Tamil Computing Dr. R. Ponnusamy, 2024-04-29 This book aims to outline current Tamil Computing technologies available around us in the present context to all participants like students, academicians, researchers and others who are interested in this field. Most of the books available in the market deal with Natural Language Processing, specifically English Language Processing. Therefore, the author hopes this book will be of utmost use to the undergraduate, postgraduate and researchers. This book provides an overall picture of Tamil Computing, covering different aspects. Specifically, starting with the basics of Tamil, Tamil Computing, Coding standards, fonts, keyboards, issues related to it, morphology, phonology, syntax, semantics and pragmatics of Tamil, Tools and resources and applications of Tamil Computing in detail. The purpose of this book is also to give an insight into Tamil Handwritten character recognition and Speech processing in detail. Automatic Speech Recognition in one of the critical issues in any language. Recognizing handwritten characters using a machine is necessary in today's modern world. A computer system should be intelligent enough to receive and interpret the handwritten input. These two aspects are explained in detail. This book elaborates on the existing corporate packages like MS-Office and its usage in Tamil, Database Processing and open Tamil. The book also explains input-outputting methods in detail with simple python programs. The use of the MS Windows Operating System is widespread worldwide in different languages. This book describes the practices of customization of MS Windows software for Tamil. Usage of the MS Windows Operating System is famous worldwide in other languages. This book has also added details concerning Indic Libraries and Large Language Models.

Automatic Speech Recognition and Translation for Low Resource Languages L. Ashok Kumar, D. Karthika Renuka, Bharathi Raja Chakravarthi, Thomas Mandl, 2024-03-28 AUTOMATIC SPEECH RECOGNITION and TRANSLATION for LOW-RESOURCE LANGUAGES This book is a comprehensive exploration into the cutting-edge research, methodologies, and advancements in addressing the unique challenges associated with ASR and translation for low-resource languages. Automatic Speech Recognition and Translation for Low Resource Languages contains groundbreaking research from experts and researchers sharing innovative solutions that address language challenges in low-resource environments. The book begins by delving into the fundamental concepts of ASR and translation, providing readers with a solid foundation for

understanding the subsequent chapters. It then explores the intricacies of low-resource languages, analyzing the factors that contribute to their challenges and the significance of developing tailored solutions to overcome them. The chapters encompass a wide range of topics, ranging from both the theoretical and practical aspects of ASR and translation for low-resource languages. The book discusses data augmentation techniques, transfer learning, and multilingual training approaches that leverage the power of existing linguistic resources to improve accuracy and performance. Additionally, it investigates the possibilities offered by unsupervised and semi-supervised learning, as well as the benefits of active learning and crowdsourcing in enriching the training data. Throughout the book, emphasis is placed on the importance of considering the cultural and linguistic context of low-resource languages, recognizing the unique nuances and intricacies that influence accurate ASR and translation. Furthermore, the book explores the potential impact of these technologies in various domains, such as healthcare, education, and commerce, empowering individuals and communities by breaking down language barriers. Audience The book targets researchers and professionals in the fields of natural language processing, computational linguistics, and speech technology. It will also be of interest to engineers, linguists, and individuals in industries and organizations working on cross-lingual communication, accessibility, and global connectivity.

Decentering Translation Studies Judy Wakabayashi, Rita Kothari, 2009 This book foregrounds practices and discourses of translation in several non-Western traditions. Translation Studies currently reflects the historiography and concerns of Anglo-American and European scholars, overlooking the full richness of translational activities and diverse discourses. The essays in this book, which generally have a historical slant, help push back the geographical and conceptual boundaries of the discipline. They illustrate how distinctive historical, social and philosophical contexts have shaped the ways in which translational acts are defined, performed, viewed, encouraged or suppressed in different linguistic communities. The volume has a particular focus on the multiple contexts of translation in India, but also encompasses translation in Korea, Japan and South Africa, as well as representations of Sufism in different contexts.
