Dumbing Us Down by John Taylor Gatto is a critical examination of the American education system. Gatto, an experienced teacher, identifies a hidden curriculum within schools that teaches seven detrimental lessons: confusion, class position, indifference, emotional and intellectual dependency, conditional self-esteem, and the impossibility of hiding. These lessons promote conformity, obedience, and reliance on authority, stifling independent thought and action...

Summary of John Taylor Gatto's Dumbing Us Down Everest Media,2022-03-27T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 I used to teach English language and literature, but I don't anymore. I teach school, and I win awards doing it. The seven lessons that make up a national curriculum are taught from Harlem to Hollywood Hills. #2 The first lesson I teach is confusion. I teach my students that everything I teach is out of context. I teach them disconnections, and I teach them too much. They learn about things in depth, but they learn about them like children learn the catechism or the Thirty-nine Articles of Anglicanism. #3 I teach my students that they must stay in the class where they belong. I don't know who decides where my kids belong, but that's not my business. I make sure they understand their place in the pyramid. #4 The third lesson I teach is indifference. I teach students not to care too much about anything, even though they want to make it appear that they do. They must become totally involved in my lessons, but when the bell rings, they must turn on and off like a light switch.

Costs of Education Betty Cox, Spencer Weiler, Luke M. Cornelius, 2013-03-12 How schools budget and spend the money they receive Analyzes links (or their absence) to educational goals A candid guide to how resources are used in schools Based on extensive research and hands-on school budgeting, this volume is a systematic exposition of how money is collected and spent in the thousands of public school districts in the US, as well as parochial, private and charter schools. The volume explains both the paper trail of how money is allocated in budgets and justified in outlays, as well as the decision-making steps authorizing the collection and spending of funds. A thesis of the book is that money for schools should in all instances contribute to the promotion of educational goals. The book shows that the determination of, as well as the realization, of such goals is subject to complexities that result in questionable uses of limited resources--a result that has wide implications.
