*The Turtle and the Stars* Arthur R. Upgren,Arthur Upgren,2003-05 "An approachable potpourri, Upgren's essays will delight and inform astronomy buffs, whether students or recreational readers." —Booklist Why is a clear sky brighter near the horizon while a cloudy one is at its lightest overhead? What color is the atmosphere of Mars, and might it someday appear as blue as ours? How is it that the Milky Way casts shadows? Why does the Taj Mahal glimmer when you gaze up at it? In *The Turtle and the Stars*, astronomer Arthur Upgren guides us through the physical phenomena that produce our sky and galaxy in all their variety and moods. He invites us to contemplate the natural beauty of the universe: a leatherback turtle depositing her eggs under a sky lit only by Venus, a total solar eclipse in Venezuela, the play of the spectrum on the cathedral at Chartres. Sprinkled with references to history, literature, film, and music, *The Turtle and the Stars* is a treasure trove of information for armchair astronomers and naturalists alike.

**George Lucas** Jim Smith,2003 The step-by-step companion to the work of George Lucas. George Lucas has directed only five full-length pictures in thirty years, and yet he is one of the most influential of all contemporary filmmakers: not simply a director, he's also a writer, a producer and an unparalleled technical pioneer, responsible for advances in digital projection, CGI and quality cinema sound. Yet he remains defiantly outside the Hollywood system, financing his - and other people's - pictures out of his own funds, creatively answerable to no one but himself.Starting with his time as a film student, this is a critical journey through the films Lucas has directed and actively produced. It encompasses his abstract early works such as *Look at Life* and *6.18.67*, the mainstream successes of *American Graffiti*, *Star Wars* and *Indiana Jones* and the record selling *Star Wars* prequel trilogy. There is also an extensive section detailing other projects in which he has had a hand, such as Paul Schraeder's *Mishima*, Haskell Wexler's controversial *Latino* and Francis Ford Coppola's *Tucker: The Man and His Dream*. This is an indispensable reference to the work of George Lucas- the mogul, the mythmaker, the one man brand and the most successful independent filmmaker who has ever lived.

**Stars in Our Eyes** Angela Ndalians, Charlotte Henry, 2002-03-30 The media star has become a powerful, almost unparalleled, cultural sign, even as the star system has undergone radical transformation since the era of the Hollywood studio system. Today's film industry continues to market and promote its products through actors in ways that seek to capture the often elusive quality that a star can embody. Using contemporary stars such as Robert De Niro, Keanu Reeves, Arnold Schwarzenegger, and Dennis Hopper, this anthology of essays applies a variety of theoretical tools in its attempt to understand how we interpret stars, and how we can begin to understand their cultural significance. Likewise, the study explores how the star system has become an increasingly complex phenomenon within society at large, extending its impact beyond the cinema into music, sports, and fashion. Many of the essays collected here consider this shift and examine how personae including the director (Sam Peckinpah), the royalty (Princess Diana) and even the digital star (Lara Croft) have captured the cultural imagination and have come to attain qualities as star-like as those of the silver screen.
