Psychopathology Among Youth in the 21st Century: Examining Influences from Culture, Society and Technology Takahiro A. Kato, Alan Robert Teo, Paul W. C. Wong, 2021-03-23

Understanding Female Offenders Jason M. Smith, Carl B. Gacono, Ted B. Cunliffe, 2021-03-16 According to the Sentencing Project, between 1980 and 2017, the number of incarcerated women increased by more than 750%, rising from a total of 26,378 in 1980 to 225,060 in 2017 and the number continues to rise. Dealing with incarcerated women and specifically psychopathic women can be challenging. Understanding Female Offenders: Psychopathy, Criminal Behavior, Assessment, and Treatment provides readers with a better conceptualization of the psychopathic/non-psychopathic female. This includes better ways of interviewing, assessing, and treating these women, and clinical caveats with case examples to assist with clinical applications. This is the only comprehensive resource that provides specific knowledge about female offenders, particularly on female psychopathy and assessment. - Describes the differences between ASPD and psychopathic women and men - Presents PCL-R, Rorschach, and PAI data on female offenders, female psychopaths, and female sex offenders - Reviews the current literature on female psychopathy studies - Provides in-depth female offender case studies - Discusses common biases in diagnosing, treating, and assessing in forensic settings with female offenders

Key Thinkers in Individual Differences Alex Forsythe, 2019-05-28 Key Thinkers in Individual Differences introduces the life, work and thought of 25 of the most influential figures who have shaped and developed the measurement of intelligence and personality. Expanding on from a résumé of academic events, this book makes sense of these psychologists by bringing together not only their ideas but the social experiences, loves and losses that moulded them. By adapting a chronological approach, Forsythe presents the history and context behind these thinkers, ranging from the buffoonery and sheer genius of Charles Galton, the theatre of Hans Eysenck and John Phillip Rushton, to the much-maligned and overlooked work of women such as Isabel Myers, Katherine Briggs and Karen Horney. Exploring all through a phenomenological lens, the background, interconnections, controversies and conversations of these thinkers are uncovered. This informative guide is essential reading to anyone who studies, works in or is simply captivated by the field of individual differences, personality and intelligence. An invaluable resource for all students of individual differences and the history of psychology.

Legal Insanity and the Brain Sofia Moratti, Dennis Patterson, 2016-10-20 This landmark publication offers a unique comparative and interdisciplinary study of criminal insanity and neuroscience. Criminal law theories and ideologies which underpin the regulation of criminal insanity have always been the subject of controversy. The history of criminal insanity is characterised by conceptual and empirical tension between two disciplinary realms: the law and the mind sciences. The authors in this anthology explore in depth the state of the art of legal insanity and the numerous intricate, fascinating, pioneering and sophisticated questions raised by the integration of different criminal law and behaviour theories, diverse disciplines and methodologies, in a genuinely interdisciplinary perspective. This volume will serve as a practical guide for the comparative legal scholar and the judge, as well as stimulating scholarly reading for the neuroscientist, the social scientist and the philosopher with interdisciplinary scientific interests.

New Psychological Tests and Testing Research Lydia S. Boyar, 2007 Psychological testing has grown exponentially as technological advances have permitted it to and societal complexities have necessitated its growth. Psychological testing or

psychological assessment is a field characterised by the use of samples of behaviour in order to infer generalisations about a given individual. By samples of behaviour, one means observations over time of an individual performing tasks that have usually been prescribed beforehand. These responses are often compiled into statistical tables that allow the evaluator to compare the behaviour of the individual being tested to the responses of a norm group. The broad categories of psychological evaluation tests include: Norm-referenced, IQ/achievement tests, Neuropsychological tests, Personality tests, Objective tests (Rating scale), Direct observation tests, Psychological evaluations using data mining. New and important research is presented in this book.

Rorschach's Test Samuel J. Beck, 1967

The Rorschach Martin Leichtman, 2013-05-13 Martin Leichtman's *The Rorschach* is a work of stunning originality that takes as its point of departure a circumstance that has long confounded Rorschach examiners. Attempts to use the Rorschach with young children yield results that are inconsistent if not comical. What, after all, does one make of a protocol when the child treats a card like a frisbee or confidently detects piadigats and red foombas? A far more consequential problem facing examiners of adults and children alike concerns the very nature of the Rorschach test. Despite voluminous literature establishing the personality correlates of particular Rorschach scores, neither Hermann Rorschach nor his intellectual descendants have provided an adequate explanation of precisely what the subject is being asked to do. Is the Rorschach a test of imagination? Of perception? Of projection? In point of fact, Leichtman argues, the two problems are intimately related. To appreciate the stages through which children gradually master the Rorschach in its standard form is to discover the nature of the test itself. Integrating his developmental analysis with an illuminating discussion of the extensive literature on test administration, scoring, and interpretation, Leichtman arrives at a new understanding of the Rorschach as a test of representation and creativity. This finding, in turn, leads to an intriguing reconceptualization of all projective tests that clarifies their relationships to more objective measures of ability.

Assessment in Counseling Albert Bullard Hood, Richard W. Johnson, 2007 This best-selling handbook examines the basic principles of psychological assessment and the tests most widely used by counselors. Hood and Johnson explain how to choose and administer testing instruments, conduct assessments, and interpret and communicate test results. More than 100 instruments--used with diverse populations in schools, university counseling centers, government, mental health clinics, and private practice--to assess intelligence, academic aptitude, career development, personal values, interpersonal relationships, mental health, and counseling outcomes are described. This edition contains information on the latest editions of existing instruments, including revised versions of the Stanford-Binet test, the Strong Interest Inventory, the Work Values Inventory, the California Psychological Inventory, and the SAT, as well as changes in school achievement tests required by the No Child Left Behind Act. New tests such as the Kuder Skills Assessment, Expanded Skills Confidence Inventory, Career Futures Inventory, the Schwartz Value Survey, and the Restructured Clinical Scales of the MMPI-2 are also highlighted. Clear and concise, *Assessment in Counseling* provides an excellent framework for assessment courses and is a handy reference for practitioners--
