Knowledge Management Irma Becerra-Fernandez, Rajiv Sabherwal, Richard Kumi, 2024-02-23 Knowledge Management: Systems and Processes in the AI Era, Third Edition, is aimed at students and managers who seek detailed insights into contemporary knowledge management (KM). It explains the concepts, theories, and technologies that provide the foundation for knowledge management; the systems and structures that constitute KM solutions; and the processes for developing, deploying, and evaluating these KM solutions. This book serves as a complete introduction to the subject of knowledge management, incorporating technical and social aspects, as well as concepts, practical examples, traditional KM approaches, and emerging topics. This third edition has been revised and expanded to include more coverage of emergent trends such as cloud computing, online communities, crowdsourcing, and artificial intelligence. Aimed at advanced undergraduate, postgraduate, and MBA students who are seeking a comprehensive perspective on knowledge management, Knowledge Management is also complemented by online support for lecturers including suggested solutions to the many review questions and application exercises contained within the book.

Knowledge Management Systems Ronald Maier, 2007-06-30 Information and knowledge have profoundly transformed businesses, organizations and society. Knowledge management promises concepts and instruments that help organizations to provide an environment supportive of knowledge creation, sharing and application. Information and communication technologies are often regarded as the enabler for the effective and especially efficient implementation of knowledge management. The book presents an almost encyclopedic treatise of the many important facets, concepts and theories that have influenced knowledge management and integrates them into a framework consisting of strategy, organization, systems and economics guiding the design of successful initiatives. The third edition particularly extends coverage of the two pillars of implementing knowledge management initiatives, i.e. organization and systems.

Knowledge Management & Information Technology Georg Hüttenegger, 2009 Doctoral Thesis / Dissertation from the year 2004 in the subject Computer Science - Commercial Information Technology, grade: A, Vienna University of

Technology, 120 entries in the bibliography, language: English, abstract: This thesis examines the relationship of Knowledge Management (KM) and Information Technology (IT) using a holistic view. The first chapter presents definitions of knowledge and KM, discusses related fields to KM and knowledge types, argues what KM activities can be supported by IT, examines areas of IT related to KM, defines the focus of this thesis, and presents interesting artifacts. As areas that require flexibility, creativity, and learning are especially in need of KM, this thesis concentrates on them. The next chapter analyzes the goals of KM, problems to be addressed by KM-systems, goals and problems of a university, problems of (existing) KM-systems, and the requirements of a KM-system that supports a KM initiative that addresses the mentioned problems and does not suffer from the described problems. Following the identification of requirements for KM-systems, chapter 3 discusses important preconditions and foundations for KM and KM-systems. As a complete" KM-system can only be part of a complete" and holistic KM initiative, this examination presents indispensable issues for such KM initiatives and discusses the importance and relevance of them. The next chapter presents three existing solutions (CYMANTIX.NET / Oracle / Lotus/IBM). Finally, the chapter examines to what extent the three solutions address the requirements identified and what is missing. The main chapter of this thesis describes the proposed IT solution in the context of a holistic KM initiative. It starts with a discussion of principles such as participatory design, etc. that have to be adhered to when designing, implementing, and introducing the proposed KM-system. Then, the proposed KM-system is presented consisting of three major building blocks, namely the central
