Monk and Robot Becky Chambers, 2025-05-06 Becky Chambers' two award-winning, bestselling, beloved, and uplifting Monk and Robot stories, *A Psalm for the Wild-Built* and *A Prayer for the Crown-Shy*, together in trade paperback for the first time! Becky Chambers' delightful, post-Utopian, Hugo Award-winning series gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers' series asks: in a world where people have what they want, does having more matter? This book includes both *A Psalm for the Wild-Built* and *A Prayer for the Crown-Shy* in paperback for the first time!

A Prayer for the Crown-Shy Becky Chambers, 2022-07-12 A USA Today Bestseller! "Tender and healing... I'm prescribing a preorder to anyone who has ever felt lost. Stunning, kind, necessary." —Sarah Gailey on book 1: *A Psalm for the Wild-Built* *A Prayer for the Crown-Shy* is a story of kindness and love from one of the foremost practitioners of hopeful SF. After touring the rural areas of Panga, Sibling Dex (a Tea Monk of some renown) and Mosschap (a robot sent on a quest to determine what humanity really needs) turn their attention to the villages and cities of the little moon they call home. They hope to find the answers they seek, while making new friends, learning new concepts, and experiencing the entropic nature of the universe. Becky Chambers's new series continues to ask: in a world where people have what they want, does having more even matter?

Novel Ecologies Allison Carruth, 2025-03-04 Tracing the convergence of ecology and engineering over the last three decades, this book pinpoints a new environmental paradigm that the author calls Nature Remade. Allison Carruth's *Novel Ecologies* shows how the tech industry has taken up the wilderness mythologies that shaped one strain of American environmentalism over the last century. Calling this twenty-first-century environmental imagination Nature Remade, Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic. Through three case studies (synthetic wildlife, the digital cloud, and space colonization), the book shows Nature Remade to be a quasi-religious belief in venture capitalism and big tech. This paradigm thus imagines a future in which species, ecosystems, and entire planets are re-generated and re-created through engineering. *Novel Ecologies* challenges the conviction that climate change and other environmental crises must be met with ever larger-scale forms of technological intervention. Against the new worlds conjured by Google, Meta, Open AI, Amazon, SpaceX, and a host of lesser-known start-ups, Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is. On this track of the book, Carruth discusses the works of Octavia Butler, Becky Chambers, Jennifer Egan, Ruth Ozeki, Craig Santos Perez, Tracy K. Smith, Jeff VanderMeer, Saya Woolfalk, and many more. Their novels, poems, installation artworks, and expressive media offer a speculative world built on livable communities rather than engineered lifeforms.

Robot Suicide Liz W. Faber, 2023-05-01 In *Robot Suicide: Death, Identity, and AI in Science Fiction*, Liz W Faber blends

cultural studies, philosophy, sociology, and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real-world policies regarding mental health. For decades, we've been asking whether we could make a robot live; but a new question is whether a living robot could make itself die. And if it could, how might we humans react? Suicide is a longstanding taboo in Western culture, particularly in relationship to mental health, marginalized identities, and individual choice. But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots—as metaphorical stand-ins for humans—might choose to die. Faber looks at a broad range of science fiction, from classics like The Terminator franchise to recent hits like C. Robert Cargill's novel Sea of Rust.

Index to Handicraft Books, 1974-1984 Carnegie Library of Pittsburgh. Science and Technology Department, 1986
Handicrafts and do-it-yourself projects have always been a library's most popular and heavily requested subject. And, for more than a decade, a definitive index to handicraft books has not been published. To fill this gap, the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the Index to Handicraft Books, listing more than 900 books and over 12,400 subject entries, covering books published from 1974 to 1984. The Index to Handicraft Books is an essential reference tool for librarians who want to help someone find instructions for a varied range of do-it-yourself projects, providing quick access to craft projects in books more recent than previous handicraft index books have listed. Each entry in the index consists of a subject heading, the name of the project as listed in the book, the author and title of the book, and the page numbers on which the project can be found. The author and title correspond to those in the List of Works Cited section, which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through inter-library loan. Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974, the list concentrates mainly on medium-priced books that most libraries buy.
