The International Handbook of Creativity James C. Kaufman, Robert J. Sternberg, 2006-04-03 What constitutes a creative person? Is it someone who can perform many tasks innovatively? Is it someone who exhibits creative genius in one area? Is it someone who utilizes her creativity for good and moral causes? Is it someone who uses his creativity to help his company or country succeed? Different cultures have different perspectives on what it means to be creative, yet it is nearly always the American or Western perspective that is represented in the psychological literature. The goal of The International Handbook of Creativity is to present a truly international and diverse set of perspectives on the psychology of human creativity. Distinguished scholars from around the world have written chapters for this book about the history and current state of creativity research and theory in their respective parts of the world. The 2006 book presents a wide array of international perspectives and research.

Creativity Pooja Jain, 2021-03-03 Creativity and innovation go hand in hand. This book presents a plethora of creative interventions in education, culture, expressions, communications, and other areas. Each chapter brings forth a core idea well attested on the scales of creative interventions. It is a collaborative effort to bring forth multidisciplinary creativity in the ever-evolving world of design, communication, and possibilities. There is really no logical order to the book. You do not necessarily have to start at the beginning, just find a chapter that interests you and read. I hope that you find the book stimulating as well as informative.

Digital Resources, Creativity and Innovative Methodologies in Language Teaching and Learning Adriana Teresa Damascelli, 2017-06-20 The concept of university language centres has changed in recent decades. Initially conceived as laboratories for practical and autonomous language-learning, they are now considered as places with more specific and complex functions in language teaching and learning. University language centres now constitute networks for exchanging knowledge and know-how in order to respond to ever-changing, multilingual and multicultural contexts. At the same time, the availability and acquisition of new technologies is contributing to the creation of new tools for the provision of appropriate services and training. This collection covers a wide range of topics related to the activities, experiences and applied research carried out in Italian university language centres. It provides further evidence of the important role university language centres play in promoting language expertise, developing tools and adopting digital resources, and

providing support and training for language teaching. Technology, creativity, methodologies and plurilingualism are key topics in the book as they constitute the essential ingredients for effective and successful language teaching and learning. The volume's thirty-three chapters provide multi-perspective approaches, showing how the real contexts of current language education need the integration of theoretical backgrounds with the best practices resulting from practical experience.

Creative Virtualities in Human Self-Interpretation-in-Culture Anna-Teresa Tymieniecka, 2012-12-06 It would seem that modern humanity has unthroned the human spirit, undercutting the very foundation of the validity of truth, moral values and principles. There appears to be no attempt to discern what is beautiful and true: it is functional and pragmatic usefulness that seem to dominate human evaluations and transactions with other humans and, indeed, animals. Humanity is becoming detached from the 'higher' aesthetic, moral and intellectual works of the human spirit and thus the life of the spirit is often situated on the other side of a gulf, opposed to science with its rationality. Culture is in danger of becoming reduced to science. In other words, the great metaphysical questions - those of telos, of sense - often are answered in terms of scientific conceptions. But these are at least incomplete, if not fragmentary, and in principle hypothetical, which still leaves the questions unanswered. But it is culture that is the manifestation of the human spirit, being the historical process of human self-interpretation-in-existence. All manifestations of the creative forge of the human being find a role in the fabric of culture, which involves progressively widening circles of the human community, demanding an integration and attunement with others in their changing conditions of life. This consideration of culture involves all areas of philosophical reflection: moral, aesthetic, metaphysical, epistemological, semiological, cognitive, and more.

Creativity: Education and Rehabilitation Massimiliano Palmiero, Laura Piccardi, Raffaella Nori, Liana Palermo, Carola Salvi, Cecilia Guariglia, 2019-09-23 Creativity has the potential to improve quality of life. It can also be conceived as a tool in educational and rehabilitation settings. Therefore, it is the aim of this Research Topic to further show how creativity can be used and encourage the application of creativity in pedagogical and clinical contexts.

Transparent Simulacra Robert C. Spires, 1988 The development of basic textual strategies in Spanish fiction from 1902 to 1926 is the focus of this study. Challenging traditional views of the relationships between the literature produced by the Generation of 1898 and the Spanish vanguard movement, Spires traces through analyses of select works a process of evolution beginning at the turn of the century and continuing into the 1920s. Spires demonstrates how the somewhat

tentative strategies of the first decade became more daring in the second. As opposed to the extant historical, autobiographical, and thematic surveys of this period, Transparent Simulacra features structuralist and post-structuralist readings of fiction by Baroja, Azorín, Unamuno, Pérez de Ayala, Gómez de Serna, Jarnés, and Salinas. These approaches offer not only revisionist views of a literary period but also revisionist readings of some of Spain's best-known fiction.
