**Advancing Online Teaching** Kevin Kelly,Todd D. Zakrajsek,2023-07-03 The goal of teaching online is fundamentally the same as teaching face-to-face: facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that, in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit, and most particularly those whom the research shows have the greatest achievement gaps when taking online courses -- males, first generation and low income students, those from underrepresented minority groups, the academically underprepared, students with disabilities, and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities, such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students, and among students, through group activities or learning communities, which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and, as importantly, a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

**Subject Access to a Multilingual Museum Database** Allison Kupietzky, 2007-10-30 Translating visual works into verbal form is clearly a formidable task. While libraries have a century of cooperative cataloguing behind them, museums and other cultural institutions have tended to go their separate ways, believing the objects in their collections are unique. Dr. Kupietzky has put together a guide for digitizing encyclopedic, multilingual museums that promises to both standardize and streamline the process. Part I provides a review of the literature and of the problems concerning methods used in the computerization of museums. Part II offers practical guidelines for mono- or multilingual museums seeking to implement a database to aid in cataloguing their holdings. A six-step process of computerizing museum collections (the SAGE-K method) was developed to facilitate the application of these ideas by all museums and enable them to achieve the goal of digitization.
