Digital Modernism Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11
The book investigates the theme of Modernism (1920-1960 and its epigones) as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify, document and preserve the memory of the past and the value of the future. Including several chapters, it contains research results relating to cultural heritage, more specifically Modernism, and current digital technologies. This makes it possible to record and evaluate the changes that both undergo: the first one, from a material point of view, the second one from the research point of view, which integrates the traditional approach with an innovative one. The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth, moving through different fields of cultural heritage: from different forms of art to architecture, from design to engineering, from literature to history, representation and restoration. The book appeals to scholars and professionals who are involved in the process of understanding, reading and comprehension the transformation that the places have undergone within the period under examination. It will certainly foster the international exchange of knowledge that characterized Modernism

Greek Art and Aesthetics in the Fourth Century B.C. William A. P. Childs, 2018-04-10 Greek Art and Aesthetics in the Fourth Century B.C. analyzes the broad character of art produced during this period, providing in-depth analysis of and commentary on many of its most notable examples of sculpture and painting. Taking into consideration developments in style and subject matter, and elucidating political, religious, and intellectual context, William A. P. Childs argues that Greek art in this era was a natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century. As Childs shows, in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion. Delving into formal and iconographic developments in sculpture and painting, Childs examines how the sensitive, expressive quality of these works seamlessly links the classical and Hellenistic periods, with no appreciable rupture in the continuous exploration of the human condition. Another

overarching theme concerns the nature of “style as a concept of expression,” an issue that becomes more important given the increasingly multiple styles and functions of fourth-century Greek art. Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world.

The Mediterranean in History David Abulafia, 2003 Contained in this history of the Great Sea are the stories of the birth of Western Civilization, the clash of warring faiths, and the rivalries of empires. David Abulafia leads a team of eight distinguished historians in an exploration of the great facts, themes and epochs of this region's history: the physical setting; the rivalry between Carthaginians, Greeks, and Etruscans for control of the sea routes; unification under Rome and the subsequent break up into Western Christendom, Byzantium, and Islam; the Crusades; commerce in medieval times; the Ottoman resurgence; the rivalry of European powers from the eighteenth to the twentieth centuries; and the globalization of the region in the last century. The book departs from the traditional view of Mediterranean history, which placed emphasis on the overwhelming influences of physical geography on the molding of the region's civilizations. Instead, this new interpretation regards that physical context as a staging ground for decisive action, and at center stage are human catalysts at all levels of society—whether great kings and emperors, the sailors of medieval Amalfi, or the Sephardic Jews who were expelled from Spain in 1492. The authors do more than simply catalogue the societies that developed in the region, but also describe how these groups interacted with one another across the sea, enjoying commercial and political ties as well as sharing ideas and religious beliefs. This richly illustrated book offers contemporary historical writing at its best and is sure to engage specialists, students, and general readers alike.
