Representation of Disability in Children's Video Games Krystina Madej,2024-01-10 Representation of Disability in Children's Video Games looks at how children's engagement with characters and stories in video games helps create the perception of disability they have as teens and adults. Drawing on child development theory supported by neuroscience, the book shows how the scaffold of information, the schema, adults have of disability is first created at a very young age as they interact through play with characters with disabilities in narrative video games. Positing that early video game play experiences should provide exposure to narrative schemas that add understanding and help create meaning about the disability represented, the book presents how such representation in children's video games maps against cognitive development and the psychomotor and cognitive needs and abilities of children 3-12. Through close readings of over 40 PEGI 3 and PEGI 7 (ESRB E, 10+) games and analysis of games as diverse as Backyard Baseball and Sly Cooper, the author defines broad categories of representation: representation as cosmetic, providing exposure but not game play utility; as incidental, used as a device that provides purpose for the narrative; or as more authentically representing the disability as integral to the character and their life. The book provides readers with an overview of contemporary games that betters their understanding of how children's games present disability and how children create their perceptions through interaction with characters and stories. This book will be of interest to academics and students of game studies in topics such as behavioural science, ethics, and HCI, as well as in sociology, communications, and digital media. It is pertinent in particular to game developers and to educators, disability advocates, parents, and policy makers.

Don't Forget About the Adjuncts! Antione D. Tomlin,2023-03-01 Don't Forget About the Adjuncts! is a work that creates space for adjuncts to share their experiences navigating workspaces within higher education and their experiences as part-time faculty. The primary goal of this book is to allow adjuncts to share their experiences navigating workspaces as frequently undervalues faculty in higher education. While frequently, adjunct faculty can feel unheard within higher education institutions, this book offers a platform for adjunct voices to be heard loud and clear. Contributing authors share the advantages and challenges they experience as adjuncts and the impact these experiences have on their well-being and career trajectory. Moreover, the authors provide insight and advice on how current and potential adjuncts can succeed and thrive, even with all the barriers or obstacles they face. The adjunct voices in this text have a wealth of knowledge and disciplines represented, expertise, and years of experience in higher education. Additionally, authors also come from all over the United States. With this range of expertise and knowledge, authors also provide advice, strategies, and ways of being for institutions to support their adjunct faculty and for adjuncts to support themselves. While many challenges are thrown at adjunct faculty, we are not suggesting that all adjunct faculty face the same issues. Moreover, this book serves as a space for contributing authors not to speak for all adjunct faculty but themselves. As editor and previous adjunct faculty myself, I encouraged and pushed all contributing authors to stand in their truth and take pride in this role. This book is the outcome of adjunct faculty loving and supporting their profession. Higher education institutions, colleagues, and other stakeholders can learn a great deal from the narratives and experiences shared to look at the intentional recruitment, retention, and psychological well-being of adjunct faculty. Thus, Don't Forget About the Adjuncts! is positioned to be a must-read for all higher education professionals, institutions, and stakeholders looking for strategies to do right by and for adjunct faculty.
