Catherine C. Marshall

Electronic Texts in the Humanities Susan M. Hockey, 2000 With word processing and the Internet, computing is much more part and parcel of the everyday life of the humanities scholar, but computers can do much more than assist with writing or Internet searching. This book introduces a range of tools and techniques for manipulating and analysing electronic texts in the humanities. It shows how electronic texts can be used for the literary analysis, linguistic analysis, authorship attribution, and the preparation and publication of electronic scholarly editions. It assesses the ways in which research in corpus and computational linguistics can feed into better electronic tools for humanities research. The tools and techniques discussed in this book will feed into better Internet tools and pave the way for the electronic scholar of the twenty-first century.

Marcus Furius Camillus Marc Hyden, 2023-09-30 This is the only modern biography of Marcus Furius Camillus currently available in English. Camillus served as a censor, was elected to six consular tribuneships, appointed dictator five times, and enjoyed four triumphs. He toppled mighty Veii, ejected the Senones from Rome following its sacking, and helped orchestrate a grand compromise between the patricians and plebeians. The Romans even considered him Rome's second founder – a proud appellation for any Roman – and revered him for being an exemplar of Roman virtue. Interestingly, he never held the consulship. Plutarch stated that Camillus had avoided it on purpose, and for good reason. The office was often at the heart of controversy, given that patricians dominated it for most of Camillus' life. The appointment of a dictator was an emergency measure taken only in the direst of situations and the fact that Camillus was repeatedly appointed speaks of a period when the young Republic was surrounded by enemies and still fighting for survival. Without Camillus' efforts the city may never have fulfilled its great destiny. Marc Hyden sifts the fragmentary and contradictory sources and, while acknowledging that much legend and exaggeration quickly accrued around Camillus' name, presents the story of this remarkable life as the ancient Romans knew it.

Digital Libraries and the Challenges of Digital Humanities Jeffrey Rydberg-Cox, 2005-11-30 One of the major challenges facing librarians and curators of digital repositories are the innovative 'born digital' documents created by scholars in the humanities. These documents range from the parsed corpora created by linguists to traditional reference information presented in electronic databases, to rich, multi-media hypertexts combining audio, still and moving video and text, and many other sorts of material. Too often, librarians think of electronic resources solely as providing access to subscription

databases. This book encourages librarians to think holistically of the life cycle of electronic resources from new items being created at their institution, to end-user access, to long term preservation of digital resources. - Focuses on role of a digital library in the complete life cycle (creation, access, long term preservation) of digital objects created by scholars in the humanities - Covers recent developments in humanities computing and their implications for digital libraries - Presents accessible technical information about fields such as information retrieval and computational linguistics for a non-technical audience

Arabic, Islām, and the Allāh Lexicon John Andrew Morrow, 2006 The Arabic language possesses a unique language feature, the Allah Lexicon, a rich and varied body of religious expressions invoking the Almighty. Despite the pervasive presence of Allah in the Arabic language, this linguistic phenomenon has been largely unexplored. This book investigates the impact of Islam on the Arabic language by examining key cultural concepts, the frequency of the word God in Arabic and other languages, and the philosophical and theological foundation of Allah expressions.

Legacies of Plague in Literature, Theory and Film Jennifer Cooke, 2009-04-15 This book is an account of the history and continuation of plague as a potent metaphor since the disease ceased to be an epidemic threat in Western Europe, engaging with twentieth-century critiques of fascism, anti-Semitic rhetoric, the Oedipal legacy of psychoanalysis and its reception, and film spectatorship and the zombie genre.

Studies in the Hebrew Bible, Qumran, and the Septuagint Presented to Eugene Ulrich Eugene Ulrich, Peter W. Flint, James C. VanderKam, Emanuel Tov, 2006 With contributions by many of his colleagues and former students, this volume pays homage to Eugene Ulrich, Chief Editor of the Cave 4 Biblical Scrolls and a foremost expert on the Biblical Scrolls, the Canon of the Hebrew Bible/Old Testament, and the Septuagint. In line with Professor Ulrich's areas of scholarship and interest, the almost 30 essays are grouped in three main sections: The Hebrew Bible/Old Testament (including the Biblical Scrolls from the Judaean Desert); Qumran and the Non-Biblical Scrolls from the Judaean Desert; and the Septuagint and Other Ancient Versions. The volume includes a tribute to Eugene Ulrich and ends with a cumulative bibliography and several useful indices.

Electronic Communication and Research in Europe Jack Meadows, Heinz-Dieter Böcker, 1999 Euroscientia Conferences, formerly The European Science and Technology Forum were created in 1994 by the European Commission in order to stimulate reflection and debate on science and technology on a European scale. To this aim, they provide a framework for conferences and studies on subjects related to historical, cultural, ethical, social, but also economic and political aspects of science and technology. The originality of the Euroscientia Conferences, when compared with other initiatives in this field, is to address the questions dealt with specifically within their European dimension: attention is concentrated on the particularity of the situation in the field concerned in Europe in comparison with other parts of the world; the differences between European countries and regions; the aspects related to the process of building Europe; the needs and possibilities of collaboration at European level, etc. Over the years, the European Union has developed its own research policy. Conceived in order to both supplement and support national research efforts, this policy is implemented through large collaborative research programmes co-ordinated within the so-called pluriannual Research and Technological Development Framework Programmes. The basic principles of these programmes are: stimulating the creation of collaborative networks across Europe; supporting joint research projects associating universities, enterprises and research centres from different European countries; and promoting the mobility of researchers and exchanges. The main characteristic of the Fifth Framework Programme (1998-2002) is to focus the European research effort on a limited number of subject matters relating to the large social and economic needs, issues and challenges which the European Union is currently facing: employment and industrial competitiveness; problems related to public health, environment, transport and, in general, the quality of life of European citizens.

Digital Libraries Catherine C. Marshall, 2003 This is the third in a series of IEEE-CS/ACM joint conferences on digital library research and development. The opening paper section in the JCDL 2003 proceedings is on music and digital libraries and runs the gamut from ethnography to algorithms. Other sections of the text tackle the formidable problem of creating

metadata and managing digital resources and services. Humanities digital libraries - collections representing cultural heritage and museum artifacts - stand alongside scientific and business digital libraries.

Architecture of Greece Janina Darling, 2004 From the Acropolis and the Temple of Zeus to the National Library and the University of Athens, this volume examines both the aesthetic design and cultural/social functions of 61 noted architectural landmarks throughout the nation of Greece. Art historian Janina K. Darling discusses how each structure or project was designed and built, and provides a detailed yet accessible description of architectural elements. Darling's entries combine an architectural reading with the larger context of the region's cultural history. An introductory essay, glossary, geographic index, and subject index add to this vastly interesting volume. The *Architecture of Greece* is the first release from Greenwood's Reference Guide to National Architecture series.
