P. M. Driessen

World Regional Geography Lydia Mihelic Pulsipher, Alex Pulsipher, Holly M. Hapke, 2005-01-05 The scale of [this book] encompasses vast continents and global forces, but often its descriptive focus on individual lives has the most impact. Stories of people and families make the study of geography compelling. Students begin to grasp the complex patterns at work in the world today as they see how people are affected by, and respond to, economic, social, and political processes. Through these stories of individual lives, [the authors] hope to convey the impact of globalization, a major theme of the text. To highlight global to local and interregional connections, the text includes a number of topics that have no borders: the war on terrorism, realignments in the global political order, interregional trade, the global economy, popular culture, the environment, and the Internet. Here, again, the focus on the individual person provides insight, offering local perspectives on these global trends.- Preface.

The Making of a Land Ivar B. Ramberg, 2008 The Making of a Land - Geology of Norway takes the reader on a journey in geological time, from primordial times to the present day. A fantastic journey from the summits of Norway's spectacular rugged and weather-beaten mountains to the riches concealed in the sedimentary rocks on the continental shelf. This book displays the treasures of Norwegian geology for everyone to see. Norway's geological resources represent the foundation of its welfare state. During several centuries first the mining, and then the oil industries have been economic mainstays, and this will continue in the future. The book presents a description both of Norway and the planet we inhabit and depend on for our survival. It is lavishly illustrated with photographs and maps from all over the country.

Mountains of Northern Europe Scottish Natural Heritage, Centre for Mountain Studies, 2005-10-03 This publication contains the proceedings of an international conference, held in Pitlochry, Scotland in November 2002, to mark the UN International Year of Mountains 2002. The conference participants discussed the state of current knowledge about the mountains of Northern Europe and considered issues arising from the interactions between people and nature, and the conservation and sustainable development activities needed to benefit the natural heritage of mountain regions in the UK, Norway and Sweden, Finland and Iceland.

Lecture Notes on the Major Soils of the World P. M. Driessen, 2001 These lecture notes describe the major soils of the world and their properties, genetic formation, regional distribution, their management and associated land use. The World Reference Base for Soil Resources (WRB) is used throughout the text, as the basis for a universal classification system for soil correlation. The aim of the publication is to make the WRB accessible to young scientists. It is intended to facilitate the study of soils and the exchange of soil information, and provides a common language for soil science.
