Carlos Moreno

The 15-Minute City Carlos Moreno, 2024-05-01 A fresh and innovative perspective on urban issues and creating sustainable cities In *The 15-Minute City: A Solution for Saving Our Time and Our Planet*, human city pioneer and international scientific advisor Carlos Moreno delivers an exciting and insightful discussion of the deceptively simple and revolutionary idea that everyday destinations like schools, stores, and offices should only be a short walk or bike ride away from home. This book tells the story of an idea that spread from city to city, describing a new way of looking at living that addresses many of the most intractable challenges of our time. Hundreds of mayors worldwide have already embraced the concept as a way to help recover from the pandemic, and the idea continues to gain speed. You'll learn why more and more cities are planning to make cars far less necessary for contemporary city-dwellers and how they're planning to achieve that goal. You'll also find: Strategies for cities to recover and adapt to benefit residents, saving them precious time Techniques to change the habits of automobile-dependent city residents and maximize social benefits of living in a human-centric city Scientifically developed, research-backed solutions for enduring urban issues and problems Deeply committed to science, progress, and creativity, Moreno presents an essential and timely resource in *The 15-Minute City*, which will prove invaluable to anyone with an interest in modern and innovative approaches to consistently challenging urban issues that have bedeviled policy makers and city residents since the invention of the car.

Green Cities Yves Earhart, 2024-10-11 *Green Cities* explores the transformative potential of urban areas in combating climate change, challenging the notion that cities are inherently unsustainable. The book delves into climate-responsive urban design, green infrastructure integration, and sustainable transportation systems, presenting a vision of cities as regenerative ecosystems rather than environmental burdens. With over 70% of global carbon emissions originating from urban centers, the book argues that cities hold the key to mitigating climate change while enhancing livability. The book's approach combines historical context with cutting-edge research, utilizing case studies, climate models, and economic analyses to support its arguments. It introduces readers to concepts like biomimicry in urban design, exploring how cities can emulate natural systems to become more efficient and resilient. The book progresses through three main sections, covering nature-inspired urban planning, green infrastructure implementation, and reimagining urban mobility. What sets *Green Cities* apart is its systems-thinking approach, viewing cities as complex, interconnected organisms. This perspective

allows for innovative solutions that address multiple urban challenges simultaneously, making the book valuable for urban planners, policymakers, architects, and engaged citizens alike. By presenting practical strategies and acknowledging implementation challenges, the book offers a hopeful and actionable blueprint for urban transformation in the face of climate change.

Pursuing on research items Dimitra Babalis,2021-12-16 How has Covid-19 changed society and ways to live urban environment? How has it changed the understanding of urban space and urban lifestyles? How has it changed education and research and how pre-Covid research goals could be put under discussion in the post-Covid City? The book illustrates research fundings and investigations on how Covid-19 contingency has changed nowadays society and the ways we make research. The book is divided in three parts: Part One is trying to give some answers on how research priorities have been changed during the lockdown and how pre-Covid research goals could be put under discussion within the post-Covid City. Part Two explores contemporary attitudes regarding theoretical and practice-based research in urbanism and architecture. Part Three is dealing with Higher Education.

Promoting Sustainable Living Justyna Karakiewicz,Audrey Yue,Angela Paladino,2015-05-01 Current images of sustainability are often designed to instil fear and force change, not because we believe in it, but because we fear the consequences of inaction. Moving away from negative portrayals of sustainability, this book identifies the factors that motivate people to aspire towards sustainable living. It introduces the notion of sustainability as an object of desire that will allow people not to be scared of the future but rather to dream about it and look forward to a better quality of life. Tracing the history of major changes in our society that have dramatically altered our perceptions, beliefs and attitudes about sustainability, the book analyses the role of communications in persuading people of the benefits of sustainable living. It describes our current desires and dreams and explains why we need to change. Finally, the book suggests what could be done to not only make sustainability an object of desire, but also introduce hopes and dreams for a better future into our everyday lives. This inspiring and interdisciplinary book provides innovative insights for researchers, students and professionals in a range of disciplines, in particular environment and sustainability, sustainable marketing and advertising, and psychology.

Cities and Mega Risks Mohammad Aslam Khan,2022-10-11 This book focuses on the emergence of COVID-19 and climate change as twin mega risks to cities of both developed and developing countries. The work analyses how the pandemic has transformed city functions, promoted remote working, and affected socializing, education and learning patterns, recreation, as well as shopping and entertainment. It discusses the lessons learned from these two Mega Risks, the evolution

of urban patterns and functions in their wake, and provides visionary thinking for the improvement of cities from the experiences gained. The COVID-19 Pandemic and climate change are both posing serious threats to cities' future. Together, they demand changes in the ways cities' function and operate. The work presents a case for a better understanding of the twin mega risks, the magnitude of their impacts, the responses of cities in combating these issues, and planning strategies for preparing, mitigating and adapting to these and future risks. The book is designed to provide reliable resource materials for a wide audience such as planners, professional practitioners, scientists, students, teachers and researchers working in various fields including geography, environmental sciences, social sciences, policy and planning.
