**Learning from the Slums for the Development of Emerging Cities** Jean-Claude Bolay, Jérôme Chenal, Yves Pedrazzini, 2016-07-29 This book deals with slums as a specific question and a central focus in urban planning. It radically reverses the official version of the history of world cities as narrated during decades: slums are not at the margin of the contemporary process of urbanization; they are an integral part of it. Taking slums as its central focus and regarding them as symptomatic of the ongoing transformations of the city, the book moves to the very heart of the problem in urban planning. The book presents 16 case studies that form the basis for a theory of the slum and a concrete development manual for the slum. The interdisciplinary approach to analysing slums presented in this volume enables researchers to look at social and economic dimensions as well as at the constructive and spatial aspects of slums. Both at the scientific and the pedagogical level, it allows one to recognize the efforts of the slum's residents, key players in the past, and present development of their neighborhoods, and to challenge public and private stakeholders on priorities decided in urban planning, and their mismatches when compared to the findings of experts and the demands of users. Whether one is a planner, an architect, a developer or simply an inhabitant of an emerging city, the presence of slums in one's environment - at the same time central and nonetheless incongruous - makes a person ask questions. Today, it is out of the question to be satisfied with the assumption of the marginality of slums, or of the incongruous nature of their existence. Slums are now fully part of the urban landscape, contributing to the identity and the urbanism of cities and their stakeholders.

**Neoliberal Urban Governance** Carolina Sternberg, 2023-02-03 This book examines the dynamics of neoliberal urban governance through a comparative analysis of Buenos Aires and Chicago, with a special focus on gentrification processes in both cities from 2011 to 2021. This work argues that neoliberal principles, rationales and institutions, along with the elaborate rhetoric that has contributed to their success, are forever present in the US and Latin American region, particularly in global cities like Buenos Aires and Chicago. The year of 2011 marks the (almost) simultaneous election of new executive authorities in each city, and finalizes in 2021—a sufficient time span to observe key patterns, narratives and developments of each neoliberal urban governance. First, this book chronicles the evolving urban neoliberal policies implemented since 2011 in both cities, with special attention to the systematic reduction of affordable housing and privatization of public land that have paved the way for gentrification to advance at a fast pace. Second, it also exposes

readers to the prominent rhetoric crafted by local boards, developers, architects, and real estate agents in both cities. Third, this study chronicles how these contemporary neoliberal urban governances currently operate, a critical aspect that remains vastly unexplored. Lastly, until now these governances have been scantily explored from a comparative perspective in Latin American and North American urban settings, and so this book offers a rich new approach.

**Urban Labyrinths** Pablo Meninato, Gregory Marinic, 2024-03-29 *Urban Labyrinths: Informal Settlements, Architecture, and Social Change in Latin America* examines intervention initiatives in informal settlements in Latin American cities as social, spatial, architectural, and cultural processes. From the mid-20th century to the present, Latin America and other regions in the Global South have experienced a remarkable demographic trend, with millions of people moving from rural areas to cities in search of work, healthcare, and education. Without other options, these migrants have created self-built settlements mostly located on the periphery of large metropolitan areas. While the initial reaction of governments was to eliminate these communities, since the 1990s, several Latin American cities began to advance new urban intervention approaches for improving quality of life. This book examines informal settlement interventions in five Latin American cities: Rio de Janeiro, Medellín, São Paulo, Buenos Aires, and Tijuana. It explores the Favela-Bairro Program in Rio de Janeiro during the 1990s which sought to improve living conditions and infrastructure in favelas. It investigates projects propelled by Social Urbanism in Medellín at the beginning of the 2000s, aimed at revitalizing marginalized areas by creating a public transportation network, constructing civic buildings, and creating public spaces. Furthermore, the book examines the long-term initiatives led by SEHAB in São Paulo, which simultaneously addresses favela upgrading works, water pollution remediation strategies, and environmental stewardship. It discusses current intervention initiatives being developed in informal settlements in Buenos Aires and Tijuana, exploring the urban design strategies that address complex challenges faced by these communities. Taken together, the Latin American architects, planners, landscape architects, researchers, and stakeholders involved in these projects confirm that urbanism, architecture, and landscape design can produce positive urban and social transformations for the most underprivileged. This book will be of interest to students, researchers, and professionals in planning, urbanism, architecture, urban design, landscape architecture, urban geography, public policy, as well as other spatial design disciplines.

**Legal Empowerment in Informal Settlements** Adrian Di Giovanni, Luciana Bercovich, 2025-06-30 This book investigates grassroots, community-led justice strategies – known as legal empowerment – being used to promote the human rights of people living in informal settlements in the Global South. Residents of informal settlements, also known as slums or favelas, encounter a complex array of human rights violations; from systemic discrimination by public officials, to threats to physical security from forced evictions, or arbitrary arrests, to a lack of access to basic services such as housing, water, sanitation, and education. This book shows how grassroots justice organizations around the world are working with residents

to defend their rights and secure more dignified living conditions. Drawing on original empirical research across 10 countries in Africa, Asia, and Latin America, the book demonstrates how legal empowerment can put residents at the centre of holistic approaches to urban development and confront exclusionary and undemocratic systems of governance. The book encompasses practical recommendations and strategies such as rights-based approaches to informality, participation, community mobilization and litigation. Bridging the gaps between the law on the books and the harsh realities of informality on the ground, this book will be an important read for researchers, practitioners, and policymakers, working in realms of social and economic rights, access to justice and urban poverty and development.

**Leveraging the Potential of Argentine Cities** Elisa Muzzini, Beatriz Eraso Puig, Sebastian Anapolsky, Tara Lonnberg, Viviana Mora, 2016-12-16 Argentina's path to economic prosperity is through efficient, sustainable and economically thriving cities. Not only are cities a spatial concentration of people, but also they generate agglomeration economies by concentrating ideas, talent, and knowledge. Argentina is one of the most urbanized countries in Latin America, with 90 percent of Argentine people currently living in cities. Argentina's cities are geographically and economically diverse, and its largest urban area - Metropolitan Buenos Aires - is one of Latin America's urban giants. Argentine cities need to address three main challenges to leverage their economic potential. Argentina's current patterns of urban development are characterized by (a) high primacy and unbalanced regional development, (b) limited global economic footprint of urban economies, with employment concentrated in nontradable and resource intensive sectors, and (c) unplanned low-density urban expansion. Argentine cities thus face the challenges of moving toward a more balanced regional development, transitioning from local to global cities, and from urban sprawl to articulated densities to take full advantage of the benefits of agglomeration economies. To address these challenges, Argentina needs the leadership of the federal government; the coordinating power of provinces; and the capacity of empowered, financially sound municipalities. Argentine cities also need system-wide policy reforms in areas such as territorial planning, municipal finance, housing, urban transport, and local economic development. *Leveraging the Potential of Argentine Cities: A Framework for Policy Action* aims to deepen our empirical understanding of the interplay between urbanization and agglomeration economies in Argentina by asking the following: (a) What are the main trends and spatial patterns of Argentina's urbanization that underlie agglomeration economies?, (b) Are urban policies leveraging or undermining the benefits of agglomeration economies?, and (c) Are Argentine cities fully reaping the benefits of agglomeration economies to deliver improvements in prosperity and livability? By addressing such questions and exploring their implications for action, this study provides a conceptual framework, empirical data, and strategic directions for leveraging the potential of Argentine cities.

The Urban Connection Luuk Boelens, 2009 The urban connection develops a promising actor-relational approach to urban planning. With respect to the usual governmental planning, it is focused outside in, instead of inside out. It derives its

leitmotif from the actual debate about state controlled versus neo-liberal planning and reflects on innovative post structuralist scholars in the field of planning, economics, social geography and governance. It then takes its own position in that debate, reflecting on actor-oriented experiments in planning practices. These experiments deal with the daily planning practice with a pro-active and operational attitude, contrary to the usual retrospective case studies. Therefore it results in concrete suggestions on how to develop a more robust planning-approach in an ongoing globalising and fragmenting world.

Socializing Architecture Teddy Cruz, Fonna Forman, 2023-03-21 With a focus on deepening inequality across this world, this richly illustrated monograph of social practice in architecture shows how to catalyze productive change in the world's border regions. Situated at the intersection of architecture, art, public culture, and political theory, *Socializing Architecture* urges architects and urbanists to intervene in the contested space between public and private interests, to design political and civic processes that mediate top-down and bottom-up urban resources, and to mobilize a new public imagination toward a more just and equitable urbanization. Drawn from decades of lived experience, Teddy Cruz and Fonna Forman engage the San Diego-Tijuana border region as a global laboratory to address the central challenges of urbanization today: deepening social and economic inequality, dramatic migratory shifts, explosive urban informality, climate disruption, the thickening of border walls, and the decline of public thinking. *Socializing Architecture* follows *Spatializing Justice* (Cruz and Forman, 2022). It is organized into two main sections—essays and projects—and continues to build a compelling case for architects and urban designers to do more than design buildings and physical systems. Through analysis and diverse case studies, the authors show architects and urbanists how to alter the exclusionary policies that produce public crisis and instead realize new political and economic strategies that advance a more equitable and convivial architecture.

**Exploring Collaborative Urban Strategies** Marisa Carmona, Marinda Schoonraad, 2004 The opening of the economy to external markets has brought about the re assessment of the significance of large spatial agglomerations and the accentuation of polarization at national scale. The dual movement of centralization and de-concentration processes, inwards and outwards, contributes to urban sprawl beyond the limits of metropolitan areas, as has been demonstrated in Shanghai, Jakarta, Delta Metropolis, Mexico City, Sao Paulo and Santiago. Its consequences for urban structure and urban morphology are immense and complex, and it has fostered social fragmentation of space, changing location opportunities, land uses and centralities. The importance of transport and communication is accentuated, large intra and inter urban connectivity are generated together with the generation of articulated networks, corridors, nodes with impact in land values. New lifestyles, new urban environments and new form of governance emerge and need to be theoretically and empirically underpinned.

The Power of Oral History Philippe Denis, James Worthington, 2002

**Invisible Boundaries** Brian Torrens, 2011 Within Buenos Aires there exists a boundary between the formal, planned

developments of the middle class and the informal, organically-developed self-built housing of the poor. Villa 31, an informal settlement located near the heart of the city, contrasts directly with the skyscrapers of the Argentinean capital's financial and political centre. The tension between the formal and informal cities creates a stigmatization of the residents of Villa 31, essentially barring the possibility of its integration into the city. The boundary between Villa 31 and Buenos Aires exists not only in the physical space between the two, but more importantly in the collective imagination of the city's inhabitants. This is a story of the space between Villa 31 and Buenos Aires. It chronicles the attempts at crossing that boundary and the obstacles encountered. As a means of presenting the work to a broad audience, the story was written as a comic book. The first-person narrative helps to immerse the reader in the story while presenting the full complexity of the problem through a personal account. The story reveals the complex relationship between Villa 31 and Buenos Aires as a means of understanding the invisible boundary between the two. The core of the research consists of two months of field work in Buenos Aires conducted through October and November of 2009. Journal entries, photographs, conversations and first-hand experiences were transformed into a comic book that tells a story of the invisible boundary between Villa 31 and Buenos Aires.

**Report of the Special Rapporteur on the Promotion and Protection of the Right to Freedom of Opinion and Expression, Frank La Rue** Frank La Rue,2010 In this report, Frank La Rue provides detailed summaries of his letters and appeals to government officials in 84 countries regarding instances of alleged violations of freedom of speech, freedom of the press, and other rights. The author also provides summaries of governments' responses, when they exist. The author's communications were sent from 1 January 2009 to 19 March 2010. Governments' replies were received from 16 May 2009 to 14 May 2010. Cases are organized by country.

True Crimes Michael McCaughan,2002 Rodolfo Walsh was a writer of crime novels, a tireless investigative journalist who uncovered real political crimes, an instant historian of a turbulent and violent era in Argentinian and Latin American politics. He was in Cuba in 1960, participating in setting up the first revolutionary press service in Latin America, Prensa Latina, when a coded telex arrived in their offices by mistake. After sleepless nights and with one cryptography manual, Walsh deciphered the plans for the US invasion of Cuba being planned in Guatemala by the CIA. Walsh was active in the Montonero guerrilla in Argentina, co-ordinating information and intelligence work. In that capacity he made public the existence of ESMA, the Naval Mechanics School which was the main military torture centee. In his own name he wrote an Open Letter to the Military Junta, a year from the coup and a day before his death, denouncing the dirty war. He was gunned down in the streets of Buenos Aires by a military death squad. This is an account of Rudolfo Walsh's life. It includes extended excerpts from his varied writings.
