Business Chemistry Jens Leker, Carsten Gelhard, Stephan von Delft, 2018-03-07 *Business Chemistry: How to Build and Sustain Thriving Businesses in the Chemical Industry* is a concise text aimed at chemists, other natural scientists, and engineers who want to develop essential management skills. Written in an accessible style with the needs of managers in mind, this book provides an introduction to essential management theory, models, and practical tools relevant to the chemical industry and associated branches such as pharmaceuticals and consumer goods. Drawing on first-hand management experience and in-depth research projects, the authors of this book outline the key topics to build and sustain businesses in the chemical industry. The book addresses important topics such as strategy and new business development, describes global trends that shape chemical companies, and looks at recent issues such as business model innovation. Features of this practitioner-oriented book include: Eight chapters covering all the management topics relevant to chemists, other natural scientists and engineers. Chapters co-authored by experienced practitioners from companies such as Altana, A.T. Kearney, and Evonik Industries. Featured examples and cases from the chemical industry and associated branches throughout chapters to illustrate the practical relevance of the topics covered. Contemporary issues such as business model design, customer and supplier integration, and business co-operation.

ECEG2013- 13th European Conference on eGovernment Walter Castelnovo, Elena Ferrari, 2013-06-13 These proceedings represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the University of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme

Chair is Professor Elena Ferrari, both are from the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville, Spain and Gianluca is addressing the topic eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age. The second day of the conference is opened by Dr Antonio Cordella from the London School of Economics, London, UK, who will talk about Public value creation: the new challenge for e-government policies. ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153 abstracts, after the double blind, peer review process there are papers published in these Conference Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Egypt, Germany, Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.

Der Einsatz von Derivaten zur Zinsabsicherung Wolfgang Benzel, 2010 Fachbuch aus dem Jahr 2009 im Fachbereich BWL - Allgemeines, Veranstaltung: -, Sprache: Deutsch, Abstract: Die Kapitalmarktzinsen bewegen sich bereits seit Jahren auf einem deutlich unter dem Durchschnitt liegenden Niveau und es wird in Fachkreisen davon ausgegangen, dass diese grundsätzliche Situation von einiger Nachhaltigkeit sein wird. Vor dem Hintergrund der aktuell weiter sinkenden Zinssätze infolge der Verwerfungen auf den internationalen Finanzmärkten stellt sich jedoch die Frage, ob diese Entwicklung auch in Zukunft in die gleiche Richtung verläuft oder ob es in nicht allzu weiter Ferne zu einer Trendumkehr kommen könnte. Da gerade die aktuellen Entwicklungen gezeigt haben, dass zutreffende Prophezeiungen eher selten sind und den sich in Inauguration übenden Angehörigen der entsprechenden Zunft daher mit Vorsicht begegnet werden sollte, treten gerade vor dem Hintergrund der niedrigen Zinsen und der eigentlich nur noch sehr eingeschränkt vorhandenen Spielräume nach unten Absicherungsinstrumente in den Fokus, welche bei aller angebrachten Skepsis bezüglich weiter sinkenden Zinsen zwar die Chancen des Kapitalmarktes nutzen, aber im Wesentlichen die Risiken steigender Zinsen begrenzen lässt. Leider geht dies tatsächlich nicht ohne Antizipation der Zinsentwicklung, was jedoch der grundsätzlichen und damit im Ergebnis normalen

unternehmerischen Situation entspricht, Entscheidungen unter Unsicherheit treffen zu müssen. In Abhängigkeit der Einschätzung der zukünftigen Entwicklung der Kapitalmarktzinsen kommt daher dem Einsatz von Derivaten zur Absicherung von Zinsrisiken bei langfristigen Finanzierungen eine besondere Bedeutung zu wenn davon ausgegangen wird, dass im Prognosezeitraum mit einem eventuell starken Anstieg der Zinsen gerechnet wird. Zur Frage, wie sich vor dem Hintergrund der aktuellen Kapitalmarktparameter der Einsatz von Derivaten gerade im Mittelstand gestaltet, soll der vorliegende Aufsatz eine Antwort geben und folglich auch als Hilfe bei der Ko

Die Lohnsummenprüfung nach der Reform des Erbschaft- und Schenkungsteuergesetzes Wolfgang Benzel, 2010-10-18 Fachbuch aus dem Jahr 2009 im Fachbereich BWL - Recht, , Veranstaltung: -, Sprache: Deutsch, Abstract: Mit dem Ende Januar 2007 veröffentlichten Beschluss vom 07.11.2006 hat das Bundesverfassungsgericht dem Gesetzgeber die verfassungsrechtlichen Unzulänglichkeiten des Erbschaft- und Schenkungsteuerrechts offen gelegt. Insbesondere die bisherigen Regelungen in Bezug auf die ungleiche Bewertung von Vermögen widersprechen dem Gleichheitsgrundsatz. Die im Beschluss gesetzte Frist, zum 01.01.2009 eine die Kritikpunkte des Verfassungsgerichtes beseitigende Rechtslage zu schaffen, wurde durch die Erbschaftsteuerreform, die nunmehr zum 01. Januar 2009 in Kraft getreten ist, Folge geleistet. Entscheidend und mit Bezug auf das Bundesverfassungsgericht grundsätzlich konsequent umgesetzt ist die Trennung der Bewertungsebene von den Verschonungsregelungen. Während in einem ersten Schritt zunächst eine relative Gleichheit der Bewertung der Vermögenswerte durch Ansatz der Verkehrswerte zu gewährleisten ist, kann erst in einem zweiten Schritt die Anwendung von Verschonungsregeln erfolgen. Dass die verfassungsrechtlichen Bedenken trotz neuer Rechtslage nicht vollständig beseitigt sind, soll an dieser Stelle keiner Betrachtung unterzogen werden. In Bezug auf die erbschaft- und schenkungsteuerliche Behandlung von Betriebsvermögen hat der Gesetzgeber zur Trennung von Bewertungs- und Verschonungsregeln dadurch reagiert, dass er zwei Abschmelzungsmodelle normiert hat, deren wesentlicher Kern die Lohnsummenprüfung darstellt, welche nachfolgend einer kritischen Betrachtung unterzogen wird.

Postmortale Organspende. Ist die Widerspruchslösung ethisch vertretbar? Marion Obrist, 2019-10-22 Studienarbeit aus dem Jahr 2019 im Fachbereich Ethik, Note: 1,3, Proovadis School of International Management and Technology AG, Sprache: Deutsch, Abstract: Die Basis dieser Arbeit bildet eine Literaturrecherche. Um die Frage zu beantworten, ob die Widerspruchslösung bei der Organspende ethisch vertretbar ist, werden diese und die derzeit geltende Zustimmungslösung zunächst beschrieben und danach die ethischen Grundprinzipien und Theorien, die für die Untersuchung herangezogen werden, erläutert. In der darauffolgenden Diskussion wird dann die Widerspruchslösung anhand dieser Konzepte bewertet. In dieser Arbeit wird nur die Widerspruchslösung untersucht, weitere (beispielsweise organisatorische) Möglichkeiten zur Erhöhung der Anzahl der verfügbaren Organe werden nicht beleuchtet. Der gravierende Mangel an Spenderorganen führt unter anderem dazu, dass jedes Jahr fast 1.000 Personen, die sich auf der Warteliste befinden, sterben. Um die Zahl der

Organtransplantationen zu erhöhen wurde im Februar 2019 vom Deutschen Bundestag eine Änderung des Transplantationsgesetzes (TPG), das die Organspende in Deutschland seit 1997 regelt, beschlossen. Diese Änderungen sollen vor allem organisatorische und finanzielle Missstände beheben. So sollen Hindernisse in den Kliniken beseitigt werden: Transplantationsexperten in Krankenhäusern sollen mehr Zeit bekommen und der Prozess der Organentnahme soll besser vergütet werden. Es gibt allerdings auch Anhaltspunkte dafür, dass die Gründe für die niedrigen Spendenzahlen nicht nur in organisatorischen Defiziten des Gesundheitssystems liegen, sondern auch in der gesetzlichen Regelung, die für eine postmortale Organspende eine ausdrückliche Zustimmungserklärung des Spenders bzw. seiner Angehörigen vorsieht. Ein Indiz dafür kann sein, dass nur 36 Prozent der Deutschen über einen Organspendeausweis verfügen, obwohl 84 Prozent dem Thema aufgeschlossen gegenüberstehen würden. Im Vorschlag zur Änderung des TPG hatte Gesundheitsminister Jens Spahn auch eine doppelte Widerspruchsregelung – weder der Spender noch seine Angehörigen lehnen die Organspende ab – vorgesehen, welche allerdings nicht übernommen wurde. Diese Arbeit soll beleuchten, ob diese Alternative zur derzeitigen Regelung aus ethischer Sicht vertretbar wäre.

Introduction to Complex Analysis in Several Variables Volker Scheidemann, 2023-04-26 This book gives a comprehensive introduction to complex analysis in several variables. While it focusses on a number of topics in complex analysis rather than trying to cover as much material as possible, references to other parts of mathematics such as functional analysis or algebras are made to help broaden the view and the understanding of the chosen topics. A major focus are extension phenomena alien to the one-dimensional theory, which are expressed in the famous Hartog's Kugelsatz, the theorem of Cartan-Thullen, and Bochner's theorem. The book aims primarily at students starting to work in the field of complex analysis in several variables and instructors preparing a course. To that end, a lot of examples and supporting exercises are provided throughout the text. This second edition includes hints and suggestions for the solution of the provided exercises, with various degrees of support.

The Assignment of a German Manager to the UK. Using the Example of a Football Manager Stefan Gübert, 2022-02-18 Studienarbeit aus dem Jahr 2021 im Fachbereich Medien / Kommunikation - Interkulturelle Kommunikation, Note: 2,0, ProVadis School of International Management and Technology AG, Sprache: Deutsch, Abstract: The world of work and employment gets more and more international. It is a common case that companies are looking for manpower all around the world to enhance their ability of dealing with internationalisation. In almost every case there is barriers for both employer

and employee to deal with that come from intercultural differences between both the country where the company is based and where the employee is coming from. This seminar paper examines the intercultural differences between the United Kingdom and Germany by the example of the engagement of Jürgen Klopp as a German manager of Liverpool Football Club in the United Kingdom. In order to get a conclusion on how Klopp can be one of the most honored individuals in his subject in just five years' time, it is essential to work out the cultural differences and similarities between both countries at first. Therefore, both British and German business culture get observed before comparing both by reference to the cultural dimensions-model by Geert Hofstede. Also, the respective impact on working situations is elucidated by reference to standard situations. In the last part, the theoretical approach gets exemplified with the leadership style of Jürgen Klopp as a manager in the United Kingdom, having a lot of success and how this is transferable into the management world. For reasons of clarity and comprehensibility and due to the fact, that England is the by far biggest part of the United Kingdom, this paper will go into detail with England most of the time and place less importance on Scotland, Wales and Northern Ireland. Furthermore, there is often talk from "players" which refers to the example of Jürgen Klopp being a football manager. This can also be compared to employees or members of a project team.

Business Valuation of Start-Up Companies. Is Discounted Cash Flow the Best Method to Value a Start-up Company?, 2020-03-10 Seminar paper from the year 2019 in the subject Business economics - Company formation, Business Plans, grade: 1,7, Provdadis School of International Management and Technology AG, course: Finance Management, language: English, abstract: The purpose of this term paper is to study the different methods and criteria of the Business valuation of companies and comparing them and check their applicability to Start-Ups. The difference between the valuation of normal and new companies should be also illustrated. This will be approached with the help of specialist literature, journals and magazines. The practical part will be illustrated by the practical process of choosing the best possible business valuation method of an early fintech Start-Up in Germany. It is important when someone wants to buy something that he knows its value and that he is sure that he has not paid more than its real value. It is relatively easy to know the value of the things we buy in a daily basis by comparing the price to other things or when comparing the current price to the price in the past. However, the situation is quite different when we buy a company with all its departments and knowledge. Here we will have to use some specialized methods to be able to know the value closest to reality and to avoid significant material losses when an evaluation error occurs. Business Valuation is one of the most difficult challenges in business. The reason is that we live nowadays in an extremely changing world. That makes it difficult to measure the valuation of a company and expect their development for the next years. It is also much more difficult and trickier to value a Start-Up company due to the lack of important information about new companies such as corporate governance mechanisms. Therefore, the valuation process of Start-Up Companies looks a little bit different from the valuation of normal companies.
