## Mindy Cockeram

*Cut Your Labor in Half* Mindy Cockeram, 2021-10-24 Are you worried that your labor will be long & difficult? Are you frightened of the pain of contractions or dreading induction? Is your birth partner unaware of how to support you or massage you during childbirth? Do you want to learn breathing techniques or pushing positions that can help you avoid a tear? If you answered YES to any of these questions, put this book in your cart now. This review says it better than we could: This is my 4th pregnancy, and I thought I had read every book out there on labor and delivery. Well, I was wrong, and this is the BEST book I've read about concrete, practical, evidence-based techniques to shorten labor. This is not a book about positive birth affirmations (though I love those too); this is a book that gives you tips and strategies that I wish I had known with my previous deliveries. It's a quick read and will leave you feeling more confident and prepared. Buy it! Written with input from hundreds of women who have given birth with all types of complications, this book is backed by evidence-based research and has been recently updated for Covid-19. It also contains real birth stories, illustrations and humorous anecdotes. This book will appeal to the new millennial generation of pregnant women, birth partners and supporters, childbirth educators and professional healthcare workers who are short on time and want to see immediate results. According to the Author, labor has increased in length by an average of two hours over the last 30 years and this book looks to cut the average labor in half by reducing fear and educating the next generation of parents.

*Cut Your Labor in Half* Mindy Cockeram, 2016-05-23 As healthcare professionals and consumer activists examine the reasons for the significant increases in the length of labor, C-Section rates, inductions and the overall dissatisfaction with hospital births, pregnant woman and their partners are left hanging with more anxiety and fear about their impending experience than ever before. Just like the ground breaking 'Painless Childbirth' written by Fernand Lamaze in 1952, *Cut Your Labor in Half!* Secrets for a Faster & Easier Birth give women an updated and welcome ray of sunshine through the darkening labor clouds. Highlighting evidence based studies and rejuvenated techniques for making each contraction more useful, efficient and bearable - whether at home or in the hospital - the reader and her support partner are educated in methodologies for reducing the overall length of labor and increasing her satisfaction. Written with input from hundreds of women who have taken Mindy's childbirth classes in London and Southern California and containing factual birth stories, humorous anecdotes and refurbished strategies, *Cut Your Labor In Half!* allows the reader to achieve the birth she wants.

Cut Your Labor in Half is a classroom course in a book; a 'cheat sheet' of ideas for understanding how the reader's choices may impact other aspects of birth and early motherhood. This book will appeal to the new millennial generation of pregnant women, birth partners and supporters, childbirth educators and professional healthcare workers who are short on time and want to see immediate results. According to Cockeram, labor has increased in length by an average of two hours over the last 30 years and this book looks to cut the average labor in half by reducing fear and educating the next generation of parents.
