Manual of Definitive Surgical Trauma Care, Fifth Edition Kenneth David Boffard, 2019-05-22 Developed for the International Association for Trauma Surgery and Intensive Care (IATSIC), the Manual of Definitive Surgical Trauma Care 5e is ideal for training all surgeons who encounter major surgical trauma on an infrequent basis. This new edition includes both an e-version, and also a microSD card containing over 20 operative videos. The increasing role of non-operative management (NOM) has been recognised, and the Military Module is substantially updated to reflect recent conflict experience. An expanded section highlights trauma management under austere conditions. Written by faculty who teach the DSTC Course, this definitive and well established book focuses on life-saving surgical techniques to use in challenging and unfamiliar incidents of trauma.

Manual of Definitive Surgical Trauma Care Kenneth D Boffard, Jonathan White, 2024-06-07 Developed for the International Association for Trauma Surgery and Intensive Care (IATSIC), the Manual of Definitive Surgical Trauma Care 6e is ideal for training all surgeons and anaesthetists who manage trauma on an infrequent basis. The Manual is updated every 4 years and reflects the most recent developments in patient management based on new evidence-based information. Its focus is on the importance of the multidisciplinary care of the trauma surgical patient. This sixth edition has evolved, and the all-important section on the Non-Technical Skills which are required has been expanded. A significant number of the original guidelines in trauma have been archived, as they are no longer pertinent or have been superseded. The increasing (and occasionally harmful) role of non-operative management (NOM) has been recognized. The 'Military Environments' and 'Austere Environments' chapters have been substantially revised to reflect current multinational combat experience, and broadened to reflect modern asymmetrical conflicts and the increased need for humanitarian intervention including military peacekeeping in which only one side wears a uniform. Military weapons are used in major cities against the civilian population. More recently, urban, non-military populations have been the targets and victims of heavy military combat including use of ultra-sophisticated weaponry. Each situation carries its own spectrum of injury and responsibility of care. Including website access to a selection of videos which provide an anatomic overview of surgical approaches, this resource provides a gold standard educational and training resource to help prepare the relatively fully trained surgeon to manage the difficult injuries that might present to a major trauma centre.

Visualizing Health Care Statistics: A Data-Mining Approach Zada T. Wicker, Dr. J. Burton Browning, 2020-09-25

Visualizing Health Care Statistics: A Data-Mining Approach is an introductory statistics text that demonstrates how to visualize health care statistics using Microsoft Excel and R-Project (open source statistical software) and hands-on examples using real-world data. In each chapter, students are encouraged to apply statistical knowledge to real-world health care situations. Through this approach, students develop data gathering and analysis skills all while preparing for the national Registered Health Information Technician (RHIT) exam.

Campus Diversity John M. Carey, Katherine Clayton, Yusaku Horiuchi, 2019-12-19 Media, politicians, and the courts portray college campuses as divided over diversity and affirmative action. But what do students and faculty really think? This book uses a novel technique to elicit honest opinions from students and faculty and measure preferences for diversity in undergraduate admissions and faculty recruitment at seven major universities, breaking out attitudes by participants' race, ethnicity, gender, socio-economic status, and political partisanship. Scholarly excellence is a top priority everywhere, but the authors show that when students consider individual candidates, they favor members of all traditionally underrepresented groups - by race, ethnicity, gender, and socio-economic background. Moreover, there is little evidence of polarization in the attitudes of different student groups. The book reveals that campus communities are less deeply divided than they are often portrayed to be; although affirmative action remains controversial in the abstract, there is broad support for prioritizing diversity in practice.

The Concertation Impulse in World Politics Andrew F. Cooper, 2023-11-30 This book unravels the centrality of contestation over international institutions under the shadow of crisis. Breaking with the widely accepted image in the mainstream, US-centric literature of an advance of global governance supported by pillars of institutionalized formality, Andrew Cooper points to the retention of a habitual impulse towards concertation related to informal institutionalism. Rather than endorsing the view that world politics is moving inexorably towards a multilateral, rules-based order, he places the onus on the resilience of a hierarchical self-selected concert model that combines a stigmatized legacy with the ability to reproduce in an array of associational formats. Relying for conceptual guidance on the recovery of a valuable component in the intellectual contribution of Hedley Bull, a compelling case is made that concertation represents a fundamental institution as a peer competitor to multilateralism. In effect, the debate over institutional design is recast away from an emphasis on utilitarian maximization towards a wider set of cardinal - and highly contested - questions: the nature of rules at the global level, the salience of institutional clubs, and the meaning and impact of (in)equality and cooperation/coordination among states across the incumbent West/non-incumbent Global South divide.

Corporate Strategy and Sustainability Peter N. Nemetz, 2024-12-31 Corporate Strategy and Sustainability is a substantially updated, detailed overview of sustainability issues for business and economics students. Built to teach the

evolution of the history of sustainability practices, this edition has expanded coverage of social sustainability issues, non-Western perspectives and sustainable supply chains. Rich in cases, these too have been updated to demonstrate best practice and the practical application of theory. Extensive discussions of tools show how incorporate sustainability issues apply to strategic decision making. The book accentuates the value and importance of a strong sustainability approach in an age of climate change emergency. This textbook is an ideal companion to instructors and students of sustainability in business, economics and management.
