**Charles Edward Merriam, Harry Elmer Barnes**

**Heartlands** Stephen Bailey, Chris Nottingham, 2013-09-01 Eighty years after his death D.H. Lawrence has become a celebrity, the subject of passionate dispute, possibly more discussed than read. It is time to put the emphasis back on the novels and short stories, by exploring the context that led to their creation - Lawrence's upbringing and influences. Although he led a wandering life, Lawrence's best work is located in the countryside of his youth, in Nottinghamshire and Derbyshire. An understanding of this district can help readers understand and enjoy Lawrence's work more fully, and this book aims to guide the visitor, either in person or in spirit, around Lawrence's 'Heartlands'. Heartlands also provides the reader with a biography of Lawrence's early life, and examines the complex cultural forces that inspired the young man, revealing the profound influences of home, school and chapel in Eastwood and district that led to such masterpieces as *The Rainbow* and *Women in Love*. The role of walking in developing Lawrence's feelings for his 'Heartlands' is also explored, and five walks which are described in *Sons and Lovers* are followed in the modern context, illustrating some of the changes that have affected the district in the past century.

**English Country Houses and Landed Estates** Heather Clemenson, 2021-11-30 Originally published in 1982, and based on extensive research in estates' archives, this book outlines the changing fate of the 500 largest estates in England over the centuries. It examines estates in their heyday and looks at their changing role as they declined in the twentieth century, showing how some estates have survived and describing the differing uses to which country houses have been put.

Hinterlands and Regional Dynamics in the Ancient Southwest Alan P. Sullivan, James Bayman, 2007-01-01 *Hinterlands and Regional Dynamics in the Ancient Southwest* is the first volume dedicated to understanding the nature of and changes in regional social autonomy, political hegemony, and organizational complexity across the entire prehistoric American Southwest. With geographic coverage extending from the Great Plains to the Colorado River, and from Mesa Verde to the international border, the volume's ten case studies synthesize research that enhances our understanding of the ancient Southwest's highly variable demographic, land use, and economic histories. For this volume, 'hinterlands' are those areas whose archaeological records do not disclose the ceramic, architectural, and network evidence that initially led to the establishment of the Hohokam, Chaco, and Casas Grandes regional systems. Employing a variety of perspectives, such as the cultural landscapes approach, heterarchy, and the common-pool resource model, as well as technical methods, such as

petrographic and stylistic-attribute analyses, the volume's contributors explore variation in hinterland identities, subsistence ecology, and sociopolitical organization as regional systems expanded and contracted between the 9th and 14th centuries AD. The hinterlands of the prehistoric Southwest were home to a substantial number of people and were often used as resource catchments by the inhabitants of regional systems. Importantly, hinterlands also influenced developments of nearby regional systems, under whose footprint they managed to retain considerable autonomy. By considering the dynamics between hinterlands and regional systems, the volume reveals unappreciated aspects of the ancient Southwest's peoples and their lives, thereby deepening our awareness of the region's rich and complicated cultural past.

Climate Politics in Populist Times Mirjam Gruber, 2024-10-08 This book navigates the neglected territory where far-right populism intersects with climate change, presenting a nuanced examination that transcends traditional research boundaries. In recent decades, Europe has grappled with the surge of far-right and populist movements, fueling robust academic debates. Simultaneously, the global discourse on climate change has become increasingly pervasive in societal and political spheres. This book provides a comprehensive exploration of how populist far-right parties discuss climate change within their national contexts, focusing on Germany, Spain, and Austria. Using a meticulous methodology rooted in critical discourse studies, Mirjam Gruber examines the perspectives on climate change held by mainstream parties thereby defining the national policy field. Gruber then delves into the discourse about climate change of populist far-right parties, revealing a complex web of obstructionist arguments intricately tied to the national policy context. By analyzing a diverse array of documents spanning five years, including social media posts, press releases, parliamentary debates, and policy documents, Gruber uncovers a stark contrast between the willingness of mainstream parties to address climate concerns and the obstructionist rhetoric employed by their far-right counterparts. This illuminating exploration underscores the importance of context in understanding political communication and provides profound insights into how different nations frame the climate change narrative. *Climate Politics in Populist Times* will be of great interest to students and scholars of climate change, environmental politics, climate change communication and populist far-right ideologies.
