**John Perkins**

**Confessions of an Economic Hit Man** John Perkins, 2004-11-09 Economic hit men," John Perkins writes, "are highly paid professionals who cheat countries around the globe out of trillions of dollars. Their tools include fraudulent financial reports, rigged elections, payoffs, extortion, sex, and murder." John Perkins should know—he was an economic hit man. His job was to convince countries that are strategically important to the U.S.—from Indonesia to Panama—to accept enormous loans for infrastructure development, and to make sure that the lucrative projects were contracted to U. S. corporations. Saddled with huge debts, these countries came under the control of the United States government, World Bank and other U.S.-dominated aid agencies that acted like loan sharks—dictating repayment terms and bullying foreign governments into submission. This New York Times bestseller exposes international intrigue, corruption, and little-known government and corporate activities that have dire consequences for American democracy and the world. It is a compelling story that also offers hope and a vision for realizing the American dream of a just and compassionate world that will bring us greater security.

The New Confessions of an Economic Hit Man John Perkins, 2016-02-09 Featuring 15 explosive new chapters, this new edition of the New York Times bestseller brings the story of Economic Hit Men up-to-date and, chillingly, home to the U.S.—but it also gives us hope and the tools to fight back. The previous edition of this now-classic book revealed the existence and subversive manipulations of economic hit men. John Perkins wrote that they are highly paid professionals who cheat countries around the globe out of trillions of dollars. Their tools include fraudulent financial reports, rigged elections, payoffs, extortion, sex, and murder. In Perkins's case the tool was debt-convincing strategically important countries to borrow huge amounts of money for enormous, development projects that served the very rich while driving the country deeper into poverty and debt. And once indebted, these countries could be controlled. In this latest edition, Perkins provides revealing new details about how he and others did their work. But more importantly, in an explosive new section he describes how the EHM tools are being used around the world more widely than ever—even in the U. S. itself. The cancer has metastasized, yet most people still aren't aware of it. Fear and debt drive the EHM system. We are hammered with messages that terrify us into believing that we must pay any price, assume any debt, to stop the enemies who, we are told, lurk at our doorsteps. The EHM system—employing false economics, bribes, surveillance, deception, debt, coups, assassinations,

unbridled military power-has become the dominant system of economics, government, and society today. It has created what Perkins calls a Death Economy. But Perkins offers hope: he concludes with dozens of specific, concrete suggestions for actions all of us can take to wrest control of our world away from the economic hit men, and help give birth to a Life Economy.

*Confessions of an Economic Hit Man* John Perkins, 2023-02-28 Los Angeles Times Bestseller How do we stop the unrelenting evolution of the economic hit man strategy and China's takeover? The riveting third edition of this New York Times bestseller blows the whistle on China's economic hit man (EHM) strategy, exposes corruption on an international scale, and offers much-needed solutions for curing the degenerative Death Economy. In this shocking exposé, former EHM John Perkins gives an insider view into the corrupt system that cheats and strong-arms countries around the globe out of trillions of dollars and ultimately causes staggering income inequality and ecological devastation. EHMs are highly paid professionals who use development loans to saddle countries with huge debts and force them to serve US interests. Now, a new EHM wave is infecting the world, and at the peak of the devastation sits China, a newly dominant economic power, with its own insidious version of the US EHM blueprint. Twelve explosive new chapters detail the allure, exploitation, and wreckage of China's EHM strategy in Latin America, Asia, Africa, the Middle East, and Europe. If allowed to continue its rampage, the EHM strategy—whether executed by the United States or China—will destroy life as we know it. However, all is not lost. Perkins offers a plan for transforming this system that places profits above all into a Life Economy that restores the earth. He inspires readers to take actions toward a new era of global cooperation that will end the United States's and China's EHM strategies for good.

Former economic hit man John Perkins shares new details about the ways he and others cheated countries around the globe out of trillions of dollars. Then he reveals how the deadly EHM cancer he helped create has spread far more widely and deeply than ever in the US and everywhere else—to become the dominant system of business, government, and society today. Finally, he gives an insider view of what we each can do to change it. Economic hit men are the shock troops of what Perkins calls the corporatocracy, a vast network of corporations, banks, colluding governments, and the rich and powerful people tied to them. If the EHMs can't maintain the corrupt status quo through nonviolent coercion, the jackal assassins swoop in. The heart of this book is a completely new section, over 100 pages long, that exposes the fact that all the EHM and jackal tools—false economics, false promises, threats, bribes, extortion, debt, deception, coups, assassinations, unbridled military power—are used around the world today exponentially more than during the era Perkins exposed over a decade ago. As dark as the story gets, this reformed EHM also provides

hope. Perkins offers specific actions each of us can take to transform what he calls a failing Death Economy into a Life Economy that provides sustainable abundance for all.

**Confessions of an Economic Hit Man** John Perkins, 2008-10-13 Economic hit men (EHMs) are highly paid professionals who cheat countries around the globe out of trillions of dollars. They funnel money from the World Bank, the U.S. Agency for International Development (USAID), and other foreign aid organizations into the coffers of huge corporations and the pockets of a few wealthy families who control the planet's natural resources. Their tools include fraudulent financial reports, rigged elections, payoffs, extortion, sex, and murder. They play a game as old as empire, but one that has taken on new and terrifying dimensions during this time of globalization.

*The New Confessions of an Economic Hit Man* John Perkins, 2016-02-29 False economics. Threats, bribes, extortion. Debt, deception, coups, assassinations and unbridled military power. These are the tools used by the 'corporateocracy' - a vast network of corporations, banks, colluding governments and rich and powerful individuals - to ensure that they retain and expand their wealth and influence, growing richer and richer as the poor become poorer. In his original, post 9/11 book, John Perkins revealed how he was recruited as an economic hit man in the 1970s, and exposed the corrupt methods American corporations use to spread their influence in the developing world, cheating countries out of trillions of dollars. In this new, extensively updated edition he lays bare the latest, terrifying evolution of the economic hit man, and how the system has become even more entrenched and powerful than ever before. In *New Confessions of an Economic Hit Man*, John Perkins

provides fresh and chilling evidence of how the corporatocracy has grown its influence to every corner of the globe, making us all unwitting slaves to their regime. But he also provides advice on how we can end our unconscious support of the system and its self-serving, lethal economy.

**Hoodwinked** John Perkins, 2011-11-01 John Perkins has seen the signs of today's economic meltdown before. The subprime mortgage fiascos, the banking industry collapse, the rising tide of unemployment, the shuttering of small businesses across the landscape are all too familiar symptoms of a far greater disease. In his former life as an economic hit man, he was on the front lines both as an observer and a perpetrator of events, once confined only to the third world, that have now sent the United States—and in fact the entire planet—spiraling toward disaster. Here, Perkins pulls back the curtain on the real cause of the current global financial meltdown. He shows how we've been hoodwinked by the CEOs who run the corporatocracy—those few corporations that control the vast amounts of capital, land, and resources around the globe—and the politicians they manipulate. These corporate fat cats, Perkins explains, have sold us all on what he calls predatory capitalism, a misguided form of geopolitics and capitalism that encourages a widespread exploitation of the many to benefit a small number of the already very wealthy. Their arrogance, gluttony, and mismanagement have brought us to this perilous edge. The solution is not a return to normal. But there is a way out. As Perkins makes clear, we can create a healthy economy that will encourage businesses to act responsibly, not only in the interests of their shareholders and corporate partners (and the lobbyists they have in their pockets), but in the interests of their employees, their customers, the environment, and society at large. We can create a society that fosters a just, sustainable, and safe world for us and our children. Each one of us makes these choices every day, in ways that are clearly spelled out in this book. We hold the power, he says, if only we recognize it. *Hoodwinked* is a powerful polemic that shows not only how we arrived at this precarious point in our history but also what we must do to stop the global tailspin.

Auravana Decision System Auravana,2022-07-12 This publication is the Decision System for a community-type society. A decision system describes the formal structuring of decisions involving a comprehensive information system that resolves into a modification to the state-dynamic of the material environment. A decision system is a collection of information-processing components -- often involving humans and automation (e.g., computing) -- that interact toward a common set of objectives. This decision system is designed to coordinate and control the flow of resources for global accessibility to all goods and services. To navigate in common, humanity must also decide in common. Herein, individuals maintain a relationship to resources that focuses on access rather than possession, maximizing the advantages of sharing, and incentivizing cooperative, rather than competitive, interest. All requirements relevant to human fulfillment and ecological well-being are factored in to the allocation of resources, optimizing quality-of-life for all, while ensuring the persistence of the commons. The standard's decision processes produce tasks that are acted upon by an intersystem (a.k.a., "interdisciplinary") team involving the coordinated planning and operation of projects. Through this comprehensive and transparent decisioning process individuals know precisely what needs to be accomplished to sustain and evolve their fulfillment. Herein, through formalized decisioning and cooperation humanity may continuously restructure society toward a higher potential dynamic of life experience for all. The use of a common social approach and data set allows for the resolution of societal level decisions through common protocols and procedural algorithms, openly optimized by contributing users for aligning humanity with its stated values and requirements.

**State of the Continent** John M. Fobanjong,2018-11-28 What precisely is the state of the African continent today? Depending on one's perspective, the answer may either dwell on Africa's recent economic and political accomplishments or focus on the long-standing single-story of failure, disaster and eternal dictatorships. This book provides a nuanced, forceful and balanced assessment of Africa's political and economic performance since independence. While acknowledging Africa's tragic pitfalls, dating to the transatlantic slave trade and colonialism, State of the Continent skillfully argues that theories associated with the dependency school are no longer enough to explain the continent's failures in governance and economic performance. For a continent so richly blessed and endowed with both human and material resources, the blame for Africa's

lackluster performance falls squarely on its leadership. To get things right, Nkrumah's vision of the primacy of the "political kingdom" must be prioritized whereupon economic gains shall predictably, follow. In lucid and persuasive prose, this volume is an ideal book for scholars as well as students of international studies and African politics.
