*Multinational Management* Rien Segers,2016-01-29 This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving

to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.

**Forest Management in Nepal** Ian Hill,1999-01-01 Forests play a vital role in maintaining Nepal's impressive biodiversity, which has global significance: With only 0.1 percent of the world's total area, Nepal contains 2 percent of the planet's flowering plants, 8 percent of its birds, and 4 percent of its mammals. As Nepal develops its forest resources, it needs to minimize the biotic pressures affecting the structure and dynamics of forest plant communities and wildlife populations and thereby reverse the current destructive pressures on the country's biodiversity. The study aims to provide a better understanding of the ways in which forest resources are used in Nepal. Its focus is to examine systematically the costs and benefits of present and possible future sustainable and biodiversity-friendly management practices from household, national, and global perspectives. The authors define the analytical framework and the costs of financial and economic alternatives. They also present the economic, social, institutional and legal issues, and recommend strategies for change. The report should be of use to national and donor agencies concerned with the management of natural resources and conservation of biodiversity in Nepal, providing a framework for possible future donor support to the sector. It highlights issues that are of importance in the formulation and implementation of natural resource management programs by government and non-government agencies.

**Nontimber Forest Products in the United States** Eric T. Jones,Rebecca Jean McLain,James F. Weigand,2002 A quiet revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a rich source of a wide range of commodities, from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who harvest them, and outlining the steps that are being taken to ensure access to them. As the first extensive national overview

of NTFP policy and management specific to the United States, it brings together research from numerous disciplines and analytical perspectives—such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology—in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They examine some of the major social, economic, and biological benefits of NTFPs, while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape—from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States—such as the Ojibway harvest of plants recounted here—the book takes in the whole breadth of recent NTFP issues, including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products, it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.
