Proceedings of the Conference on Natural Resources and Life Sciences 2022 (NRLS-BIO 2022) Johan Sukweenadhi, Finna Setiawan, 2023-12-26 This is an open access book. Molecular biology has given a great impact in life science investigation. The advances in molecular biology over the last several decades have boosted research and product development in many disciplines of life science, including Biotechnology and Pharmacy. This advances comprise: (1) the progression of more sophisticated techniques in molecular biology with a broad, interdisciplinary applications; (2) the expanding flow of information of technical novelties and scientific discoveries across scientific community; and (3) the development of more sophisticated software and continuously updated databases. This has changed the rationale and approach of experimentations giving rise to revolutionizing discoveries in many fields of science. It has become evident that the deregulation of molecular processes in body is associated with, and in certain circumstances is the direct cause of, a wide range of pathological conditions. It is necessary to mention the biomedical relevance of molecular biology-related investigations for drug discovery and the development of a more personalized medicine. Given the rapidly changing and continuously evolving nature of the molecular biology field, we can anticipate that the revolutionary impact of molecular biology in life sciences is only at the beginning and is far from being finished. To highlight the rapidly growing research and product development in the field of Biotechnology and Pharmacy, the 4th International Conference on Natural Resources and Life Sciences (NRLS) themed Biotechnology- and pharmacy-driven research and product development is presented. Following the successful program of 1st, 2nd, and 3rd NRLS, we intend to hold the next two-day conference along with a one-day optional workshop in 4th NRLS, as a scientific forum for biotechnology and pharmacy researchers and product developers to discuss the recent advances in the fields and their application. It is a great pleasure to invite you to the forthcoming 4th NRLS Conference, which will be held virtually, on August 24th-25th 2022, and the following onsite workshop on August 26th, 2022.

The Life Pill Alfred Sparman, MD, 2016-02-25 We doctors have been patching up diseases for too long. We need to STOP. Some of the drugs currently used have dire side effects and may even be lethal. However all may not be lost. Man was intended to live forever. With the right tools infinite possibilities are within reach. Respiration and metabolism occurs in our body providing energy to survive. In these oxidation processes free radicals are produced. Now, free radicals in excess can

be considered man's worst enemy. Free Radicals Attack on LDL particles (bad cholesterol) causes cardiovascular death (e.g. myocardial infarction, stroke, and pulmonary embolisms) which is the number one cause of death in the world today. Free Radical attack on proteins and fats cause skin wrinkling (visible aging) and Free Radical attack on DNA causes cancer. These three reactions account for the majority of morbidity and mortality we face today. This book will introduce you to the answer! We need to attenuate and possibly reverse diseases from the Atomic, Molecular and Cellular Level. We need THE LIFE PILLS!!!
