Alfred Louis Kroeber

Animals and Animal Symbols in World Culture Dean Miller,2014-01-01 A comprehensive guide to the history of human interaction with the creatures of the earth, air, and water. This book provides historical perspective on mankind's complicated relationship with all creatures, from tiny insects to larger beasts. From the alligator to the wryneck, key animals from every continent are profiled, with articles focusing on how different cultures viewed the creatures with which they shared land, and the ones they considered omens of gods and devils. In addition to the numerous articles on specific animals, there are also entries on the role of animals in Christian art, and how shamans took the form and power of animals in key ceremonies. The work is highly illustrated, and subjects of major interest are provided with individual bibliographies of further reading on the subject at the end of each article.

Symbols of the Christian Faith Alva William Steffler,2002-02-21 Symbols of the Christian Faith is an illustrated guide to the major visual symbols used by the Christian church throughout history. These stylized illustrations, designed by artist Alva William Steffler, are intended to provide usable, up-to-date resources for contemporary church worship and Christian education. Throughout church history symbols have been used to aid worship and to communicate difficult spiritual ideas. Steffler here collects these symbols, from early Christian catacomb art to the present, offering fresh graphic interpretations of old visual forms. The accompanying text notes the biblical sources for the various symbols and traces their use in church tradition and their links to Greco-Roman culture. Extensive glossaries and indexes round out the book. Broadly inclusive and sensitive to the perspectives of every church tradition, this volume will be an invaluable resource for churches using Christian art as well as for general readers curious about the meaning of common Christian symbols.

College Teaching and the Development of Reasoning Robert G. Fuller, Thomas C. Campbell, Dewey I. Dykstra, Scott M. Stevens, 2009-10-01 This book is intended to offer college faculty members the insights of the development of reasoning movement that enlighten physics educators in the late 1970s and led to a variety of college programs directed at improving the reasoning patterns used by college students. While the original materials were directed at physics concepts, they quickly expanded to include other sciences and the humanities and social sciences. On-going developments in the field will be included. The editors have introduced new topics, including discussions of Vygotsky's ideas in relation to those of Piaget, of science education research progress since 1978, of constructivist learning theory applied to educational computer games and of applications from anthropology to zoology. These materials are especially relevant for consideration by current university faculty in all subjects.

The Black Police Arthur James Vogan, 1890 Novel by British journalist, Arthur Vogan, concerned with Queensland's Native Police Force. In a 'Note to the readers' at the start of the novel, Vogan states The scenes and main incidents employed are chiefly the result of my personal observations and experiences. Within the novel, Vogan details atrocities committed by the Native Police Force, and is also very critical of behaviour of the wider community of settlers towards Aboriginal Australians and their children. Of note, Vogan includes a map towards the end of the novel, entitled Slave map of modern Australia within which are shown areas of Milder forms of Aboriginal slavery, Worst forms of slavery and Natives all destroyed in Black War.

The Mammoth Dictionary of Symbols Nadia Julien, 1996 Since the dawn of time, mankind has used symbols to express thoughts or feelings, and to preserve those truths believed to come from a higher sphere. Every culture, in every age, invests

the objects, animals and plants around it with a multitude of different meanings.

Picture-Writing of the American Indians Garrick Mallery, 2022-06-02 In Picture-Writing of the American Indians, Garrick Mallery presents a meticulous examination of the symbolic and pictorial languages utilized by Indigenous tribes across North America. Mallery's scholarly approach combines ethnographic observation with linguistic analysis, unveiling the complexity of Native American communication through visual forms. His work integrates a diverse range of illustrations and artifacts, meticulously cataloging the myriad ways in which tribes recorded history, mythology, and social practices, thereby illuminating a vibrant and often overlooked aspect of Native culture. Mallery's literary style is both informative and reverent, placing emphasis on the cultural significance of these visual narratives within their historical context. Garrick Mallery, a distinguished ethnologist and an early advocate for the study of Native American languages and cultures, utilized his background in the U.S. Geological Survey to investigate and document Indigenous American practices. His extensive research among tribal communities equipped him with a unique perspective that allowed for a greater appreciation of the intricacies of their communication methods. Driven by a commitment to preserve Native American heritage, Mallery's work serves as a pioneering effort in understanding the art of picture-writing. I highly recommend Picture-Writing of the American Indians to anyone interested in Indigenous studies, linguistics, or the rich tapestry of American history. Mallery's comprehensive and insightful analysis not only preserves these cultural artifacts for future generations but also invites readers into the profound world of Native American storytelling and expression.
