Constellation Myths Eratosthenes, C. Julius Hyginus, 2015 This translation brings together ancient classical texts derived from Eratosthenes' handbook of astral mythology, Hyginus' guide to astronomy, and Aratus's astronomical poem Phaenomena to provide a complete collection of Greek astral myths.

The Poems of Optatian Linda Jones Hall, 2024-01-11 For the first time, the poems and accompanying letters of Publilius Optatianus Porfyrius (Optatian) are published here with a translation and detailed commentary, along with a full introduction to Optatian's work during this period. Optatian was sent into exile by Constantine sometime after the Emperor's ascent to power in Rome in 312 AD. Hoping to receive pardon, Optatian sent a gift of probably twenty design poems to Constantine around the time of the ruler's twentieth anniversary (325/326 AD). To enable the reader to experience the multiple messages of the poems, the Latin text is presented near the English translation with any related design close by. Some poems, laid out on a grid of up to 35 letters across and down, have an interwoven poem marking key letters in the primary poem, thereby revealing a highlighted image. Some designs include the Chi-Rho or numerals created from V's and X's to mark imperial anniversaries. Other (previously unrecognised) designs seem to represent senatorial, imperial, military or bureaucratic motifs or to derive from coin images. Shape poems representing a water organ, an altar and a panpipe reveal their relevance immediately. The introduction and commentary elucidate literary allusions from over 100 authors (lines from Vergil, Ovid, Lucan, Silius Italicus, Statius, and lesser-known writers abound) and mythological references, mostly to the Muses and Apollo. Optatian's prestige as an official in both Greece and Rome is well attested - these poems mark Optatian as a fascinating writer of his time, holding onto the classical past while acknowledging Christian symbolism.

Light of the Mind, Light of the World Spencer Klavan, 2024-10-15 The world is not a machine. Humanity is not a mistake. For centuries, a grim anti-human outlook has taken hold of the public imagination, teaching us all to view ourselves as random products of a cruel and uncaring natural world. Today, from apocalyptic environmentalism to twisted eugenics and dystopian bionic augmentation, movements are rising around the world to dispense with humanity or subordinate it to a pitiless mechanical logic. For many, it has come to seem as if the human spirit is obsolete, religious faith is illusory, and

mankind is destined to be extinguished or surpassed. Some might even see the end of humanity as a good thing. But that is not our future. *Light of the Mind, Light of the World* tells a daring new story about how we got here, and how we can chart a better path forward. Surveying the history of science and faith from the astronomers of Babylon to the quantum physicists of postwar Europe and America, classicist and scholar Spencer A. Klavan argues that science itself is leading us not away from God but back to him, and to the ancient faith that places the human soul at the center of the universe. Reconciling the discoveries of science with the truths of the Bible, Klavan shows how the search for knowledge of the natural world can help illuminate the glories of its Creator, and how the latest developments in physics can help shatter the illusion of materialism.

Poussin's Women Troy Thomas, 2025-10-01 *Poussin's Women: Sex and Gender in the Artist's Works* examines the paintings and drawings of the well-known seventeenth-century French painter Nicolas Poussin (1594-1665) from a gender studies perspective, focusing on a critical analysis of his representations of women. The book's thematic chapters investigate Poussin's women in their roles as predators, as lustful or the objects of lust, as lovers, killers, victims, heroines, or models of virtue. Poussin's paintings reflect issues of gender within his social situation as he consciously or unconsciously articulated its conflicts and assumptions. A gender studies approach brings to light new critical insights that illuminate how the artist represented women, both positively and negatively, within the framework in his seventeenth-century culture. This book covers the artist's works from Classical mythology, Roman history, Tasso, and the Bible. It serves as a good overview of Poussin as an artist, discussing the latest research and including new interpretations of his major works.

The Globe James Hannam, 2023-08-12 *A New Scientist Best Book of 2023* From Babylon to Columbus and beyond, a journey across millennia and—yes—the globe exploring how we came to understand our spherical planet. *The Globe* tells the story of humanity's quest to discover the form of the world: that the Earth is round and not flat. Philosophers in ancient Greece deduced the true shape of the Earth in the fourth century BCE; the Romans passed the knowledge to India, from where it spread to Baghdad and Central Asia. In early medieval Europe, Christians debated the matter, but long before the time of Columbus, the Catholic Church had accepted that Earth is a ball. However, it wasn't until the seventeenth century that Jesuit missionaries finally convinced the Chinese that their traditional square-earth cosmology was mistaken. An accessible challenge to long-established beliefs about the history of ideas, *The Globe* shows how the realization that our planet is a sphere deserves to be considered the first great scientific achievement.

Star Myths of the Greeks and Romans Eratosthenes, 1997-01-01 The nightly appearance of the stars, their arrangement in the sky, their regular risings and settings through the course of the year, have been a source of endless wonder and speculation. But where did the constellations come from and what are the myths associated with them? *Star Myths of the Greeks and Romans* is the most comprehensive work ever published on the forty-eight classical constellations.

Included in this handbook are the only surviving works on the constellation myths that have come down to us from antiquity: an epitome of The Constellations of Eratosthenes--never before translated into English -- and The Poetic Astronomy of Hyginus. Also provided are accurate and detailed commentaries on each constellation myth, and complete references for those who wish to dig deeper. This book is a comprehensive sourcework for anyone interested in astronomy or mythology -- and an ideal resource for the occasional stargazer.

Islamicate Celestial Globes, Their History, Construction, and Use Emilie Savage-Smith,1985 Photographs of selected Islamicate globes from the thirteenth to the nineteenth centuries, as well as line drawings based on written descriptions, accompany the historical and analytical discussion. The fourth chapter on iconography analyses the constellation figures on the Smithsonian globe from the perspective of an art historian. This chapter was contributed by Andrea P.A. Belloli. The second major part of the study presents a discussion of the star names engraved on the Mughal globe, tracing the origins of the term in Greek mythology or early Bedouin constellation outlines. The discussion of each constellation is accompanied by a photograph of the constellation as depicted on the Smithsonian globe. An account of lunar mansions is included as background to early Bedouin asterisms, which greatly affected later Islamicate star names and eventually modern western star names.

Literature, Art, History A. F. Basson,William J. Dominik,2003 In this volume thirty new studies have been specially commissioned from scholars in seven countries to treat key texts and cultural phenomena from the Homeric age to the medieval period. A wide variety of critical approaches are employed to challenge orthodoxies and to present fresh perspectives on the literature, art and history of classical antiquity, late antiquity and the middle ages. Attractive features of

the volume include the treatment of newly emerging areas of inquiry in addition to canonical texts and the representation of views of established international scholars at the forefront of the discipline. A recurrent motif of the volume emerges in the interpretive benefits of combining philological acumen with theoretical and intertextual considerations. This accessible and provocative book will be of interest to classicists, historians, art historians, students of comparative literature, and anyone concerned with the immense cultural legacy of classical Mediterranean civilisation. Greek and Latin quotations are accompanied by translations throughout.
