Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects' Data is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations, and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/ imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition, and represents a major new edition for an international, English speaking readership. Reviews of the Previous Edition: Neufert's Architects' Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. —Cesar Pelli With this thorough rewrite Neufert has produced yet again an invaluable reference book. —The Architects' Journal

Coaching Youth Volleyball Coach Education, 2007-06-08 Whether you're new to coaching or an experienced youth volleyball coach, the fourth edition of Coaching Youth Volleyball is your handbook for a successful season. Court-tested, age-

specific coaching information helps you • teach volleyball fundamentals using a combination of drills and activities that simulate game situations; • communicate with players, officials, parents, and other coaches; • provide basic first aid, • plan and conduct practices, • manage your team during games, and • most important—keep it all fun. Recommended by and written with the expertise of USA Volleyball's Coaching Education Department, this new edition adds two new chapters on coaching individual volleyball skills and coaching transition and alignment. You'll learn important age-group modifications regarding ball size, net height, player positions, and court dimensions for three age groups (6- to 9-year-olds, 10- to 11-year-olds, and 12- to 14-year-olds) and for team play in 2v2, 3v3, 4v4, and 6v6 competition. Quickly and accurately construct your own age-appropriate court with the help of court diagrams included in the book. Plus, gain a clear understanding of rules and procedures, including the capabilities and limits of the new libero position. Coaching Youth Volleyball helps you focus on the fundamentals, while 18 drills and 32 coaching tips are sure to jump-start your practices. Experience the excitement as your players improve their skills, fall in love with the game, and come out for the team year after year.

School Grounds Great Britain. Department for Education and Employment. Architects & Building Branch, 1997 Limited financial resources and increasing pressures of competing claims on school outdoor grounds have created the need for greater quality enhancement of these areas to ensure they are used efficiently. This document addresses the issues and principles affecting school grounds, provides an analysis of the benefits of using and developing these areas, and outlines the processes necessary for successful school ground management as advocated by Learning through Landscapes. Chapters examine why ground surveying is important; how the National Curriculum provides a framework for the need to teach in the outdoor classroom; and why schools should develop a clear justification for their management of breaks and lunch times, as well as the special nature of this experience and its connection with student behavior. Additionally explored are recent research on the hidden curriculum and how school ground design influences behavior, different options and their contractual arrangements for school ground maintenance, and resources for planning grounds changes. It discusses the importance of the process of developing school grounds and of student involvement. Concluding sections offer reference material that includes information for school site and zone development, sports facilities, maintenance scheduling, key staff responsibilities, and a list of informational sources. Contains an index. (GR)
