Outrageous Fortunes Daniel Altman, 2025-10-16 A Harvard-trained economist's startling predictions reveal critical challenges in the decades ahead, helping individuals, businesses, and governments to make smarter decisions As individuals, companies, and countries struggle to recover from the economic crisis, many are narrowly focused on forecasts for the next week, month, or quarter. Yet they should be asking what the global economy will look like in the years to come—where will the long-term risks and opportunities arise? These are the questions that Daniel Altman confronts in his provocative and indispensable book. The fate of the global economy, Altman argues, will be determined by deeper factors than those that move markets from moment to moment. His incisive analysis brings together hidden trends, societal pressures, and policy endgames to make twelve surprising but logical predictions about the years ahead. And his forecasts for the future raise a pressing question for today: With so many challenges awaiting us, are our political and economic institutions up to the task? Outrageous Fortunes tells which industries will grow, which economies will crumble, which investments will pay off, and where the next big crisis may occur. Altman's carefully reasoned text is an essential guide for the road ahead.

Rising Above the Gathering Storm Institute of Medicine, National Academy of Engineering, National Academy of

Sciences,Committee on Science, Engineering, and Public Policy,Committee on Prospering in the Global Economy of the 21st Century: An Agenda for American Science and Technology,2007-04-08 In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1) Increase America's talent pool by vastly improving K-12 mathematics and science education; 2) Sustain and strengthen the nation's commitment to long-term basic research; 3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. Rising Above the Gathering Storm will be of great interest to federal and state government agencies, educators and schools, public decision makers, research sponsors, regulatory analysts, and scholars.
