve chapters of this book unfold a gallery of portraits that reveal the changing aspects of the divine throughout the ancient Mediterranean.

*XV Mediterranean Conference on Medical and Biological Engineering and Computing - MEDICON 2019* Jorge Henriques,Nuno Neves,Paulo de Carvalho,2019-09-24 This book gathers the proceedings of MEDICON 2019 - the XV Mediterranean Conference on Medical and Biological Engineering and Computing - which was held in September 26-28, 2019, in Coimbra, Portugal. A special emphasis has been given to practical findings, techniques and methods, aimed at fostering an effective patient empowerment, i.e. to position the patient at the heart of the health system and encourages them to be actively involved in managing their own healthcare needs. The book reports on research and development in electrical engineering, computing, data science and instrumentation, and on many topics at the interface between those disciplines. It provides academics and professionals with extensive knowledge on cutting-edge techniques and tools for detection, prevention, treatment and management of diseases. A special emphasis is given to effective advances, as well as new directions and challenges towards improving healthcare through holistic patient empowerment.

**XII Mediterranean Conference on Medical and Biological Engineering and Computing 2010** Nicolas

Pallikarakis, Panagiotis D. Bamidis, 2010-05-28 Over the past three decades, the exploding number of new technologies and applications introduced in medical practice, often powered by advances in biosignal processing and biomedical imaging, created an amazing account of new possibilities for diagnosis and therapy, but also raised major questions of appropriateness and safety. The accelerated development in this field, alongside with the promotion of electronic health care solutions, is often on the basis of an uncontrolled diffusion and use of medical technology. The emergence and use of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market. Despite the fact that the rising cost of health care, partly resulting from the new emerging technological applications, forms the most serious and urgent problem for many governments today, another important concern is that of patient safety and user protection, issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda.

**Apocryphal and Esoteric Sources in the Development of Christianity and Judaism**, 2021-06-17 Apocryphal traditions, often shared by Jews and Christians, have played a significant role in the history of both religions. The 26 essays in this volume examine regional and linguistic developments in Ethiopia, Egypt, Syria, Armenia, the Balkans, and Italy. Dissenting groups, such as the Samaritans, followers of John the Baptist, and mediæval dualists are also discussed. Furthermore, the book looks at interactions of Judaism and Christianity with the religions of Iran. Seldom verified or authorized, and frequently rejected by Churches, apocryphal texts had their own process of development, undergoing significant transformations. The book shows how apocryphal accounts could become a medium of literary and artistic elaboration and mythological creativity. Local adaptations of Biblical stories indicate that copyists, authors and artists conceived of themselves as living not in a post-Biblical era, but in direct continuity with Biblical personages.
