Shannon Slaton

Mixing a Musical Shannon Slaton, 2018-07-04 *Mixing a Musical: Broadway Theatrical Sound Techniques, Second Edition* pulls the curtain back on one of the least understood careers in live theatre: the role and responsibilities of the sound technician. This comprehensive book encompasses every position from shop crew labor to assistant designer to sound board operator and everything in between. Written in a clear and easy to read style, and illustrated with real-world examples of personal experience and professional interviews, Slaton shows you how to mix live theatre shows from the basics of equipment and set ups, using sound levels to creating atmosphere, emotion and tension to ensure a first rate performance every time. This new edition gives special attention to mixing techniques and practices. And, special features of the book include interviews with some of today's most successful mixers and designers.

She Loves Me Not Howard Lindsay, 1935

Integrative Psychotherapy in Action Richard G. Erskine, 2018-05-08 What is integrative psychotherapy? How effective is the integrative approach to therapy? And what are its limitations? Answering these and other significant questions, this insightful volume provides the working clinician with a practical guide to using an integrative approach to psychotherapy. Erskine and Moursund, both experienced psychotherapists, begin their discussion with a masterful theoretical overview which integrates diverse concepts from various therapy techniques such as psychoanalysis, client-centred therapy, and Gestalt therapy. The authors then use transcripts of actual therapeutic sessions (with explanatory comments interjected) to provide the reader with a broader understanding of both theory and its application in therapy - and to capture some of the elusive essence of the ongoing therapy interview. Unique in its attention to detail, as well as to the therapist's own decision-making process, advanced students and therapists alike will find this volume an invaluable resource.

Affect Imagery Consciousness Silvan S. Tomkins, PhD, 2008-02-15 ...brilliant...--Malcolm Gladwell, Author of *Blink* The writings for which this essay is offered as a Prologue consumed him from the mid-1950s through the end of his life in 1991. Knowing it was his lifework, Tomkins conflated life and work, reifying the superstition that its completion would equal death and refusing to release for publication long-completed material. He knew the risks associated with this obsessive, neurotic behavior, and the results were as bad as predicted. The first two volumes of *Affect Imagery Consciousness* (AIC) were released in 1962 and 1963, Volume III in 1991 shortly before he succumbed to a particularly virulent strain of small cell lymphoma, and Volume IV a year after his death. This last book contains Tomkins's understanding of neocortical cognition, ideas that are even now exciting, but until this current publication of his work as a single supervolume,

almost nobody has read it. The bulk of his audience had died along with the enthusiasm generated by his ideas. Big science is now more a matter of big machines and unifocal discoveries as the basis for pars pro toto reasoning than big ideas based on the assembly and analysis of all that is known. Tomkins ignored nothing from any science past or present that might lead him toward a more certain understanding of the mind. Every idea, every theory deserved attention if only because significant observations can loiter in blind alleys.--From the Prologue by Donald L. Nathanson, MD Volume 1 of Springer's magisterial new two-volume edition of Tomkins's magnum opus comprises *The Positive Affects* and *The Negative Affects*.
