**Media and Nation Building** John Postill, 2006-05-01 With the end of the Cold War and the proliferation of civil wars and regime changes, the question of nation building has acquired great practical and theoretical urgency. From Eastern Europe to East Timor, Afghanistan and recently Iraq, the United States and its allies have often been accused of shirking their nation-building responsibilities as their attention — and that of the media -- turned to yet another regional crisis. While much has been written about the growing influence of television and the Internet on modern warfare, little is known about the relationship between media and nation building. This book explores, for the first time, this relationship by means of a paradigmatic case of successful nation building: Malaysia. Based on extended fieldwork and historical research, the author follows the diffusion, adoption, and social uses of media among the Iban of Sarawak, in Malaysian Borneo and demonstrates the wide-ranging process of nation building that has accompanied the Iban adoption of radio, clocks, print media, and television. In less than four decades, Iban longhouses ('villages under one roof') have become media organizations shaped by the official ideology of Malaysia, a country hastily formed in 1963 by conjoining four disparate territories.

**Media, Culture and Society in Malaysia** Yeoh Seng Guan, 2010-02-25 This book presents a comprehensive, full-length analysis of the uses of media and communication technologies by different social actors in Malaysia. Drawing upon recent case studies - from films to political advertising - it provides valuable insights into the ways in which different media forms have negotiated with the dominant cultural representations of Malaysian society.

**Identity and the State in Malaysia** Fausto Barlocco, 2013-12-04 Using the case study of the Kadazan of Sabah, a region in the Malaysian section of Borneo, this book examines national, ethnic and local identities in post-colonial states. It shows the importance of the connection between lived experience and identity and belonging, and by doing so, provides a deeper and fuller explanation of the apparently contradictory conflict between different collective forms of identification and the way in which they are employed in reference to everyday situations. Based on ethnographic fieldwork and historical analysis, the book reconstructs the development of the cultural forms and labels associated with the collective identities it studies. The author employs an approach that sees collective identification as an expression of everyday practices and that stresses the importance of participation and familiarity between forms of identification and lived experience. In this context, he considers anthropological debates about state-minorities relations and issues of 'dignity' and 'respect'. Explaining state-minority

relations in Malaysia and more generally in other post-colonial realities, the insights presented are highly relevant to other cases of conflicting allegiances and identity politics in settings of post-colonial nation-building.

**The SAGE Handbook of Political Communication** Holli A Semetko, Margaret Scammell, 2012-05-17 This authoritative and comprehensive survey of political communication draws together a team of the world's leading scholars to provide a state-of-the-art review that sets the agenda for future study. It is divided into five sections: Part One: explores the macro-level influences on political communication such as the media industry, new media, technology, and political systems Part Two: takes a grassroots perspective of the influences of social networks - real and online - on political communication Part Three: discusses methodological advances in political communication research Part Four: focuses on power and how it is conceptualized in political communication Part Five: provides an international, regional, and comparative understanding of political communication in its various contexts The SAGE Handbook of Political Communication is an essential benchmark publication for advanced students, researchers and practitioners in the fields of politics, media and communication, sociology and research methods.

**Uncovering the Pearl** Amos Yong, Mark A. Lamport, Timothy T. N. Lim, 2023-09-19 Asia is by far the largest continent in the world. The global expansion of the church, which emanated from the Middle East (as explored in the first book in the series) moved along various routes to take root in Asia proper. Christianity in Asia is extraordinarily diverse, with very ancient forms of the faith dating to the time of the apostles. The western church will be enlightened by the dynamic, multi-pronged Asian story of Christianity. Asian Christianity is also distinct due to the numerous non-traditional, house, or cell movements found throughout the region. The diversity of Christianity in Asia makes Christians in this region critical for the future of global Christianity.
