

Consecuencias Del Terremoto De Lisboa 1755

Mark Molesky

Riesgos naturales en Galicia. El encuentro entre naturaleza y sociedad Urbano Fra Paleo,2010-12-28 El primer paso para mitigar el riesgo y adaptarnos a la complejidad de los peligros naturales y del cambio ambiental es ampliar nuestra comprensión del medio, y de las relaciones entre sociedad y naturaleza. Esta obra busca aportar conocimiento científico desde una visión sistémica e integradora del saber generado por distintas disciplinas que estudian los peligros de origen geológico, hidrometeorológico y biológico y los riesgos para la sociedad en Galicia. Este es el fundamento para avanzar en la gobernanza del riesgo.

La percepción del clima y las catástrofes en los epistolarios españoles del siglo XVIII Irene Andreu Candela,2025-01-27 La preocupación social por las calamidades provocadas por acontecimientos naturales de rango extraordinario provocó, sobre todo durante el siglo XVIII, múltiples esfuerzos de observación y reflexión que han desembocado en un importante patrimonio documental que precisa de ser analizado, entre el que se encuentra la correspondencia privada. Tras la consulta de diferentes epistolarios protagonizados por múltiples personajes del Setecientos, la correspondencia de los Borbones españoles conforma el conjunto epistolar principal utilizado en esta investigación. Han sido recopiladas y analizadas más de 6.000 cartas pertenecientes a los borbones españoles, concretamente las cartas que los reyes Isabel de Farnesio y Felipe V intercambiaron con sus hijos y también las que su primogénito, Carlos III, envió a Italia ya como rey de España. La gran cantidad de información climática sobre los Reales Sitios contenida en esta correspondencia familiar nos ha permitido crear dos series climáticas a partir de una doble aplicación metodológica que demuestra la capacidad de estos epistolarios para establecerse como una fuente esencial en la historia del clima.

This Gulf of Fire Mark Molesky,2016-10-18 Winner of the Phi Alpha Theta Best Subsequent Book Award A Los Angeles Times Book Prize Finalist The captivating and definitive account of the Great Lisbon Earthquake--the most consequential natural disaster of modern times. On All Saints' Day 1755, tremors from an earthquake measuring approximately 9.0 or perhaps higher on the magnitude scale swept furiously toward Lisbon, then one of the wealthiest cities in the world and the capital of a vast global empire. Within minutes, much of the city lay in ruins. A half hour later, a giant tsunami unleashed by the quake smashed into Portugal's coastline and barreled up the Tagus River, carrying countless thousands out to sea. To complete Lisbon's destruction, a hellacious firestorm then engulfed the city's shattered remains, killing thousands more and

incinerating much of what the earthquake and tsunami had spared. Drawing on a wealth of new sources, the latest scientific research, and a sophisticated grasp of European history, Mark Molesky gives us the gripping, authoritative account of the Great Lisbon Earthquake disaster and its impact on the Western world—including descriptions of the world's first international relief effort, the rise of a brutal, yet modernizing, dictatorship in Portugal, and the effect of the catastrophe on the spirit and direction of the European Enlightenment.
