Organized thematically, it features meticulously researched data on geography, demographics, economy, and government, presented with clarity and precision. The literary style is characterized by its succinct summaries and objective tone, making it an indispensable resource for scholars, policymakers, and curious readers alike. Set against the backdrop of a rapidly changing geopolitical landscape in 2008, the Factbook serves as a crucial tool for understanding global dynamics during a time of international tension and the onset of economic challenges. As a product of the Central Intelligence Agency, the author of this work represents an institution with vast resources in research and intelligence. The CIA's mission to support policymakers with accurate information about foreign countries has guided the compilation of this factbook, leveraging expertise in data collection and analysis. The agency's commitment to providing a factual basis for understanding international relations and security has informed the text, drawing from a wealth of intelligence sources and collaborative teams of experts. Landscapes and Landmarks of Canada Maeve Conrick,Munroe Eagles,Jane Koustas,Caitríona Ní Chasaide,2017-03-28

The image of the “land” is an ongoing trope in conceptions of Canada—from the national anthem and the flag to the symbols

on coins—the land and nature remain linked to the Canadian sense of belonging and to the image of the nation abroad. Linguistic landscapes reflect the multi-faceted identities and cultural richness of the nations. Earlier portrayals of the land focused on unspoiled landscape, depicted in the paintings of the Group of Seven, for example. Contemporary notions of identity, belonging, and citizenship are established, contested, and legitimized within sites and institutions of public culture, heritage, and representation that reflect integration with the land, transforming landscape into landmarks. The Highway of Heroes originating at Canadian Forces Base Trenton in Ontario and Grosse Île and the Irish Memorial National Historic Site in Québec are examples of landmarks that transform landscape into a built environment that endeavours to respect the land while using it as a site to commemorate, celebrate, and promote Canadian identity. Similarly in literature and the arts, the creation of the built environment and the interaction among those who share it is a recurrent theme. This collection includes essays by Canadian and international scholars whose engagement with the theme stems from their disciplinary perspectives as well as from their personal and professional experience—rooted, at least partially, in their own sense of national identity and in their relationship to Canada.

Women and Video Game Modding Bridget Whelan,Matthew Wilhelm Kapell,2020-01-17 The world of video games has long revolved around a subset of its player base: straight, white males aged 18-25. Highly gendered marketing in the late 1990s and early 2000s widened the gap between this perceived base and the actual diverse group who buy video games. Despite reports from the Entertainment Software Association that nearly half of gamers identify as female, many developers continue to produce content reflecting this imaginary audience. Many female gamers are in turn modifying the games. Modders alter the appearance of characters, rewrite scenes and epilogues, enhance or add love scenes and create fairy tale happy endings. This is a collection of new essays on the phenomenon of women and modding, focusing on such titles as Skyrim, Dragon Age, Mass Effect and The Sims. Topics include the relationship between modders and developers, the history of modding, and the relationship between modding and disability, race, sexuality and gender identity.
