Elias Loomis

Far Beyond the Dead End Saikat Bakshi, 2014-05 They called it the 'mound of dead'. In other words, Mohenjo-Daro! But beneath those layers of ruin, once flourished a town pulsating with life. There lived Koli with her enigmatic charm, Sindhu with an eyeful of dreams, Girad with his raging passion, the decrepit priest prophesying the doom, and many others. They loved, hated and chased their fixations in manic rage. A series of mysterious deaths ensued from such frenetic hunt for lust, riches and glory. Yet, the inexorable game of destruction did not cease to play, until... they ventured Far Beyond the Dead End... only to be discovered under a heap of rubble four thousand years later.

Far Beyond The Moon P. C. M. Vandermeer, 2024-02-02 One glimpse into my mind would drive you to insanity. - Maybe I want to go crazy, all the way! Just for once... The life of Christopher Ennington is in shambles. Volunteering at his local dog shelter is what gets the 38-year-old through the days. Battered by abuse, disease, and that particularly messed-up thing dragged into the shelter, he cannot believe his luck when he crosses paths with a mysterious stranger: Gyth is kind, dreamy, and just as much of an outsider as Christopher. Frankly, it has seemed impossible to ever find love again - but here he is, enamored by brown eyes and a voice like honey. Gyth has never planned on returning to this dimension. But after his crash into it, he is connected to the lonely creature who has saved his life. And so, he decides to stay and masquerades as a 'human' himself. With Christopher to teach him, it's not too difficult - and even fun! Birds of a feather flock together after all. But people in rural Massachusetts do not take kindly to this blossoming relationship. It is only when Christopher learns of Gyth's eldritch nature that this world finally starts to change - and they themselves with it... What lies beneath the flesh must break free: Cosmic horror and body horror entangled in a steamy queer romance - literally! Now available as a revised second edition with a bonus chapter.

Far Beyond the Moon David P. D. Munns, Karin Nickelsen, 2021-06-01 From the beginning of the space age, scientists and engineers have worked on systems to help humans survive for the astounding 28,500 days (78 years) needed to reach another planet. They've imagined and tried to create a little piece of Earth in a bubble travelling through space, inside of which people could live for decades, centuries, or even millennia. Far Beyond the Moon tells the dramatic story of engineering efforts by astronauts and scientists to create artificial habitats for humans in orbiting space stations, as well as on journeys to Mars and beyond. Along the way, David P. D. Munns and Karin Nickelsen explore the often unglamorous but

very real problem posed by long-term life support: How can we recycle biological wastes to create air, water, and even food in meticulously controlled artificial environments? Together, they draw attention to the unsung participants of the space program—the sanitary engineers, nutritionists, plant physiologists, bacteriologists, and algologists who created and tested artificial environments for space based on chemical technologies of life support—as well as the bioregenerative algae systems developed to reuse waste, water, and nutrients, so that we might cope with a space journey of not just a few days, but months, or more likely, years.
