Everybody Knows Jordan Harper, 2023-01-10 In this “dazzling” (New York Times Book Review) mystery from an Edgar Award winning author, a fearless black-bag publicist exposes the belly of the L.A. beast. A New York Times Best Crime Book of the Year • A NYTBR Editors' Choice Selection • An Anthony Award Nominee • A Barry Award Nominee • An ABA January 2023 Indie Next List Pick • Recommended by New York Times Book Review • NPR/Fresh Air • Wall Street Journal • Washington Post • LA Times • CrimeReads • The Boston Globe • South Florida Sun Sentinel • Alta Online • Lit Hub • Kirkus Reviews • Publishers Weekly • NBC/TODAY and many more! Welcome to Mae Pruett’s Los Angeles, where “Nobody talks. But everybody whispers.” As a “black-bag” publicist tasked not with letting the good news out but keeping the bad news in, Mae works for one of LA’s most powerful and sought-after crisis PR firms, at the center of a sprawling web of lawyers, PR flaks, and private security firms she calls “The Beast.” They protect the rich and powerful and depraved by any means necessary. After her boss is gunned down in front of the Beverly Hills Hotel in a random attack, Mae takes it upon herself to investigate and runs headfirst into The Beast’s lawless machinations and the twisted systems it exists to perpetuate. It takes her on a roving neon joyride through a Los Angeles full of influencers pumped full of pills and fillers; sprawling mansions footsteps away from sprawling homeless encampments; crooked cops and mysterious wrecking crews in the middle of the night. Edgar Award-winner Jordan Harper’s *Everybody Knows* is addicting and alarming, a “juggernaut of a novel” and “an absolute tour de force.” It is what the crime novel can achieve in the modern age: portray the human lives at the center of vast American landscapes, and make us thrill at their attempts to face impossible odds. The book everybody's been waiting for —Michael Connelly An absolute tour de force—S. A. Cosby The best mystery novel I've read in years —James Patterson

I'm Not Your Manic Pixie Dream Girl Gretchen McNeil, 2016-10-18 From acclaimed author Gretchen McNeil comes her first realistic contemporary romance—perfect for fans of Kody Keplinger’s *The Duff* and Morgan Matson’s *Since You've Been Gone*. Beatrice Maria Estrella Giovannini has life all figured out. She's starting senior year at the top of her class, she's a shoo-in for a scholarship to M.I.T., and she's got a new boyfriend she's crazy about. The only problem: All through high school Bea and her best friends Spencer and Gabe have been the targets of horrific bullying. So Bea uses her math skills to come up with *The Formula*, a 100% mathematically guaranteed path to social happiness in high school. Now Gabe is on his

way to becoming Student Body President, and Spencer is finally getting his art noticed. But when her boyfriend Jesse dumps her for Toile, the quirky new girl at school, Bea realizes it's time to use The Formula for herself. She'll be reinvented as the eccentric and lovable Trixie—a quintessential manic pixie dream girl—in order to win Jesse back and beat new-girl Toile at her own game. Unfortunately, being a manic pixie dream girl isn't all it's cracked up to be, and “Trixie” is causing unexpected consequences for her friends. As The Formula begins to break down, can Bea find a way to reclaim her true identity and fix everything she's messed up? Or will the casualties of her manic pixie experiment go far deeper than she could possibly imagine?

The Dilemma of Coalition Instability in Consensual Nonmonogamy James K. Beggan, 2020-11-18 Different forms of consensual nonmonogamy, such as polyamory and swinging, have achieved greater prominence in daily conversation and representation in mass media. Although advocates recognize that the presence of additional people creates difficulties, the author argues that this greater complexity may lead to unavoidable instability. Drawing from classic work by Georg Simmel as well as modern research in the social sciences, James K. Beggan considers how the presence of a third person is what allows the formation of coalitions which then become part of the process that can break apart the triad. This paradox—explained with reference to game theory and social interdependence—represents the existential threat to the quest for consensual nonmonogamy. Beggan describes how psychological processes involving social comparison and gender and sexual orientation can limit the formation of certain types of coalitions which, in turn, influence which relationships can be expected to emerge in the context of consensual nonmonogamy. His analysis includes macro-level social issues related to establishing consensual nonmonogamy as a valid social identity and alternative to conventional marriage. Using insights from game theory, he suggests possible meta-solutions to coalition conflicts that emerge in triadic romantic and sexual relationships.

Status: em muitos relacionamentos complicados Matteson Perry, 2017-03-08 Plano: 1. Ficar solteiro por um ano. 2. Conhecer várias mulheres. 3. Ninguém sair ferido. Após a sua última namorada terminar o namoro abruptamente, Matteson se vê em um estado crítico, devastador, deprimente. Ele sempre foi o tipo tímido, que não tinha jeito com as garotas, e que só namorou na universidade por uma grande coincidência. Até os trinta, foram sete relacionamentos, e o último o deixou de cabeça para baixo. E então ele cria um plano. E para isso Matteson precisará mudar completamente sua personalidade e atitudes. Para alguém que praticamente nunca tomou uma decisão no campo amoroso, será difícil escolher os lugares certos, deixar que os amigos lhe apresentem alguém, se cadastrar em sites na internet... mas durante um ano, Matteson conhecerá quase trinta garotas, incluindo uma turista sueca, uma groupie, uma atriz, uma lésbica e outras tão diferentes umas das outras. Mas a grande decisão é saber o que ele fará com o seu coração. Um livro divertido e ousado, baseado nas próprias experiências do autor, e que dá boas-vindas aos novos tempos, onde relações parecem ser fáceis e acessíveis. Só que não!
